TO THE LEGISLATURE OF THE
STATE OF NEW YORK

The Governors of the Society of the New York
Hospital respectfully present their 152nd Annual
Report of the state of the institutions under
their charge for the year 1923.

THE PRESENT NEW YORK HOSPITAL
WEST FIFTEENTH STREET FRONT
Completed 1877

ANNUAL REPORT
OF THE
GOVERNORS OF THE SOCIETY OF THE NEW YORK
HOSPITAL FOR THE YEAR 1923

In conformity with the provisions of its Charter, granted by Royal authority June 13, 1771, in the reign of King George III, the Governors of The Society of the New York Hospital present their annual report and a statement showing the receipts and expenditures for the year 1923 of the several institutions under their control and management, as follows:

The General Hospital, at Fifteenth and Sixteenth Streets, New York, the Department for the Treatment of Mental Diseases, known as Bloomingdale Hospital, at White Plains, Westchester County, and the Cottages for Convalescent Children, at White Plains.

During the year all these institutions had increasingly active operation. Various additions and improvements have been made in every department, and appreciable progress has, it is believed, been made in the larger plans for the expansion of the Society's work.

The decrease in operating expenses which was noted in the last report has not continued. On the contrary, the cost of maintaining the general Hospital was \$578,871.51, an increase of \$33,476.18 over 1922. The details of this are set forth in the attached report of the Superintendent.

The activities of the Medical Board are constantly enlarging. In its report special attention is given to the clinics for practicing physicians and for medical students in the wards and to various clinics in the Out-Patient Department. Among these latter the Thyroid Clinic, under the direction of Dr. Pool and Dr. Foster, has cared, during the year, for about a thousand patients. The Immunology Clinic has continued to be crowded with patients. In addition to furnishing ward treatment for diabetic patients, a special diabetic clinic was established which has been largely attended. During the year the Hospital spent \$10,925.78 for insulin or insulin for the use of patients. So much interest was aroused by the benefits derivable from the use of this new remedy that a special committee was formed in the City to obtain subscriptions for this purpose, and this Committee has appropriated \$1,000 of its collections to this Hospital.

Another new clinic devoted solely to the treatment of cancer of the urinary tract was established in the Urological Department. Various changes and extensions have been undertaken in this Department, and its activities are only limited by the space at our disposal.

Our Social Service Department has continued its most valuable work. At the suggestion of the Chairman of the Ladies' Auxiliary, a moving picture entitled "The Watchful Eye" was prepared and has since been shown. It sets forth vividly some of the important activities of social service work. Among the other interesting features of this work, the Night and Day Nursery, to care for children of mothers who are patients in our general Hospital, is described in a supplementary report of the Nursery Committee.

The report of the Medical Director of Bloomingdale Hospital sets forth in detail the progress of the plans for the development of that department of the institution. The two doctors' cottages constructed with Mr. Payne Whitney's gift of \$70,000 are now completed, and work has been begun on the Medical Staff house, for the construction of which Mr. Whitney gave \$200,000. This is placed between the two new cottages, and will complete the attractive centre of professional life on the Hospital property. The plans for the Women's Recreational Building, for which Mr. Henry R. Taylor gave us \$50,000, have been studied further, and construction of the building is expected to begin soon. The Men's Gymnasium, which is being built with money received by the Society under the will of the late John Augustus Rogers, is almost completed.

Since the last annual report of the Society the following special gifts have been received:

Mrs. William J. Fitz Gerald, who gave the institution \$7,700 in 1922, has continued her generous benefactions by contributing during 1923 \$25,000 more. With these funds three beds have been endowed in Mrs. Fitz Gerald's name, and the Mary A. Fitz Gerald Fund has been established.

The "Friend" who gave us \$15,000 in 1921 and \$15,000 in 1922, for application to the current wants of the Hospital, repeated this gift of \$15,000 in 1923, and the money is in process of expenditure in meeting special urgent needs of the general Hospital.

Mr. Edward J. Hancy and Mr. William Turnbull, executors of the will of the late Marion Cutting, have assigned to the Hospital \$10,000 of the estate to endow a bed in her memory.

Of the legacies reported in previous annual reports the following have been received:

- λ \$12,500 under the will of Charles E. Rhineland, making a total of \$22,500.
- ✓ \$119,031.97 under the will of James Buchanan Brady, making a total received to date of \$676,777.92.
- λ \$164,305.62 under the will of John Augustus Rogers, making a total received to date of \$174,305.62.
- \$25,000 under the will of Emily F. Southmayd on account of the legacy of \$100,000.
- λ \$102,038.27 on account of the residuary estate of John H. Flagler.

Among other gifts we have received \$2,500 from Mrs. Charles F. Woerishoffer, \$1,000 from Mrs. Richard T. Auchmuty, \$1,000 from Mr. Walter Jennings, \$1,000 from Mr. Robert W. Kelley, \$500 from Mr. Walter Trimble, \$500 from Mr. John Walters, \$250 each from Mr. Paul Tuckerman, Mr. Henry W. deForest, Mr. Harold S. Vanderbilt and Mr. Charles C. Stillman, and \$200 each from Mr. Bronson Winthrop, Mr. William deForest Haynes, Mr. William Colgate, Miss Mary U. Hoffman and Miss Edith P. Morgan.

Mr. Richard Trimble, who had been a Governor of the Society since 1898, and whose father and grandfather had each been its President, felt obliged by reason of protracted illness to resign his office last August.

Mr. Frank L. Polk was elected a Governor at the February meeting of the Board.

The accompanying reports show more in detail the work of the various departments during the year.

EDWARD W. SHELDON,
President.

G. HOWARD WISE,
Secretary.

February 5, 1924.

In Memoriam

DAVID B. OGDEN

DIED OCTOBER 14, 1923

By the death of Mr. David B. Ogden at his home in Bar Harbor, Maine, on October 14, 1923, the community has lost an honored citizen, the bar one of its leaders and this Society a valued and beloved Governor. His long career was intimately associated with the finest traditions of the City in its social, professional and humanitarian life. After graduation from Columbia College in 1869 and from its Law School in 1871, he applied himself to his chosen profession with conspicuous and nobly won success. His distinguished grandfather and namesake, one of the great lights of the American bar, was a member of this Society for nearly forty years. He himself became a Governor of the institution in May 1908 and served it with earnest faithfulness. His warm heart was in the work and he brought to its performance all his learning, wise judgment and lofty spirit. In the broadening and perfecting of our corporate activities he was specially interested and his service on the Development Committee from its establishment in March 1920 was particularly devoted and effective. With the immense possibilities for good which the work of the institution now promises we can ill afford to be deprived of his stimulating aid. But while we have lost his actual presence here, we shall still possess and cherish his high standard of service as a lasting inspiration in the future conduct of the affairs of this Society.

(Extract from the Minutes of the Board of Governors, November 7, 1923.)

THE SOCIETY OF THE NEW YORK HOSPITAL.

STATEMENT OF INCOME FOR THE YEAR 1923.

RENTS, INTEREST, ETC.:

Ground Rents, Fifth Ward (Duane, Thomas and Worth Streets).....	\$122,350.00
Interest on Bonds, etc.....	60,222.80
George F. Baker Endowment Fund (for general purposes).....	37,286.55

REPORT OF THE SUPERINTENDENT OF THE NEW YORK HOSPITAL FOR THE YEAR 1923

To the Board of Governors:

GENTLEMEN:—The cost of maintaining the Hospital in 1923 was \$578,871.51 as compared with \$545,395.33 in 1922, an increase of over $5\frac{1}{2}$ per cent. The operating receipts in 1923 were \$459,624.35 against \$432,307.19 in 1922, an increase of \$27,317.16 or over 6 per cent. The operating deficit was \$119,247.16 against \$113,088.14 in 1922.

The expenditures of the X-ray Department, including new equipment and building alterations, amounted to \$23,356.84. The total receipts of the department were \$17,056.89, leaving a deficit of \$6,299.95.

The cost of provisions in 1923 was \$111,555.33 as contrasted with \$99,938.90 in 1922, an increase of \$11,616.43 or nearly 12 per cent, and the expenditures for kitchen labor and supplies were \$4,752.92 greater. These increased expenditures were due partly to increased prices and partly to an attempt to improve the dietary of both patients and employees.

The Department of Immunology expended \$25,034.55 in 1923 as contrasted with \$21,284.90 in 1922. This increase was entirely in the payroll.

The cost of operating the private patient service was \$178,327.22 against \$168,650.79 in 1922, an increase of \$9,676.43 or almost 6 per cent. Food, kitchen and housekeeping costs were \$7,040.06 larger than in the preceding year and a larger per cent of the laundry costs were charged against this department. The cost per day to the hospital for each patient cared for on the private patient service was \$9.20. The income from this department was \$206,736.49 as compared with \$191,054.51 last year.

The ward service cost \$297,105.92, compared with \$283,746.53 in 1922 and the expenses of the Emergency Department were \$29,727.95 against \$29,175.49.

OUT-PATIENT DEPARTMENT

The operating cost of the Out-Patient Department in 1923 was \$73,810.42, compared with \$66,822.52 the preceding year. There was a decrease in number of new patients but an increase in return visits.

<i>Year</i>	<i>New Patients</i>	<i>Return Visits</i>	<i>Prescriptions</i>	<i>Receipts</i>	<i>Expenses</i>

1923	13,615	110,447	41,897	42,390.00	73,810.42

AMBULANCE SERVICE

The number of calls answered in 1923 was greater than in 1922 for the reason that for four months our ambulances covered a larger district, going as far north as 59th Street. The new district was found to be too large to be covered satisfactorily by electric ambulances and the Board of Ambulance Service in May returned the hospital to its old district which lies between 14th and 42d Streets and between Fourth Avenue and the North River.

<i>Year</i>	<i>Ambulance Calls</i>	<i>Calls Per Day</i>	<i>Patients Brought to Hospital</i>	<i>Patients Treated and Left at Place of Call, or Transferred Direct to Other Institutions</i>

THE PRESENT NEW YORK HOSPITAL
WEST SIXTEENTH STREET FRONT

THE RECORD ROOM

Thirty-two nurses on probation have taken the record room course this year in "History and Ideals of The New York Hospital, Chart Construction, Values and Preservation." Their practical work together with that of the full time clerk added to the record room staff eight months ago, resulted in 152 volumes of charts bound as compared with 46 bound in 1922.

Since the installation of the Bellevue System of Filing July 1, 1914, Rule 24, page 10 of the nomenclature stating that "at the end of each year all cards (bedside) shall be redistributed alphabetically," had not been carried out. Therefore these cards were in nine different annual files. The herculean task of redistributing these 50,575 cards alphabetically into one consolidated file was undertaken and progress has been most gratifying to all concerned; only about one-fourth remains to be completed.

Conservation of time and energy has been attained by the installation, between book stacks, of sufficient drop lights, controlled by pull chains, and of a stationary wash bowl.

One book stack of 172 feet has just been completed, of which 43 feet are occupied by the circulating library for patients.

Charts removed from the record room upon the order of a Court—58.

UROLOGICAL DEPARTMENT JAMES BUCHANAN BRADY FOUNDATION

The Urological Department has continued its growth in a very satisfactory manner. The beds, which were increased to eighteen in number, have been continually in use and there is usually a long list of patients awaiting admission.

The special diagnostic room outfitted with four originally designed combination cystoscopic and X-ray tables, has become so popular that there is decided need of more room. This room is also equipped with all of the known varieties of instruments for investigating and treating urological conditions. It is presided over by a specially trained nurse who has no other duties. Special times are assigned for the examination of men, women and children, both private and charity. The X-ray operator likewise devotes practically his entire time to the taking of urological exposures, development of films and the manufacture of lantern slides. The pyelograms developed here have attracted favorable attention.

A new clinic, devoted solely to the treatment of cancer of the urinary tract, was established in November. It meets every Wednes-

day, and all types of treatment, including radium, X-ray and surgery, are utilized. It is also planned to establish a clinic for the sole care of children suffering from urological diseases.

The Out-Patient Department for the care of ambulatory cases has recently been thoroughly overhauled, new plumbing of a modern character installed, and the space divided by curtains on proper stanchions into three examining and two consultation rooms. These changes allow a great deal more privacy in the care of dispensary patients, which is a very important consideration. This Out-Patient Department is presided over by a trained orderly.

A master artist, Mr. Max Landberg, has been brought from Berlin. He is on duty daily and in addition to his work in the urological department intends to establish a school for the teaching of scientific art.

The Department has secured the service of a pathologist who will devote his time to urological examinations and research. He will work in the laboratory and under the Director of Laboratories for the hospital, who has at all times extended his heartiest co-operation in all of the work of the Urological Department.

The development in the immediate future of a loan library and museum is a matter of importance. This branch of the Department would also include a loan collection of microscopic slides and lantern slides. The idea of this development would be to make the Department of national and international import rather than having it become a purely local affair.

The Department suffered great loss in the deaths of Dr. Frederick W. Smith and Dr. J. Kent Worthington, who had been connected with it since its inception. The charming personalities of these men and their assiduous attention to their duties in the Department will make their loss deeply felt by the hospital.

IMPROVEMENTS AND REPAIRS

Over \$500.00 was spent for books and periodicals for the medical library.

A 42 x 84-inch, direct-gearred, motor-driven washer was installed in the laundry, replacing a worn-out washer. Two steam presses, with extension tables and treadles, were purchased for the private laundry. The old collar and cuff ironer was replaced with a new one of modern design. The cost of this laundry equipment was about \$5,100.00.

The old heater, supplying hot water to the wards and nurses' home, having worn out, was replaced with a new one at a cost of \$230.00.

New furnishings, including twenty-two beds, six desks, forty-six rugs, six dressers, twelve chairs and four couches, were purchased for the nurses' home. About sixty wardrobes were rebuilt and the furniture in the reception room was repaired and recovered. The cost of these improvements and repairs was about \$3,000.

A clothes chute was built in an unused ventilating duct in the private patient building at a cost of about \$865.00.

A second steam-driven ice-making and refrigerating machine, of seventeen tons capacity, was installed at an expense of about \$3,500. The old machine had been operating twenty-four hours daily for a number of years and it was felt that provision should be made to meet emergencies in the case of probable breakdowns. In addition to cooling a considerable number of refrigerators with brine, from 3,000 to 5,000 pounds of ice are produced daily.

A combination coffee and water urn was purchased for the private patient building service replacing a worn-out set.

The entrance for ambulances and other vehicles on Fifteenth Street was widened and new gates installed at a cost of \$400.00. The old entrance was not wide enough to permit the passage of the wide trucks now in use.

The nurses' dining room had been overcrowded for many years. An addition on the south side of the private patient building improved conditions. The room now has a normal seating capacity of about one hundred. This addition was extended up a story and two rooms were obtained for the Brady Urological Department. The cost of this construction was about \$6,500.

A new high-voltage, deep-therapy X-ray machine was installed early in the year at a cost of \$4,500. To provide space for it the lower end of the air shaft in the help's dormitory building was converted into a room 11 x 12 feet at a cost of \$1,180.00. A Bucky diaphragm was added to the X-ray equipment.

Quite extensive alterations were made on the second floor of the private patient building. This floor is occupied by the Brady Urological Department. The cost of these alterations was about \$4,000.

A new steam table was added to the private patient pantry equipment.

One of the old pressure tanks used in operating the hydraulic elevators, having become unfit for use, was replaced with a new tank costing \$2,700.

EIGHTEEN-YEAR RECORD

Year	Operating Receipts	Operating Expenses	Excess of Expenses Over Receipts	Hospital Days	Persons Fed Daily	Per Capita Cost of Food Supplies
1906	\$79,177.57	\$234,154.03	\$154,976.46	74,513	439	.3937
1907	76,188.47	260,983.72	184,795.25	75,506	464	.4772
1908	75,062.54	261,906.87	186,844.33	77,332	480	.4191
1909	82,162.29	262,523.61	180,361.32	80,551	482	.4019
1910	82,996.55	256,089.20	173,092.65	86,874	556	.3395
1911	86,120.54	254,312.74	168,192.20	91,474	581	.2914
1912	95,134.54	266,137.88	171,003.34	93,613	585	.3079
1913	96,363.91	260,549.71	164,185.80	92,142	561	.3020
1914	115,218.32	283,835.98	170,617.66	94,218	570	.2950
1915	140,909.97	293,140.57	152,230.60	95,914	583	.3010
1916	155,393.42	311,535.60	156,142.18	100,041	605	.3304
1917	174,921.11	366,032.01	191,110.90	100,132	612	.4033
1918	219,630.62	383,257.67	163,627.05	98,014	620	.4265
1919	270,829.77	437,111.40	166,281.63	96,415	622	.4820
1920	338,241.55	528,544.15	190,302.60	98,531	624	.5478
1921	391,381.24	571,052.00	179,670.76	98,373	640	.4584
1922	432,307.19	545,395.33	113,088.14	96,020	650	.4213
1923	459,624.35	578,871.51	119,247.16	93,282	632	.4902

THE USE OF ILETIN IN DIABETES

The use of iletin in diabetes has greatly increased the demands for hospital facilities for the treatment of this disease. In addition to furnishing ward treatment a clinic was established early in the year in the Out-Patient Department and this has been largely attended. Unfortunately, the administration of iletin must be continued permanently, and as it is rather expensive it becomes a burden in the case of some families. During the year the hospital spent \$10,925.78 for 368,025 units of iletin. In view of the benefits to be derived from its use, a committee was formed in the city to administer a fund contributed by a few individuals and to solicit additional contributions to help pay for iletin for those who could not otherwise receive it. The committee made an appropriation to this hospital, which is gratefully acknowledged. The members of this committee are: Frank A. Vanderlip, Chairman; Elliot C. Bacon, Treasurer; Mrs. J. J. Wyle, Secretary; Mrs. W. K. Draper, Michael J. Davis, Jr., Nellis B. Foster, M.D., Charles E. Hughes, Jr., Walter M. Palmer, M.D., Felix M. Warburg, and John L. Wilkie.

THE PAYROLL

The most important factor in increasing the expenses of the hospital during the past seven or eight years has been the steady advance in salaries and wages. The payroll of 1923 is almost double that of 1916. In 1913, ten years ago, the entire expendi-

tures of the hospital, including payroll, were \$260,549.00, or \$26,204.00 less than last year's payroll. The expenditures for this item for the past eight years were as follows:

1916.....	\$147,757.30
1917.....	155,094.35
1918.....	158,831.25
1919.....	184,591.17
1920.....	209,663.39
1921.....	258,789.02
1922.....	284,773.62
1923.....	286,753.55

THE LAUNDRY

The demands on the laundry continue to increase. During the past year over 700,000 pounds of goods were laundered, over a ton each working day.

MONEY RECEIVED FOR CITY PATIENTS

The amount received from the City for the care of indigent and emergent patients was only \$14,681.15, against \$20,861.52 in 1922, \$20,131.51 in 1921, \$24,739.61 in 1920 and \$20,560.95 in 1919. This decrease in receipts from this source is due to the strict interpretation on the part of the Welfare Department of the laws and regulations governing the admission and care of indigent patients in private institutions.

WORKMEN'S COMPENSATION CASES

Patients coming under the provisions of the Workmen's Compensation Law have been treated in the past in the Out-Patient Department. Owing to the congestion in this Department, it was decided to transfer this work to the Admitting Department in 15th Street.

RELIGIOUS AFFILIATIONS OF PATIENTS

Of the patients admitted to the hospital approximately 38 per cent are Catholics, 34 per cent are Protestants, 20 per cent are Jews, and the religious affiliations of 8 per cent are unknown.

DENTAL DEPARTMENT

The work of this department shows a slight increase over last year. Dental work is done mostly for out-patients. The number of cases treated during the year was 3,222. There were 2,118 extractions; 640 surgical treatments and dressings; 267 radiographic readings (full sets of ten films); 217 silver fillings; 173 complete prophylaxis; 37 operations for impacted teeth; 17 fractures; 11 treatments of pericoronal infection; 9 supernumeraries; 4 trench mouth (Vincent's).

ACKNOWLEDGMENTS

The New York Bible Society presented 264 bibles to the hospital. All patients in the hospital are provided with bibles.

The Haven Relief Fund Society made a contribution of \$200. A detailed report of the disbursements was rendered to the officials of the Society.

Mrs. William John Fitz Gerald gave \$500.00, Mrs. Waldron Post Brown, \$20.00; Mr. Maxwell S. Schirmer, \$5.00; Dr. N. M. Kolben, \$3.00 and Mr. Edward W. Sheldon, \$100.00, for the Christmas festivities.

Sunday song services were conducted by the Business Women's Council of the Billy Sunday Campaign. This organization has been providing music every Sunday afternoon for the ward patients for many years and their efforts are much appreciated. At Christmas time they presented each patient and employee with a box of candy.

Numerous donations of flowers, toys, books and magazines were received and duly acknowledged.

For Financial and other Statistics see Statistical Report between pages 30 and 31.

Respectfully submitted,

THOMAS HOWELL,

Superintendent.

REPORT OF THE MEDICAL BOARD OF THE NEW YORK HOSPITAL FOR THE YEAR ENDING DECEMBER 31, 1923

To the Board of Governors:

GENTLEMEN:—The Medical Board would report the past year as one of continued and widened activity.

In the wards further careful observations have been made of a new method of treating pneumonia that gives promise of marking an advance in the treatment of this dread disease. The Hospital is being used to a greater extent by a number of physicians for a more extended diagnostic study of their more difficult and obscure cases. This aspect of our work is of great interest to the staff of the Hospital and seems to be very helpful to the outside physicians who send us cases.

Clinics for practicing physicians have been given frequently by members of the medical and surgical staff. The audience at the clinics has been fairly large and it would appear that the work that they entail is worth while and tends to widen the influence of the Hospital, and to enhance its benefit to the medical community.

In addition to these clinics to graduates in medicine, the students of the Cornell Medical College have been taught in the Hospital systematically during the last two years of their course. All of the students of these two classes receive instruction in the wards in physical diagnosis during their third year, and during their fourth year in the Medical College they are assigned for study to the surgical and medical wards. They also are given special instruction in the diagnosis and treatment of the diseases of children in the children's ward of the Hospital and in the dispensary. In the fluoroscopic room demonstrations of the use of the fluoroscope in the diagnosis of gastro-intestinal conditions are given to all of them. They attend demonstrations by the pathologists of material obtained at autopsies, and the clinical pathologist supervises their work in his department.

The number of autopsies is increasing to the great advantage of the interne and visiting staffs, but we do not as yet obtain consent

for as many autopsies as are necessary for the most complete advancement of our knowledge of disease.

The Department of Immunology is expanding rapidly and is doing work of an excellent quality. This Department, in addition to its research work in this large and important field, prepares the special vaccines used in the asthma clinic for the treatment of hay fever, asthma and other diseases of kindred origin. About four hundred lots of special material have been prepared for use in the treatment of these diseases. Pollens are obtained from distant as well as contiguous districts at a considerable expense, and are worked up by a very careful technique into the finished vaccine. A large variety of substances other than pollens have also been used. The products of this Department could not have been obtained from any other sources.

About three years ago a special clinic was established for the treatment of diseases of the thyroid gland, in the belief that there existed a need for such a clinic. That belief has been confirmed by experience. During the year 1923, about one thousand patients were treated; of these more than one-third were new cases. There are several types of thyroid disease and some uncertainty prevails as to the best method of treatment. A careful study of cases is helping to differentiate more precisely the various types of disorder and to determine the appropriate treatment for each type. There are also disorders not apparently related to the thyroid which resemble thyroid disease. It is evident that methods of differentiation are valuable.

In the diagnosis of thyroid cases 400 determinations of basal metabolism were made during the year. These determinations are of value not only in diagnosis but as a check upon the efficiency of the various methods of treatment. This clinic is hampered in its growth by the same limitations of space which burden other departments.

At the end of the year Dr. Busby resigned his position as Radiologist. Dr. Busby was appointed Radiologist in 1904 when the X-ray Department was organized and has been at its head continuously since that time. Under his guidance the Department has grown from a comparatively small affair, using a single X-ray machine that now would be considered quite ineffective, to an organization of great importance in the hospital work. During the past year six X-ray machines of superior type have been in nearly constant use for taking X-ray photographs, for fluoroscopic work and for use in X-ray therapy.

The activity of the Department may be inferred from the fact that during 1923 nearly 14,000 X-ray photographs were taken; one

machine was in use several hours every day in fluoroscopic examinations and two machines, one of them a 200,000-volt apparatus, were in daily use treating patients therapeutically.

Dr. Busby leaves with the appreciation of the Medical Board for his long and arduous service to the Hospital.

A list of publications during the year, by members of the professional staff of the Hospital, is given below:

- DR. FREDERIC W. BANCROFT: "Chronic Cholecystitis without Stone." *Annals of Surgery*, 1923. "Three Cases of Bilateral Tumors of Ovaries." *Surgical Clinics of North America*, 1923.
- DR. LEWIS A. CONNER: "The Relation of Laboratory Aids to the Practice of Medicine and Surgery." *Journal of the American Medical Association*, 1923, LXXXI, 871.

President.

EDWARD CUSSLER,
Secretary.

REPORT OF THE TRAINING SCHOOL FOR NURSES FOR THE YEAR 1923

To the Board of Governors of the New York Hospital:

GENTLEMEN:—I beg to submit the forty-seventh annual report of the School of Nursing.

The closing year registers the following staff on duty in the Hospital:

Directress.....	1
Assistant Directress.....	1
Instructor.....	1
Night Supervisor.....	1
Supervisor, Out-Patient Department.....	1
Supervisor, Private Patients' Pavilion.....	1
Charge Nurses, Surg. and Med. Divisions of Hospital Wards.....	4
Charge Nurse, Children's Wards.....	1
Charge Nurse, Admission Wards.....	1
Charge Nurses, Floors of Private Patients' Pavilion.....	3
Operating Room Staff.....	5
Staff, Brady Urological Department.....	7
Graduate Nurses, Floor Duty Private Patients' Pavilion.....	4
Total Number.....	31

The number of students in the School is as follows:

GRADUATING CLASS OF 1923

Remaining for completion of time.....	2
---------------------------------------	---

SENIOR CLASS, 1924

Number reported last year.....	28
Resigned.....	2
Disqualified.....	5
Remaining.....	21

INTERMEDIATE CLASS, 1925

Number reported last year.....	36
Resigned.....	6
Remaining.....	30

JUNIOR CLASS, 1926

Entered, 23; resigned, 1; disqualified, 4; remaining.....	18
Probationers.....	8

62

Affiliated Pupils:

French Hospital School of Nursing.....	4
Bloomington Hospital.....	3
Telfair Hospital.....	2
White Plains Hospital.....	<u>2</u>
Total Number of Students.....	<u>11</u> 90

It will be of interest to note that of thirty-one students enrolled in the Junior Class nine were referred to our school by nurses and four by doctors who have been connected with our hospital. We greatly appreciate this manifestation of their interest, knowing that the influence of our own nurses and doctors and those closely associated with our institution is the only true and profitable publicity we have. If, instead of nearly fifty per cent, one hundred per cent of our students were directed to our doors by the splendid men and women who have passed through, we should be encouraged in our endeavors to maintain the high standards they have set for us.

The School is unfortunate in having six resignations from the Class of 1925. Three of these resulted from long and tedious illness which left the students physically unfit to continue, and one resigned to be married. The beds in the Private Patients' Pavilion reserved for sick nurses were occupied 326 days by graduates and 331 days by students nurses, making a total of 657 days. We are fortunate in being able to report only two deaths among our graduates this year: Emily L. Cordes, M.D., Class of 1891, died February 24, 1923; and Laura Hartley, *née* Laura Weston, Class of 1893, died February 10, 1923.

Following up the information given in last year's report relative to the affiliations we offer our students, I might mention that the Class of 1925 have shown keen interest in the election of their services. However, after a class conference, every member decided to take mental and nervous diseases at Bloomingdale Hospital as one of her affiliations, owing to the fact that the Education Department had issued a statement that hereafter an examination in Mental and Nervous Diseases would be added to the regents' examinations for registered nurse. This announcement was not a great shock to our nurses as they have all appreciated the value of their Bloomingdale service and the Class of 1923 went up for this examination feeling well prepared. It might be desirable to consider the incorporation of this subject in our regular curriculum, leaving as electives the other three services, namely, Communicable Diseases at Willard Parker Hospital, Visiting Nursing Service at Henry Street Settlement and Hospital Social Service in our own Social Service Department.

On the evening of March 7th, the forty-sixth anniversary graduating exercises were held in the Administration Building. The President, Mr. Edward Sheldon, presided. After the invocation by the Reverend Eliot White, Vicar of Grace Church Chapel, the President introduced William Church Osborn, L.L.D., President of the Children's Aid Society and of the New York Society for the Relief of the Ruptured and Crippled, who delivered the address to the class. Mr. Osborn brought out some very applicable and interesting points, emphasizing that a professional life is a life of continuing opportunity for study, the exercise of varied activities and the enjoyment and fruition of all of the interests that go to make self-development. "There is drudgery in it. There is drudgery in all important careers. To do a specific job and do it well is one of the main ways of making life worth living". Such suggestions should surely stimulate the ambition of the group of eager young women standing on the very threshold of the most useful of professional careers.

The President addressed the class, and presented the diplomas and gold badges. At the close of the exercises the Class entertained their friends at supper, followed by dancing in the nurses' residence.

We are still hopeful in our anticipation of a more comfortable home life for our nurses and better accommodation for their instruction.

On behalf of the school I take this opportunity of thanking Mr. Sheldon for his generous gift of forty volumes to our reference library. This great need supplied has been most helpful in the class room.

In closing, I wish to express my appreciation to the Board of Governors, the Medical Board, to the Superintendent of the Hospital, to the splendid group of head Nurses and Supervisors, and to my office staff for their unfailing loyalty and co-operation.

Respectfully submitted,

M. H. JORDAN,

Directress of Nurses.

THE SOCIAL SERVICE COMMITTEE FOR THE YEAR 1923

EXECUTIVE COMMITTEE

Mrs. Walter Jennings.....	<i>Chairman</i>
Mrs. Augustine J. Smith.....	<i>First Vice Chairman</i>

MRS. R. HORACE GALLATIN,

Treasurer.

REPORT OF THE SOCIAL SERVICE COMMITTEE, NEW YORK HOSPITAL, 1923

To the President and Governors of the New York Hospital:

GENTLEMEN:—The Committee takes great pleasure in presenting the eleventh annual report of the Social Service Committee with the exception of the report of the Night and Day Nursery which has assumed such an important place in the work that it must appear separately. The Treasurer's Report is also submitted separately.

I find on reviewing the work of the Committee that we are now doing more preventive work than formerly, that is, we do not wait for sickness and distress to come to us for help, but by studying the general family conditions, we can detect incipient disease and take measures to prevent acute conditions. We depend largely on the co-operation of other societies such as the A. I. C. P., C. O. S., Burke Foundation, the Churches and the resources under their control.

Malnutrition being a frequent forerunner of disease, by building up the child's constitution, we feel that much suffering is prevented and last winter made our first experiment in T. B. prevention, establishing a class under the able guidance of Miss Mary Appleton that was so successful in its results that this year the Committee, under the Chairman, Mrs. Treadwell, has engaged a nurse to conduct the class. Last year we could not find any room in which the class could be held, so, through Mrs. Bliss's influence, Miss Lizzie Bliss kindly gave us the use of a bright sunny room which was ideal for the work and from January 25th to April 17th forty-four visits to homes were paid, seventeen families visited, and there was a total attendance of forty-nine children. Miss Appleton roused the interest of four or five public-school teachers and the Tonsil Hospital, Dr. Robert Fowler in charge, operated on one boy free of charge. The Museum of Natural History, Department of Public Education, kindly loaned their very instructive posters on Nutrition. Colgate and Company generously donated tubes of tooth paste and diagrams and booklets designed to interest and instruct children in the care of their teeth.

The Milk Committee has distributed 16,478 quarts of milk. This amount is 2,000 quarts more than in 1922. Mrs. Payne Whitney is the Chairman and it is entirely through her efforts that the money has been collected.

At Thanksgiving and Christmas baskets have been distributed. The Christmas tree for the children this year was given in the beautiful big Assembly Room of the Margaret Louisa Home for which we beg to thank the Y. W. C. A. most sincerely. Miss Rust provided an ideal Santa Claus. We have again to thank Miss Ruhl for her gift of charming and complete layettes and to report that she donated 652 pieces this year. This splendid work is given in memory of our late associate, Mrs. Frank Sturgis, and we beg Mr. Sturgis to accept our sincere thanks and appreciation for his very substantial share in the gift.

Mrs. Blandy, Chairman of the Volunteer Committee, supplies Assistants in the Clinics, Miss Hoppin, Mrs. Gardiner and several others again serving this year.

Mrs. A. J. Smith, Chairman of the Food Committee, has supplied nourishing food for emergency cases.

Mrs. Vietor, Chairman of the Playground Committee, has made the Playground attractive with swings, etc., and it is used by the convalescents from the Hospital as well as by the children and mothers in whom we are interested.

Mrs. Allien as Chairman of the Home Economics Committee has brought intellectual as well as material interests into the lives of many women and has twice provided days in the country which they enjoyed very much.

Mrs. Hibbs as Chairman of the Library Committee has distributed 3,057 books to patients in the Hospital as well as magazines and games. The Library now possesses books in fourteen different languages.

The Clothing Committee, of which Mrs. Kent is Chairman, has supplied clothing for many people.

We sent 475 children to the Fresh Air Homes last summer and we are grateful for opportunities offered by the Tribune Fresh Air Fund, Children's Aid Society, A. I. C. P. (Sea Breeze) and Church of the Incarnation (Lake Mohegan). One thousand and seventy children were sent to convalescent homes. We are deeply indebted to Campbell Cottages, who took 1,020, Blythdale, Reed Farm and to Mineola, who took fifty children.

This year we feel that Social Service is being more firmly established than ever, for the circular of information sent out to prospective students in our Training School for Nurses, makes Social Service one of its elective courses. The object of this course being "To give the pupil nurse an introduction to extension medical service in the Social Service Department of this Hospital." By next October we hope to have pupil nurses coming to our department for this course.

REPORT OF NIGHT AND DAY NURSERY

During the year 102 children have been cared for at the Nursery, with a daily average of 11. Periods of care have varied from two weeks to four months, depending on circumstances of each case. Ages of the children have ranged from 1 week to 8 years (though only in exceptional cases are children over 5 admitted). No case has ever been transferred to a hospital or other institution from the Nursery, for sickness or any other reason. No child has lost weight nor in any way run down in health. All have gained and improved with the exception of one very delicate child who was kept for six weeks and then sent to a boarding home as its mother had died.

Beside the satisfaction the Committee feels on account of the results obtained with the children there is added pleasure in the realization of the help and comfort to poor sick mothers who have been able to remain in the Hospital for surgical or medical treatment while their little ones were happy and well cared for at the Nursery.

Respectfully submitted,

FLORENCE E. DICKERMAN,

Chairman.

Number out on visit.....	5	3	8	15	9	24	32
Average number on visit during year	4.35	4.68	9.03	7.68	6.07	13.75	22.78

The movement of population was slightly more active than in 1922. The number of men admitted was twelve greater and the number of women two less, the total number being ten greater. The number of patients discharged was thirty greater. The total number of patients treated was 272 men and 307 women, making in all 579, which was twenty-six greater than in 1922, and slightly more than twice the average daily number in the Hospital throughout the year. The number of applications received was 683, from which 267 patients were accepted.

ADMISSIONS

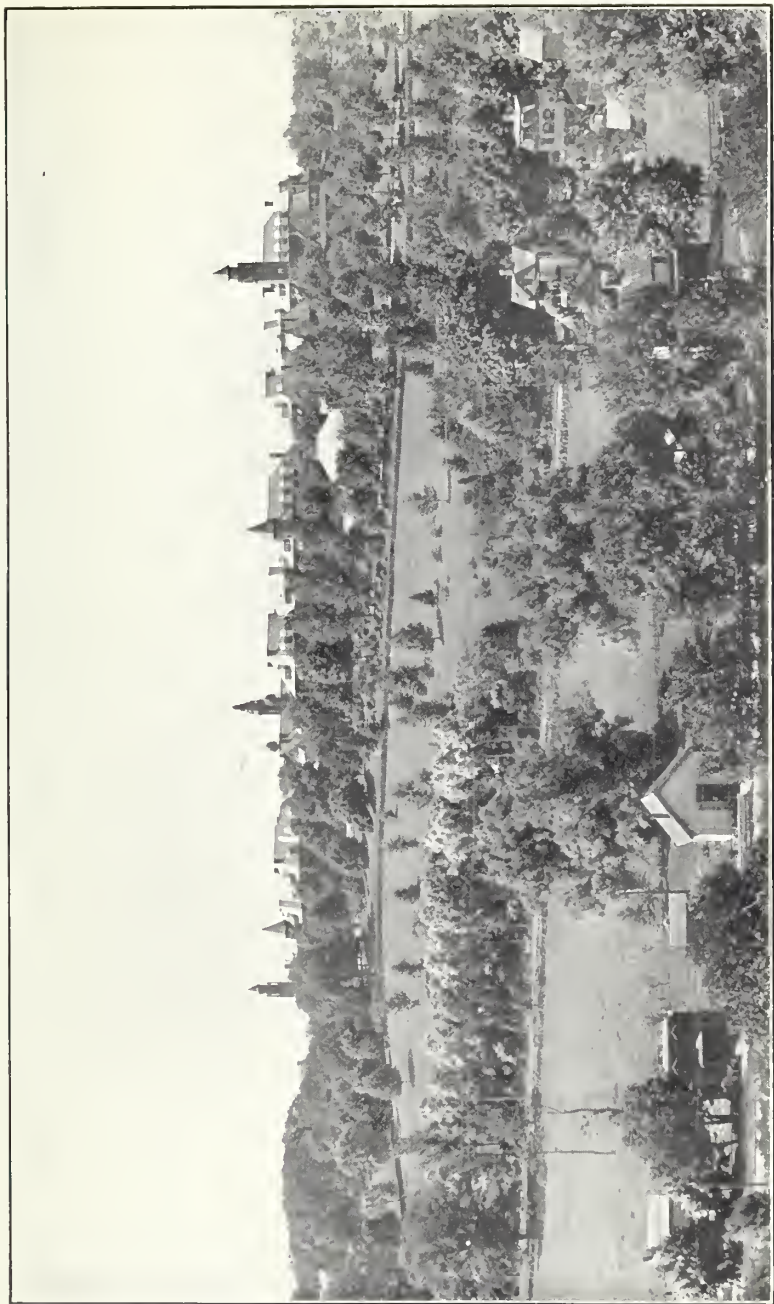

Of the 267 cases admitted, 120 were men and 147 were women. Twenty-six were admitted more than once during the year, fifteen of these technically only by reason of their transfer from the voluntary to the committed class, so that the number of persons admitted was 241. Forty-seven of those admitted had received treatment at the Hospital on one or more previous occasions, and three of those under commitment were received by official transfer from other institutions. One hundred and fifty-six were suffering from their first attack. One hundred and seventy-six, constituting sixty-six per cent of the admissions, had presented recognizable signs of mental disorder for less than a year. The experience of the Hospital during the ten years last past indicates that, notwithstanding the extension of the system of voluntary admissions and the educational work of the mental hygiene organizations, the proportion of cases which apply for hospital treatment in early periods of their disorder is not increasing. In fact, the proportion of the patients admitted who applied within a year of the beginning of their disorder has been less during the past three years than during the five years just preceding that period. This subject has been discussed in previous reports and the advantages that would be derived by means of a department in the City where patients could be received under the same conditions as those suffering from other forms of illness, have been pointed out. A great opportunity for supplying a keenly felt want as well as for entering more fully into the field of early treatment and prevention of mental disorders is presented, and it seems unlikely that it will be much longer neglected by the hospital organizations of New York.

The average age of the patients admitted was thirty-seven and one half years, and was practically the same for both sexes. This is about the same as in recent previous years, though, owing to the policy of discharging cases which prove intractable to treatment, the proportion of young and active patients in the Hospital has been increased. In carrying out occupational, recreational, and social treatment this has distinctly added to the efficiency of the service. Fourteen of the patients admitted were under twenty, eight of whom were not over sixteen. Twenty-seven were under thirty, and one hundred and forty-eight, constituting fifty-five per cent of the total admissions, were under forty.

The occupations and social grade of the patients were as in previous years. The policy of receiving certain types of self-

supporting women at low rates or free has been continued, and thirty-seven per cent of the women admitted have belonged to this class.

Of the patients admitted, one hundred and ninety-two, constituting nearly seventy-two per cent of the admissions, signed their own applications and were brought under treatment without certification or court orders. The number of patients who have been admitted to the Hospital by this method now amounts to about 2000, of which 1600 were received during the ten years last past. The experience thus obtained would appear to be a sufficient demonstration of the propriety and practicality, in a large proportion of the cases, of dispensing with legal encumbrances in the way of obtaining access to hospital treatment for persons afflicted with illnesses which affect the mind. In not a single instance has any serious embarrassment or any disadvantage to the patient or to the Hospital been occasioned by the operation of the voluntary system. In the large majority of instances the issues are purely medical and personal, and it requires only ordinary judgment and discretion for the physician to determine when application to the courts becomes necessary. The present system of State supervision furnishes all the precautions needed for safeguarding every interest concerned, and it would be extremely unfortunate if, as sometimes seems imminent, there should be a reversion to the more rigid and technical legal systems which, without discrimination, were formerly employed in the admission of every case. Patients who present extremely gross manifestations of mental disorder are so obviously unfit to take care of themselves that no formal procedure is required to furnish to the most uninformed in such matters convincing evidence of the propriety and need of hospital treatment. Such cases may, in an interval of relative clearness, even though they may not fully grasp the true state of affairs, accept the judgment of their friends and medical advisers and willingly enter the Hospital. In cases which are quite incapable of co-operation, application may be made by some legally authorized person, and the patient admitted under certification by one physician. This procedure was followed in eighteen instances during the year. The large majority of patients who sign their own applications fully realize, however, that they are in need of help and they are glad to seek it at the Hospital. Those who decline to co-operate, or who after admission on their own application, serve the agreed upon notice of their intention to leave, or persistently request to be discharged even though they refrain from presenting the written notice, cannot, of course, be received or detained unless a court order is obtained. The system of indiscriminate and ruthless com-

BLOOMINGDALE HOSPITAL—WHITE PLAINS, N. Y.

mitment as a necessary preliminary to obtaining hospital treatment for a person whose mind is disordered, belongs, however, to a period when mental disorders were not as well understood as they are today, and when the well organized means of dealing with them, which are now available, had not been developed. It is being gradually superseded by more enlightened methods which are flexible enough to meet the varying needs of individual cases and situations, and at the same time provide all the protection which is necessary. Soon it should be possible, in a state like New York with its remarkably well organized system of management and supervision, for the large majority of persons in need of treatment for disorders which affect the mind to find access to public and private hospitals without much if any greater formality than is required in procuring relief in any other form of illness. An organized effort to educate the public to this end would seem to be desirable. At present, in order to escape the legal encumbrances, hundreds of patients are every year placed in nursing homes and other institutions which are quite free from official supervision, or they are sent to institutions in adjoining states where the laws are more liberal or are laxly enforced.

The forms of disorder from which the patients admitted were suffering are shown in the following table, in which they are grouped in accordance with the classification recommended by the American Psychiatric Association:

	Male	Female	Total
Psychoses with Cerebral Arteriosclerosis.....	1	..	1

DISCHARGES

The total number of patients discharged during the year was 272, of which 122 were men and 150 were women. Of these, sixty-eight were recorded as recovered, thirty-nine as much improved, and sixty-seven as improved. Forty were discharged as unimproved, and nineteen were transferred to other institutions. Seventeen died, the number of deaths being three per cent of the total number of patients treated. Among the patients who died was a woman who had almost reached her one hundredth birthday. She was one of the group of chronic patients who had been retained, and had been in the Hospital for sixty-nine years. The term recovered is restricted to those who, previous to their illness were persons of normal mentality and were evidently fully restored. In the majority of instances this conclusion was reached only after a period of trial away from the Hospital on visit. Those classed as much improved are either persons of normal mentality who were discharged before entire restoration had been accomplished, or persons whose original mentality or form of disorder was such that, though return to their former domestic and social and, in most instances, business relations, was accomplished, strict adherence to scientific truth did not permit of their classification as recovered. These two groups, consisting of 107 patients, all of whom were restored to their former relationship, constituted just half of the cases with psychoses which were discharged from hospital care. The remainder of the discharges were made up of cases which were removed prematurely by their relatives and were recorded as improved or unimproved, cases which were transferred to other institutions, cases in which the form of disorder proved to be intractable to treatment, a few cases of inebriety without a psychosis, and the seventeen cases which died.

The average period of hospital treatment of those who were discharged as recovered and as much improved was slightly over nine months in each instance. Seventeen of the recovered cases had, however, been in the Hospital for more than a year, five of them over two years.

At the close of the year, thirty-two patients who had left the Hospital during the year were still carried on the books as on visit. The number of out-patient consultations with the physicians during the year was three hundred and sixty-six, or an average of one a day. No charge is made for these consultations which add considerably to the work of the physicians. They are an extremely useful means of continuing the treatment of the patients and of aiding them in their readjustment to their normal relationships. It is an activity of the Hospital which could with advantage be further developed and organized by means of a department in the City.

CLINICAL SERVICE

The methods of treatment outlined in the report of last year were followed during the year without noteworthy change. Though the main problem must necessarily be the mentality of the patients and the means of influencing it, at the present time, certain recent developments in the field of internal medicine seem to be of special significance in the study and treatment of mental disorders, especially emotional disturbances, and are receiving more than the usual emphasis and attention. Fortunately the medical staff has been well manned during the year, and it has been possible to extend the medical activities beyond the immediate requirements of the patients. Dr. Roper and Dr. Cussler, the consultants in internal medicine, have continued the service without interruption throughout the year. Their weekly visits have proved most helpful and stimulating and have greatly assisted in maintaining the standards of clinical work. Dr. Lowsley and his assistant, Dr. Kingery, from the Urological Department of the New York Hospital, have again most generously made regular visits to the Hospital for the purpose of making special examinations and advising treatment. The experience gained indicates that it would be advisable to place this service on the same footing as that of the other consultants from the New York Hospital. As in other years the Hospital is also indebted to the clinical and laboratory staffs and the executive force of the New York Hospital for furnishing skilled attention to patients and employees who were transferred to their care, and in connection with the laboratory and X-ray work here.

Few major surgical operations were required in the treatment of the patients during the year. One patient was transferred to the New York Hospital, two to the White Plains Hospital, and one to a nursing home for major operations, and two major operations were performed at the Hospital. The number of minor surgical operations performed was 164. Dr. J. Fielding Black of White Plains, has continued to furnish most of the expert surgical advice and treatment required at the Hospital, and has been most attentive and obliging. He made 225 visits to the patients during the year. Dr. Frank N. Irwin and Dr. Richard W. Moriarty, also of White Plains, have attended to the examinations and special treatment required for eye, ear, and throat conditions.

The dental work has, as for a number of years, been attended to by Dr. D. Austin Sniffen. He is assisted by an attendant and a dental hygienist. A statistical statement of the work of the department is appended to this report. The enlarged and well equipped quarters which were provided for the dental department last year, have, with the X-ray facilities now available, done much to assist the dentist in his work and to permit him to extend the usefulness of the department. The number of patients examined during the year was 517, and the number of operations and other dental procedures attended to was 2348.

The regular clinical staff conferences were held twice a week as usual. Four conferences to which physicians practicing in the vicinity were invited, were also held and were well attended. The topics discussed were as follows:

Medical Aspects of Abnormal Behavior in Adolescents, by Dr. Amsden of the Hospital staff, Dr. Thomas W. Salmon, Professor of Psychiatry, Columbia Medical School, and Dr. Bernard Glueck, Director of the Bureau of Children's Guidance, New York.

The Social and Medical Significance of Depressions, by Dr. Tiebout and Dr. Kilpatrick of the Hospital staff, and Dr. Charles M. McKendree, New York.

Gastric Secretory Functions in the Psychoses, by Dr. Clifford B. Farr, Director of Laboratory, Pennsylvania Hospital, Department of Nervous and Mental Diseases.

Relation of Mood Disorders to Gastro-Intestinal Motor Functions, by Dr. Henry of the Hospital staff, and by Dr. Arthur L. Holland and Dr. Joseph Roper of the New York Hospital, who discussed this and the preceding subject.

The Puerperal Psychoses, by Dr. Kilpatrick and Dr. Tiebout of the Hospital staff, Dr. William E. Caldwell, Columbia Medical School, and Dr. W. W. Mott, of White Plains.

The plan followed at these conferences, which have been held every winter for ten years, is to present material gathered in the observation of the patients at the Hospital in such form as seems most applicable to the interest of the general practitioner, and to invite specialists in the subject presented to discuss it.

One of the regular meetings of the Medical Society of Westchester County was held at the Hospital during the year.

The organization of the medical care required by employees of the Hospital was given special attention during the year, and the work concentrated in a suitably equipped, convenient room.

LABORATORIES

The following table shows the number of examinations and other laboratory processes which were attended to for the Hospital and the Campbell Convalescent Cottages during the year:

<i>Examinations:</i>	<i>Bloomingtondale Hospital</i>	<i>Campbell Cottages</i>	<i>Total</i>
Blood for R. B. C.	251	..	251
Blood for W. B. C.	412	1	413

It will be noted that the work performed has again been considerably increased beyond that of the preceding year, and it can be seen that more space for laboratory purposes could be used to advantage.

The X-ray equipment installed during the previous year has been in constant use. Already the space available is beginning to be inadequate and, as soon as the Staff House now under construction makes it possible to release additional rooms, the department should be expanded. As shown by the following table the number of examinations made was nearly forty per cent greater than during the year preceding.

The many fluoroscopic examinations made were not fully recorded.

A special study of gastro-intestinal conditions as revealed by X-ray examinations was made during the year by Dr. Henry, Director of the laboratories, in co-operation with the clinical service. The observations made showed that there was a well defined relationship between the motility, tone and position of the gastro-intestinal tract and the mood changes, which are characteristic of the disorders from which the patients suffer. Communications on the subject were made to the American Psychiatric Association, the New York Psychiatric Society, and other medical bodies. The study has been continued. It would add greatly to the usefulness of the Hospital if more special studies could be made, and special research funds provided to permit of the release from exacting routine duties of one or more members of the medical staff who showed ability for this type of investigation. Valuable contributions to psychiatric knowledge and progress might be made if this could be accomplished.

The laboratory and X-ray department were improved during the year by means of some additional equipment.

THE NURSING SERVICE AND SCHOOL

The report of the Directress of Nurses is appended. The nursing service in both men's and women's departments has been maintained principally by the employment of graduates and experienced attendants, and the attention furnished the patients has been extremely good. The number of graduate students was much larger than during the year preceding, and as they are mature persons and take a six months' course, the service they give is distinctly valuable. The number of affiliated students has remained about as in previous years. They remain for only three months, and can hardly be expected in that time to qualify for the responsibilities and special attentions required in the nursing of mental disorders. As they are already in their third year of general hospital training, however, they contribute useful service in the nursing of physical disorders presented by the patients. The number of students in the full undergraduate course given by the Hospital in affiliation with the New York Hospital is still smaller than is desired. The standards of the school have been maintained, however, and even advanced, and the classes have profited by the advantages of an organization and equipment which are adequate for a much larger group. The many new avenues to interesting and remunerative employment which have been opened to the class of women who are suitable for nursing, have absorbed many who would otherwise have been

candidates for nurse training. There has, consequently, been a scarcity which has been experienced in most of the schools of all types of hospitals. The ignorance and prejudice concerning the nature of disorders which affect the mind, and of the hospitals and other agencies organized for their study and treatment which have so long prevailed, notwithstanding the advance in general intelligence on the subject, are still an additional source of hindrance in the advancement of the newer developments in this field of work. A growing appreciation of the value of training in the nursing of nervous and mental disorders is spreading and gaining power among nurse educators and in nursing circles generally, though few realize the real nature of the problems or the extent of training and experience required for adequately dealing with them. There can be little doubt, however, that the great value of a training in which the personality of the patient and the mental reactions of illness are the center of interest will ere long be generally accepted. Our best thought and effort should, therefore, be given to the quality of the school and of the courses offered, and to the conditions which will aid in overcoming the special difficulties experienced in securing candidates, by reason of the prevailing ignorance and prejudice. The establishment of the Central School for probationers in co-operation with four other hospitals, which is referred to in Miss Hearn's report, may prove of advantage by bringing a larger group of students in general hospital training into relations with the work here. The Hospital shares equally with the other schools the cost of the instruction, and contributes the use of the building and equipment. One of the sessions of the Institute of Nursing Education which met in New York during the year, was held at the Hospital. Groups of nurses from Teachers College and other institutions, were also among the visitors of the year.

PHYSICAL AND OCCUPATIONAL DEPARTMENTS

A statistical statement of the activities of the departments of physical and occupational therapy is appended. The treatment given by means of physical exercises, games and sports, social recreations and diversions, occupation, hydrotherapy and massage, for the administration of which organized departments have been developed, continues to play a most important part in the readjustment of the patients to healthy mental and physical functioning. This subject has been so fully discussed in previous reports that it seems unnecessary to elaborate on what was there presented. The value of the measures employed has been fully demonstrated. Increasing precision and efficiency in their application is now aimed at.

In the use of hydrotherapy 146 patients, of whom 74 were men and 72 were women, were treated by means of prolonged baths. The total number of baths administered was 3311. Wet packs were employed in the treatment of 161 patients, of whom 46 were men and 115 were women, who received in all 5172 packs. Massage was employed in the treatment of 211 patients, of whom 95 were men and 116 were women, who received in all 9800 treatments. Sprays, douches, salt-rubs, shampoos, and baking were employed in the treatment of 238 patients, who received in all 10,938 treatments. One hundred and seventy-one treatments with massage and hydrotherapy were also administered to sick employees. Instruction in massage and hydrotherapy was given to 28 students. Three women and two men are employed in administering these forms of treatment. They receive assistance from nurses in training, and the prolonged baths are given solely by experienced nurses.

In the department of physical education, which attends to the treatment of the patients by means of exercises, games and sports, social and other recreational activities, the total number of patients enrolled during the year was 420, of whom 184 were men and 236 were women. The activities engaged in contribute not only to physical invigoration, but afford means of stimulating and strengthening by practice the capacity of the patients for social adjustment, which is one of the main objects of the type of treatment which is especially provided by hospitals for mental disorders. Fear is frequently expressed, when inquiry is made concerning the admission of patients, lest contact with other cases may be detrimental. While this may sometimes be the case, experience has clearly shown that the influence of patients on one another is, on the whole, distinctly beneficial. Besides the activities tabulated, dancing parties, moving-picture shows, card parties, and other forms of social entertainment have been provided, during the year, under the management of the department. Instruction in the treatment of patients by physical exercises and recreational measures was given to twenty-two student nurses.

The number of men patients who were brought under occupational treatment during the year was increased over that of previous years. There are always a number of both men and women patients who are too ill to engage in prescribed activities and who do not receive attention from the organized departments. Occupational Therapy has, however, from year to year been extended to a steadily increasing number. A table showing this is appended. During the year the total number who were treated by the departments was 481, constituting about eighty-three per cent of the total patients treated at the Hospital. Of these 218 were men and 263 were

women. The number of articles made and mended in the course of the work was 27,661, of which 13,406 were produced by the men, and 14,255 by the women. In addition 334,730 pieces of printing were produced in the men's printing shop, and a small group engaged in gardening and other outdoor work. The net cost for salaries and materials was \$13,081.59, or about \$22.00 for each patient under treatment in the Hospital, and \$27.00 for each patient who received attention from the departments. The occupational buildings are of advantage, not only as places where occupations may be engaged in, but as a means of furnishing a change of environment from the quarters of the patients, which is itself remedial. The value of careful attention to the quality of environment thus provided has been demonstrated in the experience with Sturgis Hall, concerning which the Director reports as follows: "It has been encouraging to note the effect of the beauty, atmosphere, and restfulness of Sturgis Hall upon the patients. Hardly a day has gone by without someone making a comment regarding the enjoyment of the building and the pleasure of the occupation work. We feel strongly that this building has gone beyond our expectations in adding to the benefit and enjoyment which the patients receive from occupational therapy." The men's building has also been quite satisfactory, though the increase in the number of patients under treatment, and additions that have been made to the equipment from time to time, have begun to create a need for more space. A plan for the enlargement required has been prepared by the Director. A permanent exhibit of charts, photographs, and floor plans, explaining the facilities and character of the occupational treatment employed at the Hospital, has been prepared for display at the various occupational therapy exhibits in which the Hospital is invited to participate. This was sent during the year to Detroit for the exhibit of the American Psychiatric Association, to Milwaukee for the exhibit of the American Occupational Therapy Association, and to an exhibit in New York which was held under the auspices of the Public Welfare Department of New York and of the Women's City Club. Several articles relating to occupational therapy were published by the Director of the men's department, during the year. Instruction was given in both departments to 31 students, 24 of whom were nurses.

ROCKLEY COTTAGE

The Cottage at Oakland Beach on Long Island Sound was utilized even more fully than in previous years. It was open from June 1st to October 15th. During the period 86 parties of patients, consisting of 688 in all, motored over and spent the day,

enjoying a sea bath, a homelike environment, and dinner. The number of parties was 18 more than during the preceding year, and the number of patients 101 more. Forty-six patients remained in residence at the Cottage for an average period of $30\frac{1}{2}$ days. The average daily number was 8. As in previous years, the privilege of using the Cottage was extended to the members of the medical and nursing staffs, and 91 stayed for one or more nights there, while 69 others used the bath house and received one or more meals. The Cottage is visited daily by one of the physicians from the Hospital. It has now been in operation for twelve years, and the great benefit which has been derived by the patients and the members of the staff has fully warranted the expense and extra labor involved. The cost of maintaining the Cottage, exclusive of overhead expenses at the Hospital and the physicians' services, was, during the year, \$5,444.71. This included the cost of service, supplies, repairs, and transportation. The income from patients was \$1,580.64.

EDUCATIONAL WORK

This section is added to the report this year for the purpose of reviewing briefly what has heretofore been done in educational work at the Hospital, and of bringing it definitely into view as a development which should, perhaps, receive more precise consideration than has been given it.

The Hospital has been led to engage in educational work because of needs and advantages which were revealed in carrying on its main task. The work has thus grown naturally without much attention being given to the formulation of any specific educational policy or scheme, or to definite plans for its development and support. And, although students have been received for instruction in several departments, the only one in which a special organization and special facilities for teaching purposes have been developed, is the nursing service.

The School of Nursing had its origin in a course of lectures and instruction in nursing technique which was instituted by the Medical Superintendent, Dr. Lyon, soon after the Hospital moved to White Plains. This was soon formally organized, and a class of two men and two women was given certificates in 1897. The period of training required was two years, and candidates were selected from the untrained attendants then employed, by reason of their demonstrated practical fitness for the work, and as a result of an entrance examination. Close personal attention to their instruction and training was given by the physicians, especially by

Dr. Pringle, who is still in the service, and has reason to feel gratified that some of the members of the nursing service who are today depended upon to perform the most difficult and delicate tasks, are graduates of this course. In 1912 a Directress of Nursing was appointed, and the School of Nursing was registered by the State Department of Education. The two year course was continued, and a three year course was also organized, one year of which was given at the New York Hospital and the Manhattan Maternity Hospital. Under the regulations of the Department of Education, candidates for admission to the courses must now be selected with reference to their formal schooling in definite subjects, and the former method of selection by examination and observation of their practical suitability is no longer employed. A registration and license system for nurses and attendants has also been established by law, and, as the course for nurses is restricted to those who have the schooling requirements for admission as candidates for the degree of R.N., and the course for attendants prescribed by the Education Department is of nine months only, great difficulty and embarrassment are experienced in endeavoring to make adjustments which will enable the Hospital to conform with the requirements and schedules of the Department, and at the same time continue to maintain the trained personnel needed in the care of the patients. An attendants course of nine months on a schedule prepared with reference to other fields of nursing is quite inadequate to provide the experience and training which would justify a certificate of competency in the nursing of persons suffering from nervous and mental disorders. Efforts have, therefore, been made to continue the two year course. Many enter the course, but, as, under the law, it can lead to no higher qualification than that of trained attendant, they have after varying periods, been dropping out, and for two years none has finished. Unfortunately, the field of nervous and mental disorders has been so neglected in general nurse training, and the number of graduates from the good schools conducted by the special hospitals is so small, that the standards and schedules which are now prescribed for all schools by means of legislation and official regulations, have been shaped by those who have little understanding of the needs of the great field of nursing of nervous and mental disorders, and of the importance and advantages of maintaining and encouraging the developments which, after years of effort under the most disheartening conditions, had been accomplished in providing a trained personnel for this enormous class of sick persons. The total number of graduates of the two year course since its establishment in 1895, is 163, of which 49 were men and 114 were women.

The three year course, established in 1912, has been steadily improved. The Directress of Nurses has an assistant who specializes in the educational work, and an instructor who devotes her whole time to theoretical and practical instruction and to supervision of students' work. The Hospital has also joined forces with four general hospitals in conducting a Central School where the probationers from all the schools receive their theoretical instruction. The period of training at the New York Hospital has been extended to twelve months, and the instruction and training is steadily improving in precision as well as extent. The first class from this course was graduated in 1917, and the total number of graduates is 24.

In carrying on the educational work of the Hospital, opportunities have been presented for extending the advantages of training and instruction in nervous and mental disorders to students and graduates of general hospital schools. Affiliations have been made with the New York Hospital School, the Mt. Sinai School, and the Army School, and proposals have been received from other schools, which could not be accepted or are still pending. The students from affiliated schools are given a three-months course. We believe that the arrangement is advantageous, both to the Hospital and to the student, though the period is so short that great proficiency is not to be expected. The course for graduates is six months and the benefit to both Hospital and nurses is much greater than in the case of the undergraduates. The number of students admitted from affiliated schools since the course was started in 1914 is 219, and the number of general hospital graduates who have been given instruction is 14.

Since 1919, students from domestic science schools have been received for instruction and training in the dietary department of the Hospital. Some of these students have also been given an opportunity for experience and instruction in the housekeeping and steward's departments. These departments have no special organization for teaching purposes, but the directors and assistants have felt that there were advantages to be gained by both the Hospital and the students, and have entered most heartily and effectively into the plan. The prescribed period of training is three months, though in a few special instances the period was shortened. The number of students received since the course was started in 1919 is 13, and they have come from the Teachers College of Columbia University, the Pratt Institute, the Drexel Institute, and the Y. W. C. A. Institute, New York.

Instruction to nurses and occupational therapists has been given in the departments of occupational therapy since they were estab-

lished. All the courses for nurses include a period of experience and training in these departments. A special course for those who were trained in arts and crafts and wished to use their knowledge in the treatment of disabled soldiers, was given as a war service in 1918. Since then a certain number of similarly qualified students have been received every year, and the departments are now prepared to give a carefully scheduled course of six months. There is, however, no special provision made for teaching purposes in the organization or facilities, and the work, which is considerable, is carried on in connection with the main task of the departments. The record of instruction given in the women's department is not complete for the first few years of its operation. Since 1912, the number who were given instruction in both departments was 322, of whom 280 were nurses, and 42 were occupational therapists.

In the departments of physical education, students are also received. Nurses in training are given an opportunity to get some instruction and experience in the employment of physical exercises, games, and social recreations in the treatment of the sick, and students from the Teachers College and other schools of physical education are employed during the summer months as assistants for the purpose of not only utilizing their services, but interesting them in and informing them concerning this field of work.

Although the need and advantages of educating physicians and medical students in nervous and mental disorders has always been recognized, the Hospital has never been extensively utilized for this purpose. Its location, the class of patients received, and the organization and methods of administration of the Hospital have all operated in creating difficulties. It is, indeed, quite evident that the introduction into the Hospital of groups of students from the medical schools, could not, under present conditions, be successfully undertaken. Notwithstanding this limitation, however, the use of the valuable resources of the Hospital in the education of physicians has been regarded as an obligation which, as far as means permitted, should be performed. Student internes are accepted in the clinical service and in the laboratory during the summer vacation period. Physicians who have just graduated, or completed internships in general hospitals are appointed as medical internes for periods of six months or longer. The staff conferences furnish clinical demonstrations for the instruction of the beginners in psychiatry. The conferences held several times a year for the benefit of the practitioners in the vicinity of the Hospital, have been distinctly educational. It can be plainly seen that, were it not for the demands made upon the senior physicians by the immediate needs of the patients and the medical administration of

STURGIS HALL
WOMEN'S DEPARTMENT OF OCCUPATIONAL THERAPY
Bloomington Hospital

the Hospital, much more than is at present undertaken could be accomplished in the way of systematic instruction of the students and new physicians. In the present state of psychiatric education, even a small contribution of this character would be extremely valuable in advancing psychiatric standards among physicians generally, and in supplying candidates for hospital positions.

The educational work of the Hospital has been undertaken as a means of supplying felt wants in the services, and of adding to the usefulness of the Hospital as a medical and social agency. The general trend in all education is towards precision in all practical and technical branches. If, therefore, as seems desirable, and perhaps necessary for the advancement of the usefulness of the Hospital, educational work is to be continued, definite attention to its development and support would be advisable. A larger income from endowment would be of great advantage to this work.

IMPROVEMENTS IN EQUIPMENT AND PLANT

The two cottages for physicians were completed towards the close of the year. On November 12th ground was broken for the erection of the Staff House for unmarried physicians, and the work is steadily progressing. It is quite apparent that the bright trim and domestic quality of the new buildings will greatly improve the general appearance of the institution, and add to the present beauty of the place, which already reconciles many patients to their stay here. The underground passage for pipes and for traffic in inclement weather has been completed from the Macy Villa to the first cottage. The gymnasium for men has been under construction during the whole of the year and is not yet completed. It is, however, fully enclosed and the work is progressing steadily. Unfortunately, the Rogers fund proved to be not quite sufficient to finish the building according to the original design, and it was necessary to defer the erection of the sitting and recreation rooms at the south end until further funds should become available.

The work of renovating and adding to the toilet and bath facilities of the Hospital, which was started in 1921, has been continued through the year, and twelve more rooms were completed. The total number of rooms thus far completed is 43, and about an equal number remain to be done. The expenditure has been about \$72,000, all of which has been provided from the current income of the Hospital.

A concrete sidewalk was laid along Mamaroneck Avenue from the Hospital gate to the Burke Foundation line at an expense of about \$6,000.00.

The Macy Villa pantry was enlarged, tiled, and completely refitted at a cost of \$2,113.35. A clinic for the medical examination and treatment of ambulatory sick and injured employees, was fitted up. Additional dental, medical, surgical, laboratory and X-ray equipment was furnished. The signal system for summoning the physicians was extended. Some new equipment was added to the laundry and to the kitchen. A portion of the horse stable was made fireproof so as to furnish a garage for the employees. Two pianos, considerable furniture, and two automobiles were purchased, and many other quite important renewals and improvements were made from current income.

NEEDS OF THE HOSPITAL

Each year brings into view some new needs occasioned by wear and tear of the plant and equipment, and by advances in knowledge and standards. Those that are not of too great magnitude are, from time to time, taken up with the Committee, and attended to from current income. During the past year most of the funds from this source, which were not required for ordinary maintenance expenses, and for renewals and additions of urgent importance, have been applied to carrying on the work of renovating and extending the toilet facilities throughout the Hospital. The advantages of continuing this work without interruption until it is completed are so great that it may properly be regarded as a paramount need for the application of funds during the coming year.

Four of the buildings proposed in the programme of construction presented last year have either been completed or are under construction, and plans for a fifth, the gift of Mr. Taylor, are being prepared. The great cost of a Nurses Home as originally planned has prevented this outstanding need from being similarly disposed of. The delay occasioned has, however, not been without advantages. Further consideration of the project has led to the conclusion that the large building which was originally considered to be necessary, would not provide for classification and for a homelike environment as well as a group of smaller buildings, each of which could be erected as a separate unit, at comparatively small expense. It can be plainly seen that a separate Home for the students in training is the most urgently needed. A building that would accommodate twenty-five would be sufficient for immediate needs. These students are young and many of them are away from home for the first time. Special supervision and provision for their social life are desirable, and it is a great advantage to them to be together in a separate group where they can encourage and aid one

another in making adjustments to their strange and not altogether easy duties and contacts, and find a quiet and stimulating environment in which to study. If, then, this unit could be provided in the near future, it would contribute greatly to the success of the School of Nursing, in which the number of students is at present much smaller than is commensurate with the teaching organization and facilities supported by the Hospital, and much below the number required to furnish the trained nursing service needed, and to meet the demands made upon the Hospital for private nurses.

In previous reports the desirability of further extensions of the Hospital plant, and of a psychiatric department in the City, has been discussed. It is realized that a programme of this extent can be carried out only after careful consideration and planning, and that in some particulars, it will have to be shaped with relation to broader projects which may be undertaken by the Society. It seems probable, however, that, owing to increasing realization of the needs, other developments of considerable magnitude in psychiatric provision will soon be made in New York, and the time for extending our own facilities seems to be especially favorable.

FINANCIAL

Although the expenditures of the Hospital were again increased beyond those of the year preceding, it is gratifying to note that there was no diminution in the relief extended to those who were unable to pay wholly or in part for the expense of this treatment. Of the 579 patients under treatment during the year, 44 were treated without charge, and 238 paid less than the average per capita cost. In forty-eight percent of the cases treated, therefore, the expense was borne wholly or in part by the Society at an estimated cost of \$213,228.06. This amount was sufficient to have maintained a daily average of 86 free beds throughout the year. As the policy is to endeavor to restrict this relief to patients from the more educated and socially useful classes, who are suffering from curable forms of disorder, the value of the service to society can scarcely be estimated in monetary terms, but must be much greater than is represented by the amount expended. The number of weeks' board furnished was 14,902, and the average weekly per capita cost was \$47.85.

The total expenditures for ordinary maintenance and the care and treatment of the patients was \$709,145.29. This included the cost of maintaining the properties at White Plains and Oakland Beach, ordinary repairs and renewals, insurance, supplies, medical and nursing service, salaries and wages, and all other running ex-

penses. Capital charges, and the cost of extraordinary renewals and improvements and of extensions for which special appropriations were made are not included. The increase in cost over the year next preceding, amounting to about five per cent, was distributed nearly equally over advances in salaries and wages and in the cost of supplies. The great increase in the cost of the Hospital during the past ten years, amounting to about forty-five per cent, is due not only to the enormous advances in the price of all supplies and in salaries and wages during the period, but also to the great increase in the number of persons employed, occasioned by the shortening of hours, increase in pass time and vacations, a growing liberality in care and compensation during illness, and in the elaboration of the organization for the study and treatment of the patients. Several new departments have been developed, with expensive equipment to be maintained, and skilled directors and assistants, new buildings have been added, recreation grounds have been extended, and a golf course and playing fields added, and the efficiency of the Hospital as a study and treatment agency has been distinctly advanced. It can be plainly seen that further developments will continue to be necessary to adjust the organization and the plant and equipment to the steadily advancing views and standards in dealing with the problem of nervous and mental disorders. The income from charges to patients has increased proportionately with the increase in maintenance, but there has been little change in the income from other sources. If, therefore, the usefulness of the Hospital is to be extended so as to include not only the study and treatment of the patients admitted, but to contribute to the education of personnel and the advancement of knowledge by research, and to participate in the movement for the treatment of nervous and mental disorders in their early stages and for their prevention, the question of finance will require special consideration with a view to furnishing additional funds from endowment.

The income of the John C. Green Memorial Fund, amounting to \$8,949.36 was, in accordance with the terms of the Memorial, applied to the support of eight patients.

GENERAL

The number of visitors to patients during the year was 12,547.

The report of the librarian shows that 385 volumes were added to the general library during the year, of which sixty were donated, and seventy-eight were purchased from the Catherine Jane Pryor bequest. The number of volumes added was 209 greater

than in the preceding year. Thirty-seven volumes were added to the medical library and sixteen to the nurses library. The distribution from the general library was 11,616 volumes, which was 2,818 more than in 1922. The patients received 8,016 of the volumes issued, 3,615 to the men, and 4,401 to the women, and the employees 3,600. The use of the library has thus been extended and the advantage of employing a trained librarian who devotes her full time to the work, and co-operates with the physicians in securing for the patients the advantages of profitable reading, has been demonstrated. Sixty-five copies of popular magazines and forty-seven medical magazines, of which thirteen are in foreign languages, are subscribed for by the Hospital.

Mr. Sturgis, Chairman of the Committee, presented to the Hospital, to be placed in Sturgis Hall, a set of seventy volumes of "The Connoisseur," forty-nine of which were handsomely bound and twenty-one were unbound. Mr. Jennings of the Committee also presented for the same purpose a fine copy of Fox Davies work on The Art of Heraldry, splendidly illustrated. For these and for other gifts to the Hospital and to the Nurses Fund and for entertainments which have been furnished by friends, we are very grateful.

The Medical Inspector of the State Hospital Commission visited and inspected the Hospital on April 23d, August 31st, and November 27th.

The following changes took place in the medical staff during the year:

Dr. Ernest F. Russell, Medical Interne, resigned March 31st.

Dr. James J. Waygood, Assistant Physician, resigned April 30th.

Dr. T. Powell Allen, Medical Interne, reported July 1st and resigned December 31st.

Dr. William Stobbs, appointed Assistant Physician July 11th.

Dr. Marque O. Nelson, Medical Interne, appointed July 15th, and resigned December 31st.

Dr. Samuel W. Hamilton was appointed Assistant Medical Director December 23d.

The usual religious services were held on Sunday afternoons, and we are indebted to the following clergymen for officiating:

Rev. W. L. Caswell, St. Thomas's Church, Mamaroneck, N. Y.

Rev. H. A. Pritchard, St. Mark's Church, Mt. Kisco, N. Y.

Rev. R. C. Ormsbee, St. Bartholomew's Church, White Plains, N. Y.

Rev. C. W. Robinson, Christ Church, Bronxville, N. Y.

Rev. Frank H. Simmonds, Grace Church, White Plains, N. Y.

The Rev. Father Richard J. Keeffe and his assistants, of White

Plains, have, as in past years, been most attentive to the religious interests of the Catholic patients.

The success of the work during the year has, as in the past, been due principally to the remarkably faithful, earnest, and capable service and co-operation of the physicians, nurses, executives, departmental staffs, and employees generally, which is hereby gratefully acknowledged.

The continued interest and generous support of the Bloomington Committee and of your Honorable Board, and the liberality of individual members have been a constant source of encouragement and of assurance for the further advancement of the work.

Respectfully submitted,

WILLIAM L. RUSSELL,
Medical Director.

This last year there has been an increase in the number of applicants for the training school over that of the preceding year, but the number still remains much below what is desired. The course has been improved by increasing the affiliation at the New York Hospital from nine months to a year, thus offering a more varied experience to the student nurses. Many inquiries in reference to the graduate course have been received, which is encouraging and leads one to believe that the trained woman who has had experience in her profession is beginning to recognize the importance

and feel the need of some knowledge of psychiatry. The course affiliated with the New York Hospital, which began five years ago, continues with mutual benefit and satisfaction. It has been a source of regret, however, that more of these students have not availed themselves of the more elaborate graduate course which would equip them more completely for work in the field of psychiatry. As an indication of the growing interest on the part of the public in mental nursing, the following groups of persons have visited the Hospital: The third-year class of the School for Nurses at the Flushing Hospital, a class from Teachers College under the direction of Miss Goodrich, and the class in Sociology from a private school in Tarrytown, and a group of student nurses from the Henry Street Settlement. The various departments of the Hospital were visited, and ample opportunity was given by various members of the staff for an explanation and discussion of the care of mental patients.

In September there was organized in Westchester County a Central School of Nursing, with teaching center at Bloomingdale, this Hospital being the only one with an educational building and all the necessary facilities for carrying on the work. Joining in this larger group are the schools from the White Plains Hospital, the New Rochelle Hospital, the Mount Vernon Hospital, the United Hospital of Rye and Portchester, and the Bloomingdale Hospital. The work has been satisfactorily developed under the direction of Miss Louise Parsons, R. N. This method of instruction has proved very gratifying. The increased number has given life to competition, a desire to excel, and a pride in upholding the standards of the student's own school.

The students of this school were guests at a course of lectures on current events, given during the winter at the United Hospital. Much has been done to add to the social life of the students in the way of theater parties, motor trips, excursions to the beach, etc. Through the generosity of Mr. Howard Townsend it has been made possible to install a radio in the nurses' hall, which affords great pleasure and recreation during leisure hours.

On December 24th occurred the death of Miss Eliza Little, who for many years was the faithful night nurse on Hall 8.

The long felt need for a nurses' residence away from the Hospital atmosphere becomes more urgent each year.

Respectfully submitted,

KATHERINE F. HEARN,
Directress of Nurses.

THE SOCIETY OF THE NEW YORK HOSPITAL. BLOOMINGDALE HOSPITAL, WHITE PLAINS, N. Y.

CAMPBELL COTTAGES FOR CONVALESCENT CHILDREN
GIRLS' SWINGS

ANNUAL REPORT OF THE SUPERINTENDENT OF THE CAMPBELL COTTAGES FOR CONVALESCENT CHILDREN FOR THE YEAR 1923

To the Board of Governors:

GENTLEMEN:—I have the honor of submitting the sixteenth Annual Report of the operations of the Campbell Cottages.

The year 1923, like its predecessors, was one of great activity, notwithstanding the fact that contagious diseases were present during portions of ten months of the year.

More than eleven hundred children were cared for during the past year, the greater part of whom showed very satisfactory results, and although a few of our little ones failed to respond as we could have hoped, others made remarkable recoveries.

While many of the asthma and cardiac cases stand out prominently in the march towards recovery, many other handicapped and discouraged children made equally noteworthy progress.

Our school continues its excellent work, and to this must be added the general educational benefits which our institution offers—the physical, mental and social aspects being presented in forms so attractive that the children recognize their education mainly as pleasures.

One of the great aims of the Cottages is to stimulate and direct the children's interest in their own physical and social welfare. Not the least important feature of this welfare programme is the hope that, through the children, their parents may be reached. Twenty-six hundred visitors to the children came during the year, and many of the parents stated that it was their first visit to any country place in America. Many of the parents being foreign-born, efforts are made to meet as many of them as possible, and to make them understand, as far as possible, the broad purpose and value of the services rendered by the Cottages. The parents also have the opportunity of obtaining information through personal observation, as well as from the staff.

Inspired by confidence, these parents are then more ready to co-operate with those who are endeavoring to give our children a strong foothold on life. Indeed, the effects of the care and various benefits bestowed by such an organization cannot be overestimated.

Students from Teachers College, Columbia University, physicians from other parts of the State, from the West, and also from Canada visited the Cottages to study details of the system in practice.

A memorial tablet has been placed in the new addition to the younger children's cottage, which was the gift of the late Mr. A. D. Juilliard.

REPAIRS AND IMPROVEMENTS

Several important improvements were made necessary as a result of years of wear, and, in one or two instances, for economic reasons. A considerable amount of general repairs also was attended to.

A modern gas range has replaced the coal range in the kitchen. By the new arrangement, the burning of much unnecessary coal has been eliminated, with the added advantage of lessening the intense heat of the kitchen during the summer months. The new arrangement necessitated the installing of radiators.

The porcelain sinks which were installed in the pantry when the Cottages were built, began to show signs of hard usage, and were replaced by Monel metal sinks which were made by the Bloomingdale Hospital tinsmith. It was also necessary to renew the plumbing in the kitchen.

The exterior of the buildings was greatly improved by two coats of paint, this work including the iron fence, the benches, swings and screens. A certain amount of interior painting was done, mainly the cellar storerooms, ceilings and pipes, and the whitewashing of the cellar walls.

The isolation cottage received a considerable amount of attention. The exterior was stuccoed, and both the exterior and interior woodwork was painted. Larger radiators were installed, the steam pipes under the cottage were recovered with asbestos, and new doors and storm doors replaced the originals which had been single and of very light weight.

New cement walks in front of the Cottages have replaced the old walks which had become cracked and sunken, and no longer safe.

Considerable other repairs of a general nature were made, and the Cottages are in excellent condition.

Christmas was, as usual, the occasion of much noisy joy on the part of the children, all of whom were generously remembered by kind friends of the Cottages.

The Chamber of Commerce, in the persons of Santa Claus and his staff, made a most welcome visit, bringing a bag of surprise gifts for each child. The little children will never forget the personal visit of Santa Claus.

The White Plains Order of Elks also had our needy children in mind, and delighted the girls and boys with generous gifts of clothing, fruit and toys.

The children, more than willing to do their part, gave a very attractive little play and entertainment, to which numerous enthusiastic girls and boys contributed.

On behalf of our children, it affords us sincere pleasure to thank the many kind friends who remember that Christmas is the children's great day, and to express our grateful appreciation of the many other kindnesses shown to them throughout the year.

I am glad to take advantage of this opportunity to thank the nurses, their assistants and the general staff for their willing and unselfish co-operation in maintaining the high standard of the Cottages.

Our hearty thanks are tendered also to the Social Service Department, whose earnest co-operation smooths the way over many difficult places, and whose friendly assistance is so cheerfully given.

To the Board of Governors and the Bloomingdale Committee I offer my deep appreciation of their great interest and support, which makes possible a very great measure of our success.

Respectfully submitted,

ALICE C. ELLISON,

Superintendent.

CAMPBELL COTTAGES FOR CONVALESCENT CHILDREN

DONATIONS FOR 1923

Mr. Edward W. Sheldon.....	\$100.00 for Christmas.
Mr. Frank K. Sturgis.....	\$10.00 for Christmas.
Mr. Howard Townsend.....	\$10.00 for Christmas.

TO THE LEGISLATURE OF THE
STATE OF NEW YORK

The Governors of the Society of the New York
Hospital respectfully present their 153rd Annual
Report of the state of the institutions under
their charge for the year 1924.

THE PRESENT NEW YORK HOSPITAL
WEST FIFTEENTH STREET FRONT
Completed 1877

ANNUAL REPORT
OF THE
GOVERNORS OF THE SOCIETY OF THE NEW YORK
HOSPITAL FOR THE YEAR 1924

In conformity with the provisions of its Charter, granted by Royal authority June 13, 1771, in the reign of King George III, the Governors of The Society of the New York Hospital present their annual report and a statement showing the receipts and expenditures for the year 1924 of the several institutions under their control and management, as follows:

The General Hospital, at Fifteenth and Sixteenth Streets, New York, the Department for the Treatment of Mental Diseases, known as Bloomingdale Hospital, at White Plains, Westchester County, and the Cottages for Convalescent Children, at White Plains.

The constantly increasing activities of all of these institutions have been marked. Many additions and improvements have been undertaken. The pressure for space in the various departments continues, and cannot be relieved until new hospital buildings are obtained. Progress to that most desirable end has been made, and definite results are looked for.

Operating expenses reached \$584,733.01 in 1924, an increase of \$5,861.50 over 1923. On the other hand the operating receipts mounted from \$459,624.35 to \$477,459.18, an increase of \$17,834.83 over the preceding year, and leaving an operating deficit for the year of \$107,273.83. The Superintendent's report sets forth in detail the results involved in these figures and in tabulated comparisons with previous years.

The accompanying report of the Medical Board dwells particularly on the important use of the Hospital for the teaching of medical students and of physicians, on the enlargement of the follow-up work which the Hospital conducts with the aid of the Social Service Department, and on the reorganization of the Department of Radiology.

The separate report of the Department of Urology shows the amplification and continued success of the valuable work which that Department performs. Special mention is made of the significant advances made in cystoscopy and regional anæsthesia.

The varied research pursued by the professional staffs of the Hospital is summarized in the lists of their publications during the year.

The Social Service Department has shared in a notable way the growing Hospital activities. Some account of the work of the Department, as well as of its affiliated institution, the Night and Day Nursery, is set forth in the accompanying report.

The development of Bloomingdale Hospital, which was noted in last year's report, has continued with gratifying results. The two doctors' cottages given by Mr. Payne Whitney are occupied by two members of the staff with their respective families. The Staff House, also given by Mr. Whitney, is about completed and will soon be ready for occupation. The Women's Recreational Building, for which Mr. Henry R. Taylor gave us last year \$50,000, to which he has now added \$50,000 more, has been in active construction and is expected to be finished during the present year. The new Rogers Men's Gymnasium is now used daily, and has proved a valuable addition to our equipment. On the educational and humanitarian side, the report of Dr. William L. Russell, the Medical Director, is of deep interest, and shows the important part in psychiatry which the institution has been playing, and of the stimulating possibilities of future development.

Since the last annual report of the Society the following special gifts have been received:

The generous "Friend" who gave us \$15,000 each in 1921, 1922, and 1923 for application to the current wants of the Hospital, repeated this gift in 1924, and the money is in process of expenditure in meeting special urgent needs of the General Hospital.

The Insulin Committee repeated its gift of \$1,000 for the use of that remedy by patients who are unable to pay for it.

Mr. William G. De Witt gave \$5,000 to endow a bed in memory of his brother, the late Theodore De Witt.

Miss Lena Cadwalader Evans gave \$5,000 to endow a bed in memory of her grandfather, Israel Corse, a former Governor of the Hospital, and of his daughter, Lena Burr Corse Evans.

Mr. Henry R. Taylor gave a second \$50,000 for the construction of the Women's Recreational Building at Bloomingdale Hospital, and

One hundred and four contributors gave a total of \$4,080 for the expenses of the Urological Department.

Of the legacies reported in previous annual reports the following have been received:

Under the will of Charles E. Rhinelander, \$2,500, making a total to date from that legacy of \$25,000.

Under the will of James Buchanan Brady, \$15,000, making a total received to date of \$691,777.92.

Under the will of Emily F. Southmayd, \$65,000, making a total received to date of \$90,000.

Under the will of John H. Flagler, \$28,625, making a total received to date of \$130,603.27.

Under the will of John Augustus Rogers, \$21.53, making a total received to date of \$174,327.15.

Among other gifts we have received \$5,000 from Mrs. Charles F. Woerishoffer; \$2,700 from Mr. Robert W. Kelley; \$2,500 from Mr. Edwin Gould; \$1,000 from Mr. Walter Jennings; \$500 from Mr. and Mrs. John H. Whitehouse, and \$500 from Mr. Clarence L. Hay.

During the year we have lost by death Dr. Samuel B. Lyon, Medical Superintendent Emeritus of Bloomingdale Hospital, who was its Assistant Medical Superintendent from 1886 to 1890, and its active Medical Superintendent from 1890 to 1911.

Mr. George P. Ludlam, Superintendent of the New York Hospital from 1877 to 1909, and Superintendent Emeritus since 1909, has also died.

Attention is called to the accompanying reports describing the work of the various departments.

EDWARD W. SHELDON,
President.

G. HOWARD WISE,
Secretary.

March 4, 1925.

THE SOCIETY OF THE NEW YORK HOSPITAL.

STATEMENT OF INCOME FOR THE YEAR 1924.

RENTS, INTEREST, ETC.:

Ground Rents, Fifth Ward (Duane, Thomas and Worth Streets).....	\$122,350.00

REPORT OF THE SUPERINTENDENT OF THE NEW YORK HOSPITAL FOR THE YEAR 1924

To the Board of Governors:

GENTLEMEN:—I respectfully submit the Superintendent's report for the year 1924.

The statistical data attached furnish detailed information regarding the various activities of the Hospital during the year.

The total expenditures in 1924, not including the Brady Urological Department, were \$584,733.01 against \$578,871.51 in 1923. This was an increase of \$5,861.50. It was more than offset by an increase in receipts of \$17,834.83.

During the year \$97,780.50 was paid to special nurses for caring for patients in the private pavilion, but as the Hospital is at once reimbursed by the patients or their friends, this sum is not included as part of the Hospital expenses.

The year's operating receipts were \$477,459.18, leaving an operating deficit of \$107,273.83.

Owing to an increase in the number of pupil nurses it was not necessary to employ as many graduate nurses as in preceding years, and a saving of \$3,957.21 was made in the pay roll of this department.

Provisions cost \$115,566.67, an increase of \$3,486.67. Household expenses were \$37,105.60, an increase of \$3,805.60. The increased expenditure for provisions was for the purpose of making the Hospital menus more attractive to patients and employes. The Hospital recently placed its culinary department in charge of a high-class hotel chef-steward and it is hoped that permanent improvement will follow.

Coal cost about \$8,500.00 less than last year. This was due first, to decrease in price and, second, to the use of a cheaper grade, No. 2 buckwheat instead of No. 1 buckwheat. The number of long tons consumed was 4,958 against 5,020 in 1923.

The cost of the ward service was \$301,391.05. In 1923 it was \$297,105.92 and in 1922, \$283,746.53.

The emergency service cost \$30,978.32, contrasted with \$29,727.95 in 1923. There were 4,793 patients treated in this department.

The Private Pavilion service cost \$179,623.90, as against \$178,-327.22 in 1923. The cost per day for each patient cared for in this department was \$9.66, and in 1923 it was \$9.20.

RECEIPTS AND EXPENSES

The appended table shows the receipts and cost of the wards and emergency department and the private rooms from 1905 to date. Operating room, X-ray and miscellaneous receipts are not included.

WARDS AND EMERGENCY DEPARTMENT

<i>Year</i>	<i>Cost</i>	<i>Receipts</i>
1905	\$154,919.61	\$20,219.06
1906	179,004.76	22,101.00
1907	204,080.49	20,272.50
1908	209,112.39	21,043.00
1909	207,836.16	18,328.47

1923	13,615	110,447	41,897	73,810.42	42,390.00
1924	14,709	123,318	46,662	72,739.74	53,565.86

THE PRESENT NEW YORK HOSPITAL
WEST SIXTEENTH STREET FRONT

PAY ROLL

Expenditures on account of salaries and wages continue to increase. This increase is due in part to expanding activities on the part of the Hospital, and in part to larger salaries paid to professional and technical workers. The 1924 pay roll was as follows:

Hospital.....	\$254,947.86
Pathological Department.....	23,777.46
Immunology Department.....	19,141.40
Urological Department.....	17,620.93

\$315,487.65

In 1924 wages represented 51 per cent of the total expenses whereas in 1917, before the war, wages represented 37 per cent of the total expenses.

OPERATING EXPENSES AND RECEIPTS

(Nineteen-Year Record)

Year	Operating Expenses	Operating Receipts	Excess of Expenses Over Receipts	Hospital Days	Persons Fed Daily	Per Capita Cost of Food Supplies
1906	\$234,151.03	\$79,177.57	\$154,976.46	74,513	439	.3937
1907	260,983.72	76,188.47	184,795.25	75,506	464	.4772

IMPROVEMENTS AND REPAIRS

Renewal of plumbing in the bathrooms of houses No. 13 and 15 West Sixteenth Street cost about \$500.00.

The worn-out dishwashing machines in the private patient kitchen and in the nurses' pantry were replaced with new ones.

Owing to a decision to burn a cheaper grade of coal it became necessary to install two wing blowers under the boilers. This was done at an expense of \$531.00. A considerable saving in coal has

been effected. Over \$1700.00 was spent in repairing furnaces of the three boilers.

A modern fracture table for the surgical services cost \$450.00, and an operating light \$125.00.

A new control board, replacing a worn-out one in the laboratory elevator, was installed at a cost of \$1050.00.

Thirty reading lamps were purchased for the nurses' rooms.

A new anesthesia apparatus, designed with especial reference to the administration of the new anesthesia, Ethylene, was purchased for the public operating room at a cost of \$220.00.

Two daylight screens and a lantern were purchased for the surgical divisions at a cost of about \$200.00.

A spirometer, used for the determination of basal metabolism, was purchased to replace a worn-out one.

Fireproof doors in the engine room cost \$235.00.

In order to provide more room for workers in the laboratory, two rooms, each 10 x 12 feet, were constructed in the old air shaft of the laboratory building at a cost of \$2100.00.

A new gas range was purchased for the diet kitchen.

New plumbing, shower baths and tile floors were installed in the bathrooms of the interns' residence.

A two-story structure was built in the air shaft between the private patient pavilion and the interns' residence at a cost of \$3500.00. The first floor provides additional space for the Brady Urological Department cystoscopic clinic. The second floor furnished much needed room for the nurses' pantry. The cystoscopic room was divided into four small rooms and a tile floor laid at an expense of \$1100.00.

A new six-inch line from the pressure tank to the two hydraulic elevators in the Hospital building cost \$1390.00.

Several hundred dollars were expended in providing safeguards against fire.

A Hobart mixer and an ice-cream freezer were purchased for the diet kitchen.

A new lantern slide cabinet cost \$175.00.

Steel filing cabinets were obtained for the workmen's compensation, the social service and the nursing departments.

New drawer files for the out-patient department were purchased at a cost of \$271.00.

The food warming tables in the wards were changed from gas to steam heat at a cost of about \$500.00, and seven food carts for tray service were purchased.

An Alpine sun lamp, for treating tubercular conditions, was purchased.

WORKMEN'S COMPENSATION DEPARTMENT

Owing to congestion in the dispensary it was found necessary to transfer the Workmen's Compensation Department to the Fifteenth Street building and to place it in charge of the admitting physicians. This work is constantly increasing and during the past year 12,939 cases were treated. Of this number 9,351 were re-dressings and 3,488 were new cases. In addition to these 212 patients were admitted to the surgical wards for further treatment. The income of the department was \$29,589.85.

THE USE OF ILETIN IN DIABETES

The Committee formed in 1923 to collect and administer a fund to help deserving persons suffering from diabetes pay for iletin, continues to function. In 1924 it contributed to patients under treatment here \$1,000. During the year 807,500 units of iletin were purchased by the hospital at a cost of \$7,253.49. A large part of this was sold to patients at cost.

HOSPITAL BUREAU OF STANDARDS AND SUPPLIES

The Hospital Bureau of Standards and Supplies, in which this hospital retains its membership, continues to function most satisfactorily. It now has a membership of about seventy. Purchases made through the Bureau in 1924 amounted to nearly four million dollars. In purchasing supplies, outside of regular contracts, amounting to approximately \$425,000, orders were placed with 935 different suppliers.

HYDRIATIC DEPARTMENT

In the Hydriatic Department 458 patients received 1,970 treatments.

DENTAL DEPARTMENT

The number of patients treated in this department during the year was 3,128. There were 2,109 extractions; 420 surgical dressings; 347 radiographic readings (full sets of ten films); 313 silver fillings; 218 prophylaxis; 28 operations for impacted teeth; 14 fractures; 12 pericoronal infection; 3 supernumeraries; 2 trench mouth (Vincent's).

MR. GEORGE P. LUDLAM

Mr. George P. Ludlam, Superintendent of the Hospital from September 30, 1877, to May 1, 1909, and Superintendent Emeritus thereafter, died suddenly April 14, 1924. During all these years Mr. Ludlam had occupied a prominent place in the hospital field and was highly regarded by hospital workers throughout the country. To the end he maintained interest in this Hospital and its activities. He was a man of fine character and unusual ability and will be long pleasantly remembered.

CHANGE IN THE DIETARY DEPARTMENT

Miss M. Abbie Robinson, R. N., who had been supervisor of the dietary department for about two years, resigned November 1st. Miss Robinson had worked faithfully to improve the department. On her resignation it was decided, in view of the importance of the proper preparation of food, to appoint a thoroughly trained hotel chef as chef-steward. Henry Denzler, who was trained in Switzerland and who had been chef of several high-class hotels and clubs in this country, was selected for the position. Mr. Denzler has charge of both kitchens, butcher shop and all dining-rooms.

EXECUTIVE STAFF CHANGES

Doctor W. W. Belden was appointed Director of the Department of Radiology, succeeding Doctor Archibald H. Busby, whose resignation took effect December 31, 1923. Doctor Belden is on full-time service.

Doctor John A. Colucci, admitting physician, resigned November 30th after several years most satisfactory service, and was succeeded by Doctor Roger S. Palmer, who completed his service as house surgeon on the First Surgical Division July 1st.

Miss Constance Manchester, assistant cashier, after two years of faithful service, resigned November 1st.

ACKNOWLEDGMENTS

Mrs. Walter Jennings presented a table for the nurses' reception room.

Mr. Edward W. Sheldon contributed \$100.00; Mr. Augustine J. Smith, \$250.00; Mr. William G. DeWitt, \$50.00 and Mrs. Waldron P. Brown, \$20.00 toward the Christmas festivities.

A PNEUMONIA CONVALESCENT, CHILDREN'S WARD,
THE NEW YORK HOSPITAL

The Haven Relief Fund Society made a contribution of \$150.00. A detailed report of the disbursements was rendered to the officials of the Society.

Sunday song services were conducted by the Business Women's Council of the Billy Sunday Campaign. This organization has been providing music every Sunday afternoon for the ward patients for many years and their efforts are much appreciated. At Christmas time they presented the patients and employes with candy and handkerchiefs.

Numerous donations of flowers, toys, books and magazines were received and duly acknowledged.

For Financial and other statistics see Statistical Report between pages 30 and 31.

Respectfully submitted,

THOMAS HOWELL,

Superintendent.

REPORT OF THE MEDICAL BOARD OF THE NEW YORK HOSPITAL FOR THE YEAR ENDING DECEMBER 31, 1924

To the Board of Governors:

GENTLEMEN:—The Medical Board of the Hospital reports another year of customary activity.

The teaching of medical students of Cornell Medical College has continued as heretofore. All of the third and fourth year students receive instruction in the medical and surgical wards of the First Division and demonstrations in the Department of Pathology and in fluoroscopy. They also attend amphitheatre clinics and are offered electives and courses in minor surgery in the Dispensary. For all of this instruction the classes are subdivided into small groups so as to profit by individual teaching.

Clinics for physicians are given frequently. Three or four rather informal clinics in medicine are held every month on Friday afternoons in the library and also there have been several more formal clinics in the amphitheatre.

Almost every day the operations in the amphitheatre are announced in the bulletins issued by the Academy of Medicine and they are attended by surgeons of the city and those from elsewhere who have come to New York for the purpose of observation and study.

The final examination in Medicine of the National Board of Medical Examiners was held at the Hospital in July.

The "follow up" work is becoming more thorough and more helpful. After patients are discharged from the Hospital an effort is made to communicate with them from time to time and to have them report to the Hospital for examination. In this way information is obtained as to the late results of the Hospital treatment and the patients also profit by further advice at these visits. This contact is extended over months, or in some cases for years. It is very instructive to the Hospital physicians and surgeons and seems to be appreciated by the patients. The Social Service Department is invaluable in helping to find the patients when they are wanted as, of course, it frequently happens that they will have moved from

the address given at the time of their discharge from the Hospital. Through the efficient working of this department it has been possible to find almost all of the patients about whom information is wanted.

A separate report for the Department of Urology has been submitted, and is appended hereto.

REPORT OF THE DEPARTMENT OF UROLOGY

(James Buchanan Brady Foundation)

The Department of Urology has just completed its fourth year. Four new cystoscopic rooms have been constructed during the year. Each room is a complete unit in itself, being thoroughly equipped with X-ray, fulguration, rheostat and other necessary devices, so that any urological procedure, including pyelography, may be accomplished on the same table, with no inconvenience to the patient.

The importance of cystoscopy is indicated by the number of examinations made annually. During the past year—November 1, 1923, to November 1, 1924—there have been:

885 private cases by members of the Staff
936 Clinic cases
176 cases from Urological service
131 cases from other services
97 cases in the Female Clinic
43 cases in Cancer Clinic
31 cases in Children's Clinic (207 treatments)
302 Pyelographies
583 X-ray examinations
46 cases in return clinic

The work in the Out-Patient service of the Urological Department is being done under adverse circumstances, due to the marked limitation of space. This is being corrected by a slight expansion of quarters and a rearrangement of the space assigned. It is proposed to divide the space into small cubicles so that the patients may have the benefit of privacy, which is essential in the treatment of urological cases.

The members of the Urological Staff are pioneers in the utilization of regional anaesthesia for operations upon kidney, prostate, bladder and urethra. The following cases have been operated upon by this anaesthesia with excellent results:

<i>Under Regional Anaesthesia</i>		<i>Operations</i>		<i>Under Gas-Oxygen</i>	
Suprapubic.....	69	Kidney Operations.....	7	Suprapubic Cystotomy.....	2
Perineal Prostatectomy.....	50	Suprapubic Prostatectomy.....	1	Urethra.....	6
Kidney Operations.....	26	Miscellaneous.....	30		
Urethra.....	14				
Suprapubic Prostatectomy.....	2				
Seminal Vesiculectomy.....	1				
Miscellaneous Operations.....	15				
Total number under Regional anaesthesia.....	177	Total number under Gas- Oxygen.....	46		

<i>Ether</i>		<i>Colonic Anaesthesia</i>		<i>Total Operations</i>	
Urethra.....	22	Herniotomy.....	1	Regional Anaesthesia .	177
Miscellaneous.....	2	Cystotomy.....	1	Gas-Oxygen.....	46
		Orchidectomy.....	1	Ether.....	24
				Colonic Anaesthesia...	3
Total number under ether.....	24	Total number under Co- lonic Anaesthesia.....	3		250

The Department of Radiology has been reorganized in recognition of its increasing usefulness and the great expansion of the volume of its work. The position of Director of this department was left vacant by the resignation of Doctor Busby in the preceding year. Doctor W. W. Belden has been appointed to fill this vacancy. Doctor Belden devotes the whole day to the work of the department. As a result it is possible to make the X-ray examinations much more thorough and to obtain reports more promptly. The helpfulness of the department has been enhanced by this step.

Following is a list of the publications during 1924, by members of the professional staff of the Hospital:

- DR. THEO. B. BARRINGER, JR.: "Effect of Auricular Fibrillation on Functional Ability of the Heart." *Journal of the American Medical Association*, February 16, 1924, LXXXII.
- DR. ALICE R. BERNHEIM: "The Icterus Index (A Quantitative Estimation of Bilirubinemia): an aid to diagnosis and prognosis." *Journal American Medical Association*, 1924, LXXXII, p. 291.

REPORT OF THE TRAINING SCHOOL FOR NURSES FOR THE YEAR 1924

To the Board of Governors of the New York Hospital:

GENTLEMEN:—I beg to submit the forty-seventh annual report of the School of Nursing.

The closing year registers the following staff on duty in the Hospital:

Directress.....	1
Assistant Directress.....	1
Instructor.....	1
Night Supervisor.....	1
Supervisor, Out-Patient Department.....	1
Supervisor, Private Patients' Pavilion.....	1
Charge Nurses, Surg. and Med. Divisions of Hospital Wards.....	9
Charge Nurse, Children's Wards.....	1
Charge Nurse, Admission Wards.....	1
Charge Nurses, Floors of Private Patients' Pavilion.....	3
Operating Room Staff.....	5
Staff, Brady Urological Department.....	7
Total Number.....	32

The number of students in the School is as follows:

GRADUATING CLASS OF 1924

Remaining for completion of time.....	1
---------------------------------------	---

SENIOR CLASS, 1925

Number reported last year.....	30
Disqualified.....	1
Remaining.....	29

INTERMEDIATE CLASS, 1926

Number reported last year.....	26
Resigned.....	2
Disqualified.....	1
Remaining.....	23

JUNIOR CLASS, 1927

Entered 31; resigned 2; remaining.....	29
--	----

Affiliated Pupils:

French Hospital School of Nursing.....	2	
Bloomngdale Hospital.....	6	
White Plains Hospital.....	3	11
Total Number of Students.....	93	
Graduate Nurses on General Duty.....	11	
Total.....	104	

Inasmuch as the work of the wards has been gradually becoming more and more complicated in its detail, permission has been granted to appoint a head nurse in charge of each ward to replace the supervisors who were responsible for an entire division of service, which comprises two wards. This arrangements should not only insure higher efficiency of service, but should afford more personal supervision to the students.

It was in June of this year that the first group of our students entered upon the four months affiliation for visiting nurse service in the Henry Street Settlement. It is unnecessary for me to comment on this well organized service, but I shall just mention that our students who have completed this undergraduate course are most appreciative of the insight that they have obtained of the value of the care of the sick in their homes. Also, in November, two students entered our Social Service Department and followed through a most comprehensive and instructive program of lectures, conferences, and excursions to numerous organizations in and about the city. The students were most enthusiastic and interested in the information and experience obtained during their three months' service in this department, and we herewith express their appreciation and thanks to the Social Service Committee who made it possible for Miss Josephi to carry into effect her well organized and carefully thought out plan of instruction.

It will be of interest to note that during the past year in addition to these first two students who are finishing their three months' service in the Social Service Department, five students have completed the four months' visiting nurse service at Henry Street Settlement; thirteen, three months' service in communicable diseases at Willard Parker Hospital; and twenty-two, three months' service in nervous and mental diseases at Bloomingdale. We consider our school most fortunate in having this broadened vision of nursing activities and the students themselves consider it an opportunity to be allowed to elect the services in which they are interested.

Our doors have been open to other schools for a limited number of students requiring the services we are able to offer. The stu-

dents in the registered course at Bloomingdale Hospital have always obtained nine months of general service in our hospital wards. Since last September, however, this time has been extended to twelve months, and during the past year four students have been enrolled; in addition to these, twelve from the French Hospital have affiliated for three months' pediatric service; five from White Plains Hospital for three months in pediatric and three months in medical service; and during the summer months four from Telfair Hospital for Women and Children in Atlanta, Georgia, for three months' practical experience in the male medical and surgical wards; also the Lebanon Hospital, New York City, has sent eleven students for one month's practical instruction in nutrition in the Diet Kitchen. To sum up: thirty-six students entered our hospital for theoretical and practical instruction in the various services mentioned above, and forty-two of our students have affiliated with outside organizations in addition to the twenty-five who have obtained obstetrical training.

There has been comparatively little illness among the students this year, and in addition to those who have been cared for in the Nurses' Home for minor ailments of short durations, the room assigned to the nurses in the Private Patients' Building has only been occupied by students for 185 days and 431 days by graduates.

We report with regret the deaths of six of our graduates this year.

Susie M. Armstrong, Class 1903, died in March
Prudence Denniston, Class 1880, died in October
Mrs. H. Ettling, née A. C. Catel, Class 1880, died in March
Alma Vedin, Class 1892, died in November
Fannie E. Coggeshall, Class 1892, died in December
Mrs. H. T. Perry, née Marie A. Vreeland, Class 1893, died
in December

On the evening of March 12th the forty-seventh anniversary graduation exercises were held in the Administration Building. The president, Mr. Edward W. Sheldon, presided. After the invocation, the address to the graduating class was made by the Reverend Karl Reiland, D.D., rector of St. George's Church, who warned the nurses against treating the patient as a case, but always considering her as an individual responsive to care and kindness. We feel sure that Dr. Reiland's kindly advice and encouragement made a significant impression. The president addressed the class and presented the diplomas and gold badges. At the close of the exercises the guests were entertained at supper, followed by dancing in the Nurses' Residence.

We are still looking forward to the time when we shall be able to offer a more comfortable home life to our nurses and better classroom facilities for their instruction. I wish to avail myself of this opportunity to express my appreciation of the faithful services rendered by the nursing staff and the cheerful helpfulness of the student body. To the Board of Governors, the Superintendent of the Hospital, the Medical Board, we wish to express our deep appreciation of their hearty cooperation.

Respectfully submitted,

M. H. JORDAN,

Directress of Nurses.

MRS. R. HORACE GALLATIN,

Treasurer.

REPORT OF THE SOCIAL SERVICE COMMITTEE, NEW YORK HOSPITAL, 1924

To the President and Governors of the New York Hospital:

GENTLEMEN:—The Committee takes pride and pleasure in presenting, along with its financial statement, its twelfth Annual Report. This report continues to show the steady and persistent growth of Social Service work in the New York Hospital.

Further expansion of activities already under way; the undertaking of new work; and the growth of all branches, attest to the conscientious and untiring effort on the part of the nurses and the members of the Committee who have assisted in this work.

Among the new work undertaken in 1924 was that of the "Sewing and Supply Committee," of which Mrs. J. Morley Hitzrot is chairman, and Mrs. Charles E. Farr, Secretary and Treasurer.

Owing to the increased cost of maintaining the New York Hospital, this Committee volunteered to attend to the needs of the Children's Ward. The Hospital donates the material and the Committee makes the garments required in the ward. This step has met with the approval of the President and Governors of the Hospital, and of Dr. Howell and Miss Jordan.

As a result of a decision in 1923 to give student nurses the option of three months' study in Hospital Social Service endeavor, a number of them have been entered in this course.

The first nurses of this group began studying with the Social Service Department on November 1st, and from that time have displayed great interest in the work. Visits have been made to Campbell Cottages, Burke Foundation, Child Welfare Bureau, Children's Court, A. I. C. P., C. O. S., Ellis Island, Randall's Island, and other places of interest. Not only have instructions been given at these places and the lectures well attended, but the doctors of our own clinics and outside organizations have shown unusual willingness to instruct and assist these students.

Each year we are able to report greater development towards preventing breakdowns in our patients and their families, coupled with constructive efforts to round out health standards.

Our growth in this preventive work has been slow but steady, and shows a gradual increase. This work, started in 1923 by volunteer help, proved so successful that in 1924 Mrs. Treadwell and her Committee secured a full-time paid worker. The Margaret

Louisa Branch of the Y. W. C. A. has given us valuable assistance by allowing the use of their Club Room three times a week. A further increase in this important branch of the work is expected during 1925.

As a result of the Fair held by Mrs. Payne Whitney at her home in Manhasset early in June, the Milk Fund has increased by \$3,396.86. The 1924 distribution of milk increased approximately 1,000 quarts over the total of 1923, and reached 17,979 quarts.

Miss Elizabeth Ruhl made us 35 layettes during the year, continuing her very useful work in memory of Mrs. Frank Sturgis.

During the year, a number of improvements were made in our library. New volumes were added, so that there are now more than 1,200 books in 14 languages available. An additional improvement, for which we are largely indebted to Miss Lucile Lockwood, was the cataloguing of this library.

Our Thanksgiving and Christmas distribution was even more successful than it has been in past years. At Thanksgiving, our Committee furnished 106 baskets; Mrs. Kenneth O'Brien gave 3 more. At Christmas, our Committee furnished 117 baskets; Mrs. Kenneth O'Brien 3, and Mr. Vincent Astor 25, making 145 in all. The Margaret Louisa Home again was kind enough to allow the use of their large Club Room for our 3 Christmas parties, at which we handled more than 400 children.

About 1,000 children, a record-breaking number, were sent to the Campbell Cottages and Fresh Air Homes during the summer. For the year, 1603 children were sent to the Campbell Cottages and other convalescent and fresh air homes. Of this number, Campbell Cottages cared for 972.

An exceptionally valuable contribution to the summer work was that of Mrs. C. L. Hay, who gave a cottage and its up-keep at her home in Newbury, N. H., for the use of 10 undernourished children for six weeks. Mrs. Hay also paid the salary of Miss Elizabeth Parker, who gave the children the best of care. Not only did these children gain while at the cottage, but they have continued to improve since their return.

Last April, Mrs. Arthur Iselin and Mrs. Hubbell arranged that one-third the proceeds of a performance given by Mrs. Hubbell's dancing class be given the Social Service for the Children's Fund. This amounted to more than \$214.42

Mrs. Payne Whitney's opera box was sold for a performance.

Mrs. Haven allowed the use of her house for a Mah-Jong and Bridge, which netted the department \$535. The balance of the funds were met by those who answered the appeals sent out by our treasurer, Mrs. Gallatin.

The Committee has found the film "The Watchful Eye" very useful in its educational work. Another copy has been made and sent to the Pacific Coast at the request of the Social Service Department of the Stamford Clinics at San Francisco. It has been shown several times, both in San Francisco and in Los Angeles.

At the Bellevue Social Service, our copy has been shown to student nurses. It was also shown at Larchmont before 500 people, through the interest of Mrs. James Kent. In the Spring of 1924, it was part of our exhibit at the "Child's Health Exhibit" at Greenwich House. It has been displayed at our dispensary in connection with a short film from Colgate & Company.

Mrs. Allien, as Chairman of the Home Economics Committee, has continued her excellent work. There have been 11 group meetings with speakers. She provided an afternoon at Van Cortlandt Park, and Mrs. Jennings entertained the group at her home in Cold Spring Harbor.

During the year, there have been several changes in the sub-committees: Mrs. John Vietor was made chairman of the New York Hospital Nursery. The Nursery continues its excellent work by promptly providing shelter for very young children. The report of the Chairman of the Nursery follows: Mrs. W. B. Dickerman was made chairman of the Playground. Mrs. Graham was appointed to represent us on a committee appointed to aid the Social Service work of the Willard Parker Hospital.

We wish to thank Miss Josephi and the other nurses for their patient, careful, and sympathetic effort, as the burden of this work rests largely on them.

No report for the past year would be complete without mentioning the efforts of such faithful volunteers as Miss May Hoppin, Miss Alice Wheelock, Miss Anna Morgan, and Mrs. John Dick Gardiner.

Miss Ellison, as in former years, has given every assistance, and by her cooperation, the facilities of the Campbell Convalescent Cottages have been used to the greatest advantage. We also wish to express our thanks to the Fresh Air Homes and the many organizations that have aided us through the year.

The Chairman begs to thank the members for their zeal, inspiration and faithful service, and the Committee as a whole begs to thank the Governors of the Hospital for their indulgence and cooperation.

Respectfully submitted,

JULIA POST SMITH,

*First Vice-Chairman Social Service Committee,
New York Hospital.*

REPORT OF DAY AND NIGHT NURSERY FOR 1924

The year at the Nursery has been much more active in many ways than the preceding one. We admitted 101 children during the year, one less than in 1923. However, much more professional and nursing care was needed as eight cases of contagion developed: one of mumps, four of measles, and three of whooping cough. Three cases of whooping cough were referred to the Riverside Hospital, while the remaining contagious cases were cared for at the Nursery. In spite of this the results for the year were extremely satisfactory, the children improving greatly during their stay of from three to six weeks. One child remained throughout the entire year.

Those who remained more than a few days were able to benefit and made normal gains in weight and improved noticeably in a general way. One healthy infant (P. M.), four weeks old, who weighed six pounds six ounces on admission, was discharged weighing nine pounds ten ounces after nine weeks. Several babies presented feeding problems, noticeably (M. F.). She was a delicate six and one-half pound baby, six weeks old, on admission but she reached eight and three-quarter pounds in three months' time and left the nursery in good condition.

With the cooperation of the parents our attending physician, Doctor William R. May, hopes to extend the usefulness of the Nursery during the coming year by testing the children for susceptibility to diphtheria and scarlet fever and, where necessary, to immunize them against diphtheria and also to vaccinate them against smallpox. The Committee greatly appreciates Doctor May's interest and help.

There is no question but that the Nursery meets a real need, as is shown by the numerous expressions of appreciation on the part of the parents.

The Committee, while satisfied with what it has been able to accomplish so far, is impressed by the ever-increasing needs of the Nursery. There is a constant demand for repairs and painting which makes serious inroads on our annual budget. In order to meet the budget several entertainments have been given during the year and proceeds derived from these along with generous contributions have enabled us to carry on successfully.

Respectfully submitted,

ELEANORE W. VIETOR,

Chairman.

Average number on visit during year.....	8	4	12	16	20	36	48

The average daily number under treatment in the Hospital during the year was slightly less than in 1923, but the total number of patients treated was considerably greater. The number admitted was 23 more than in the previous year, and the number discharged 16 more. The total number treated was 285 men and 312 women, making in all 597, which was 18 more than in 1923, and considerably

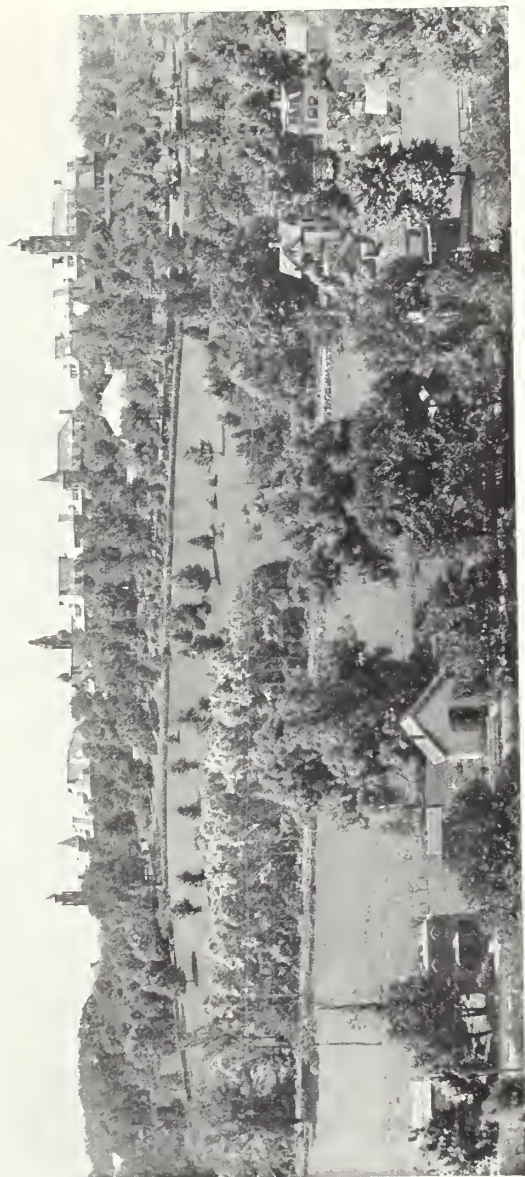

more than twice the average daily number in the Hospital throughout the year. The number of applications received was 614, from which 290 were accepted.

ADMISSIONS

The character of the cases admitted was not materially different from the previous year. The number admitted was 290, of which 135 were men and 155 were women. Thirty were admitted more than once during the year, 27 of these technically only, by reason of their transfer from the voluntary to the committed class, which occurred in 25 instances, and from the committed to the voluntary class, which occurred in two instances. The number of persons admitted was, therefore, 260.

The forms of disorder from which these patients were suffering is shown in the following table, in which they are grouped in accordance with the classification adopted by the American Psychiatric Association and the National Committee for Mental Hygiene:

	Male	Female	Total
Traumatic Psychoses.....	..	1	1

Totals.....	135	155	290

The large proportion of manic-depressive cases, constituting forty-three per cent of the total admissions, and the small proportion of cases presenting gross organic changes in the nervous system, which was less than seven per cent of the admissions, are noteworthy. The table indicates the extent to which the resources of the Hospital are applied to the problem of functional nervous and mental disturbances without gross structural changes and the methods of study and treatment and the plans of development are shaped principally with reference to this problem.

Amongst the patients admitted there were nine men and one woman who were received for treatment for alcoholism and two for drug addiction. These numbers were larger than the average of previous years. Few cases of this character are accepted, as experience shows that only a small number can be satisfactorily commingled with patients suffering from the frank mental and nervous disorders which the Hospital is organized and equipped to deal with. The main issue in these cases is a personality problem, and it is unfortunate that more adequate organized provision has not been made for their treatment. The few cases received by the Hospital are accepted only under legal control for periods of six months to a year, and a rather rigid constructive regime is followed. Preference is given to cases in which the prospects of sincere effort by the patient and a favorable result are reasonably good.

Forty-eight of the cases admitted had received treatment at the Hospital on one or more previous occasions, and six of those under commitment were received by official transfer from other institutions. One hundred and sixty-eight cases, 58 per cent of the total admissions, were suffering from a first attack. One hundred and ninety-five, 67 per cent of the admissions, had presented recognizable signs of mental disorder for less than a year. These facts are presented each year for the purpose of directing attention to the neglect which is so generally prevalent, even among the most intelligent, in regard to the early stages and premonitory signs of mental disorders when treatment and preventive measures would be most effective. Encouraging progress in the direction of general enlightenment and more adequate means of treatment and prevention are being made, but the benefit observed in the treatment of

even long neglected mismanaged conditions is a plain enough indication of what could be accomplished in the earlier periods.

The average age of the patients admitted was 38.7 years for the men, and 37.2 years for the women. Sixteen were under 20, five of whom were not over sixteen. Ninety-six, more than one-third of the cases, were under 30, and 159, constituting 54.8 per cent of the total admissions, were under forty.

The large majority of the patients admitted, as in previous years, had previously engaged in productive occupations. While many of the women were supported as wives or children, about 30 per cent had been self-supporting, 15 as teachers, 26 in business positions, and several in other lines of work.

The proportion of patients who signed their own applications for admission was 72 per cent, the number being 208. This subject was discussed in the report of last year, and it was explained that the experience of the Hospital for more than ten years, in receiving for treatment on their own application over 2,000 cases, had been entirely satisfactory, no serious embarrassment and no disadvantage to the patient nor to the Hospital having occurred in a single instance. Fourteen patients who were suffering from disorders which incapacitated them from signing their application but who made no objection to entering the Hospital, were received during the year on certification by a physician without a court order. In 25 instances it became necessary to place under court order patients who had been received on their own applications. This was a larger number than in previous years. Two patients who had been admitted under court order later expressed willingness to sign a voluntary application, and were discharged as committed patients and readmitted.

DISCHARGES

The total number of patients discharged during the year was 288, of which 129 were men and 159 were women. Of these, 63 were recorded as recovered, 50 as much improved, and 71 as improved. The manner in which these designations are applied is explained in the report of last year. The group included under the three headings, consisting of 184 patients, constituted about 64 per cent of the number discharged, and represents the maximum benefit accomplished in the treatment of the patients during the year. As most of the patients in this group were restored wholly or partially to their former social and economic level, their restoration was a distinct social gain, as well as a great blessing to themselves and their families. Thirty-four were discharged as unimproved,

and twenty-five were transferred to other institutions. Ten died, the number being only 1.6 per cent of the total number of patients treated.

The average period of treatment in the Hospital of those who were discharged as recovered was about eight months, and of those much improved about twelve months. Twenty-two of the recovered cases had been in the Hospital for more than a year, six of them over two years. As the period of convalescence is the most favorable time for conveying to a patient an understanding of the nature of his illness and of the causes which produced it, and of establishing him in a mode of life which will best safeguard his future, in order to give an opportunity for this, many convalescing patients remain at the Hospital for a longer period after the active disorder which led to their admission has subsided, than was formerly the practice.

At the close of the year, 40 patients who had left the Hospital during the year were still carried on the books. This was in accordance with the practice which has been established in practically all hospitals of following the further course of cases after they have left the hospital and aiding them to become socially and economically reestablished. This is especially necessary in the treatment of nervous and mental disorders in which the main issue in treatment is personal and social readjustment, which can only be fully accomplished away from the Hospital. A large number of patients carried in this way, and some who were no longer on the books, called during the year, either at White Plains or at the New York Hospital, to consult with the physicians. As has been noted in previous annual reports, this is a service which is rendered without charge, and adds considerably to the work and responsibilities of the physicians. It is, however, of paramount importance in carrying to a successful issue the aims of treatment in many of the cases, and can, with advantage, be extended and more adequately organized when better provision becomes available in the City.

CLINICAL SERVICE

In the Annual Report for 1922, the methods of treatment employed at the Hospital were described in considerable detail. During the past year a noticeable advance has again been made in the standards of practice in internal medicine. The medical attention required by 450 persons on the payroll of the Hospital has been established on a more systematic footing. A daily clinic hour for employees has been established and considerable progress has been made in giving all persons employed by the Hospital a thorough physical examination. Particular attention is given to

those just entering the service and to those who handle food. The number thus examined during the year was 202. Fifty-eight employees suffered from illness which confined them to bed, and 545 received attention at the Clinic during the year. The total number of visits made to the Clinic was 1172. Four employees died, three of cancer, and one from heart and kidney disease.

An event of significance in the developments of the year was the establishment at the New York Hospital of an out-patient clinic for nervous and mental disorders. This was opened on April 15, and marked the resumption at the general hospital of the interest and work in psychiatry which was interrupted by the establishment of Bloomington Asylum in 1821.

The Clinic has been in charge of Dr. Henry and is open on Tuesday and Thursday afternoons. Owing to the character of the work only a few patients can be examined in an afternoon by one physician, and the room thus far available has not been sufficient to accommodate more. Little effort has, therefore, been made to secure a large attendance and the patients examined have been referred from the other out-patient clinics or have been found among the general applicants to the out-patient department of the Hospital. Notwithstanding this limitation, the attendance during the 68 days in which the Clinic has been opened, was 231, or an average of between three and four a day. The number of individuals was 119. Thirty-four were children under sixteen. As many as nine made application on one day. More than half the patients were referred from other out-patient clinics and the hospital wards, and it was necessary to refer 25 per cent of those examined to other clinics or the hospital wards for treatment. The forms of disorder met with are shown in the following table:

<i>Diagnoses</i>	<i>New Patients</i>	<i>Revisits</i>
Psychoneuroses:		
Neurasthenia.....	12	22

Totals.....	119	94

The number of cases which were examined because of complaint of nervous and mental symptoms and proved to be suffering from a purely physical disorder which required attention from some other department, is noteworthy. This experience of the Clinic, though limited, indicates the mutual advantages of close relationships between psychiatry and the other branches of medicine.

For the further development of the Clinic more room is needed, and the services of a specially trained social worker to aid in obtaining histories and in the treatment of the cases. Additional medical service that will be necessary can be furnished by the staff of Bloomingdale Hospital.

The visiting internists from the New York Hospital, Dr. Roper and Dr. Cussler, and the visiting urologist, Dr. Kingery, have been most faithful and interested in their attention to the patients, and most helpful and stimulating in promoting their study and treatment and the scientific standards of the Hospital. Further extension and organization of the visiting staff would probably be of advantage. It is always a source of satisfaction to have an opportunity in the report of each year to record our appreciation of the kindly and skilled attention which is furnished to patients and employees whom it is necessary to send to the New York Hospital for study and treatment, and the invaluable assistance which is

received from time to time from the clinical and laboratory staffs and executive officers of the Hospital in dealing with the problems here.

Dr. J. Fielding Black of White Plains has, as in past years, furnished most of the important surgical attention required by the patients. Dr. Frank N. Irwin as Ophthalmologist, and Dr. Richard W. Moriarty as Aurist and Laryngologist, have been most attentive and helpful whenever called upon. All of those specialists have been generous in giving their services with little or no charge when conditions so required.

Dr. D. Austin Sniffen has continued to furnish the dental attention required in the treatment of the patients. A full-time office assistant was added to his staff during the year, and the services of a dental hygienist have been continued. The elaboration of the department has been of distinct advantage in the care of the mouths and teeth of the patients. During the year the number of patients examined by the dentist was 564, and the number of operations and other dental procedures attended to was 2647.

An article on "The Mental Aspects of Oral Focal Infection," based on his work and observations at the Hospital, was read by Dr. Sniffen before the Connecticut State Dental Association, and was published in "The Dental Cosmos," December, 1924.

A statistical statement of the work of the department is appended to this report.

LABORATORIES

The following table shows the examinations and other laboratory procedures attended to during the year for the Hospital and for the Campbell Convalescent Cottages:

<i>Examinations</i>	<i>Bloomingtondale Hospital</i>	<i>Campbell Cottages</i>	<i>Total</i>

Totals.....	6078	76	6154

Laboratory examinations have now become an extensive as well as an indispensable part of medical study and practice, and the space, equipment and organization of the Hospital laboratory have been added to as necessity required. Already, however, additional equipment and space will soon be demanded by the increasing work.

The X-ray Department has been kept active in the study and treatment of both patients and employees. For the latter, 175 radiograms were made during the year at considerable expense. The total number of examinations made was somewhat greater than in 1923, and is shown in detail in the following table:

<i>Examinations</i>	<i>Patients</i>	<i>Employees</i>	<i>Total</i>
Head (including examinations of jaw)	63	12	75
Neck	1	..	1
Thorax	82	40	122

Totals	604	175	779

A report on a study entitled "Some Roentgenologic Observations of Gastro-Intestinal Conditions Associated with Mental Disorders," made by Dr. Henry, the Director of the Laboratory, was published in the American Journal of Psychiatry, April 1924, and a report of a study entitled, "Biochemical Studies of Blood in Personality Disorders," is to be published in the Archives of Neurology and Psychiatry.

THE NURSING SERVICE AND SCHOOL

The nursing standard of the Hospital has never been better than during the past year. Every effort has been made to secure and retain suitable men and women for the work. The problem is, however, one of considerable difficulty, and a satisfactory solution can be reached only by a building-up process. The standards of hospital treatment for persons suffering from mental disorder are still, in the minds of the public, and of even some who are engaged in the work, mainly those which will meet the requirements of a safe custody and simple humane care. And though in spite of obstacles, progress has in most places been made in shaping the methods so as to provide in some measure for the active study and constructive treatment of the patients, the buildings, equipment, misconceptions, fears, prejudices, and traditional standards of the past have still to be reckoned with, and limit or prevent many an improvement for which the need is plain to be seen. Much has been done with a view to providing conditions which would attract

to the work and furnish training for men and women of the character and education required for an adequate nursing personnel. It has been and is the task of this Hospital to aid in this endeavor not only for the purpose of providing for our own needs, but of contributing to the raising of the general standard of work in the field of psychiatry as well. We are ourselves greatly indebted to other hospitals which have sent out into the field trained men and women from amongst whom we are able to secure candidates to fill positions for which we have no candidates of our own training. The number of this class available is, however, far too small to meet the needs of the great field of psychiatry in private as well as hospital practice. We must be content, therefore, to accept the necessity and duty of developing for ourselves a nursing staff of the character and education required.

As has been pointed out in previous annual reports, one of the disadvantages we labor under is the lack of houses for the members of the nursing staff. The present quarters are quite inadequate as to size and unsuitable as to location. On account of the increase in numbers and the demand for more single rooms, a large number of rooms which were formerly occupied by patients are now given over to nurses. The quarters are, indeed, comfortable and not unattractive, but they are in such close proximity to the quarters occupied by patients that they do not furnish the privacy and the opportunities for relaxation and social and educational activities which should be provided. Much effort will have to be given in other directions in order to overcome the difficulties attending the task in which the members of the nursing force are engaged and to improve the training system. The housing problem can, however, be solved only by an immediate large expenditure of money and for this reason we wish again to bring it prominently to the attention of your Honorable Board and to other generous friends of the Hospital and of progress in psychiatry.

It will be noted by reference to the report of the Directress of Nurses, which is appended, that encouraging progress has, during the year, been made in the School of Nursing. The number of students is larger than in previous years, and the educational methods have been improved.

Several requests for affiliation with general hospital schools for short courses for their students were received during the year, and an affiliation was accepted with the Presbyterian Hospital of New York. While we believe that provision for training in the nursing of nervous and mental disorders should be available for the students of all schools of nursing, and wish to cooperate in this as far as may be possible, it would seem advisable for a hospital of the size and

type of Bloomington, with its close relationship with a general medical and surgical hospital, to devote its educational resources in the field of nursing to producing graduates who are highly trained and experienced in psychiatric nursing, and to furnishing courses for the graduates of other schools who wish to enter this field.

PHYSICAL AND OCCUPATIONAL THERAPY DEPARTMENTS

These departments have maintained, during the year, their former standard of activity, and have also made progress in some respects. Tables showing the activities of the departments in detail are appended to this report. These are presented from year to year in order to preserve a permanent and readily available record, and for the benefit of other institutions and workers who may find them useful.

Massage and hydrotherapy continue to occupy an important place in the treatment of the patients, and it is important that the equipment and organization be maintained at a good level. In the use of hydrotherapy 204 patients, of whom 93 were men and 111 were women, were treated by means of prolonged baths. The total number of baths administered was 7744. Wet packs were employed in the treatment of 166 patients, of whom 54 were men and 112 were women, who received in all 4172 packs. Massage was employed in the treatment of 214 patients, of whom 124 were men and 90 were women, who received in all 10,023 treatments. Sprays, douches, salt-rubs, shampoos, and baking were employed in the treatment of 346 patients, who received in all 8180 treatments. Two hundred and eighty-seven treatments with massage and hydrotherapy were also administered to sick employees. Instruction in massage and hydrotherapy was given to 51 students. Three women and two men are employed in administering these forms of treatment. They receive assistance from nurses in training and the prolonged baths are given solely by experienced nurses.

The outstanding event of the year in the departments of physical therapy was the opening of the new Rogers Gymnasium for men in November. This at once advanced the quality of service which could be offered and stimulated the interest and satisfaction of all concerned. The deep appreciation shown and the improvement in the service rendered will, I am sure, be gratifying to the Governors of the Society who were so good as to devote the Rogers bequest to this purpose. The total number of patients enrolled in the department of physical education during the year was 460, of whom 212 were men and 248 were women. In addition to the activities shown

in the statistical table appended to this report, the departments have furnished invaluable means of personal and social treatment for the patients by engaging them in parlor games, dancing, and country walks, and by providing entertainments such as cinema pictures and plays in the Assembly Hall and on the lawns. Instruction in the treatment of patients by exercises, games, and other social activities was given to thirty student nurses. A Recreation Club for members of the Nursing and other departments of the Hospital was organized during the year under the auspices of the Physical Education Department, and more attention than in previous years has been given to utilizing the means of physical exercise and recreation provided by the Hospital to promote the welfare of the large force of persons in its employ. The practice of taking in for the summer months a number of student assistants from the schools of physical education was continued to the mutual advantage of the students and the Hospital.

The number of patients who received attention from the departments of Occupational Therapy was again greater than during the previous year. The table appended to the report shows the activities. The total number treated during the year was 527, constituting 88 per cent of the total patients under treatment in the Hospital. Of this number 247 were men and 280 were women. The number of articles made or mended in the course of the year was 26,338, of which 10,641 were produced by the men and 15,697 by the women. The printing shop also produced 387,948 pieces of printed matter, and gardening and other outdoor work were engaged in by a small group of men. The net cost for salaries and materials was \$13,368.41, or about \$22.50 for each patient under treatment in the Hospital, and \$25.00 for each patient who received treatment from the departments. A very large proportion of the articles made are taken by the patients who, in that case, pay for the materials. The occupational buildings have again demonstrated their great usefulness. Were it not for the special advantages presented by Sturgis Hall, the group of more disturbed cases who are brought to the department for an hour each day, could not have been furnished with this means of treatment which is so obviously beneficial to them. The Director of the Men's Department again directs attention to the need of enlarging the building, which is now too contracted for all the activities engaged in and the equipment required. The advantages of occupational therapy were extended by the Women's Department to the patients at Rockley Cottage during the summer. The work was carried on under the direction of one of the patients, who proved most efficient and accomplished a useful purpose. Miss Gundersen directs attention to instances in

which patients who became proficient in crafts while at the Hospital had, after leaving, found in them a means of support.

Instruction was given by the departments during the year to 51 students, 41 of whom were nurses. The department exhibits were, during the year, shown at the meeting of the American Psychiatric Association at Atlantic City; the meeting of the American Occupational Therapy Association at Buffalo; and at the session of the Institute for Occupational Therapists of the New York State Hospitals, which was held at the Hospital in April. Several articles written by Mr. Haas were published during the year, as follows: "One Hundred Years of Occupational Therapy, A Local History," published in the Archives of Occupational Therapy, April, 1924; "The Men's Occupational Therapy Work at Bloomingdale Hospital," published in the Modern Hospital, April, 1924; "Planning a Men's Occupational Building for Nervous and Mental Patients," published in Modern Hospital, May, 1924; "The Backbone of an Occupational Building for Nervous and Mental Patients," published in Mental Hygiene and the American Architect, July, 1924; and "Tennis Racket Stringing," in the Industrial Arts Magazine, February, 1924.

ROCKLEY COTTAGE

The advantages of visits and periods of residence at a seaside cottage for the patients was again demonstrated during the year. Rockley Cottage was operated with even greater activity and success than in previous years. It was open from June 9th to October 25th. The number of day parties during this period was 88, the total number of patients who participated being 678. Fifty-two different patients remained in residence at the Cottage for an average period of 29 days. The average daily number was eight. The members of the medical and nursing staffs, and other persons employed by the Hospital, also took advantage of the privilege of using the Cottage, and 91 who were not on duty stayed there for one or more nights. One or more meals at the Cottage and the use of the bath houses were also enjoyed by 69 others. The Cottage is visited daily by a physician from the Hospital, and the patients there are given careful attention.

The cost of maintaining the Cottage, exclusive of overhead expenses at the Hospital, and the services of the physicians, was \$5,381.19. The income from patients was, fortunately, much larger than in previous years and amounted to \$3,178.15.

EDUCATIONAL WORK

In the report of last year the educational work engaged in by the Hospital was reviewed. During the year just passed a communication was received from the Council on Medical Education and Hospitals of the American Medical Association, in which it was proposed that the work and instruction given to physicians who receive appointments at the Hospital should be systematized and elaborated so that it might be approved by the Council as a systematic course which would furnish definite preparation to those who were planning to enter the specialty. With the approval of the Bloomington Committee, a reply favorable to the proposal was made, with the reservation that some adjustments would be necessary before the work was undertaken. These have not yet been made, but the plan proposed would probably be advantageous to the work the Hospital is engaged in as well as to the physicians and to society, and it is hoped that a start may be made in the coming year.

The report of the Directress of Nurses shows that 77 student nurses and graduates were given instruction at the Hospital during the year. The students of other hospitals who attend the Central School of Nursing which is conducted at the school building of the Hospital are not included in this number. In the dietary department, instruction was given to 15 students, of whom 11 were student nurses and 4 were student dietitians. Some formal instruction, including lectures, was given to students of physical education who were given appointments during the summer season, and some instruction in the application of physical exercises and games in the treatment of the sick has been given to 30 student nurses.

In the departments of occupational therapy, courses of instruction were given to 51 students, 41 of whom were nurses who were given from one to two weeks, and ten were occupational therapists who were given courses of six months. The courses in occupational therapy were elaborated somewhat during the year and notices sent to Arts and Crafts schools and other places where they would attract the attention of interested persons. The courses for men are for twelve months, and for women three and six months. Preliminary training in crafts is a requirement for admission.

The educational work undertaken by the Hospital has been carried on by the physicians and directors and assistants of the departments without, except in the nursing department, in which two instructors are employed, any special organization for the purpose or any financial support except what can be applied from the current income for the maintenance of the Hospital. It is

realized by those engaged in it that there are advantages for the Hospital and the departments, and the extra effort has been willingly given. It seems now, however, to have become extensive and important enough to require special consideration and support.

IMPROVEMENTS IN EQUIPMENT AND PLANT

The outstanding improvement for the year was the completion of the Rogers Gymnasium for men to a point which permitted of its being used. The building in its extreme dimensions is 163 feet long and 50 feet wide, with extensions carrying the width to 63 feet in the terminal wings. The main exercising room is 90 feet long and 50 feet wide, with a height of 46 feet to the peak of the roof, and 21 feet to the eaves. This spacious room furnishes an admirable place for games such as tennis, basket ball, baseball and other group activities, and is provided with bars, rings, chest weights, and other forms of apparatus. An adjoining room about 28 feet square is provided with rowing machine, punching bag, parallel bars and other equipment for individual exercising and for small classes. The slope of the ground is such that the west and south sides of the basement are above grade and are furnished with ample windows. On this floor there is a shower and locker room, a bowling room containing four alleys, a billiard room with two tables, a golf room, a kitchenette and storerooms. There is also a squash court in the north wing which extends from basement to roof. When fully completed the building will also contain a lounge and resting room. This building will, especially during the winter and in inclement weather, add to the resources of the Hospital in the constructive work with the patients and as a means of relief from confinement to the quarters in which they eat and sleep. The building will also furnish a means of healthful exercise and recreation for those employed at the Hospital.

Another notable event was the breaking of ground for the construction of the Taylor Recreational Building for women, which took place on August 13th. The building has now been enclosed and will be completed next summer. This building, the gift of Henry R. Taylor, Esq., of the Board of Governors, will provide for the women patients and employees what the Rogers Gymnasium does for men. It is so planned that it is expected to furnish also a social centre for the whole Hospital. These two buildings, with the two occupational buildings, and the grounds and playing fields furnish a remarkably complete equipment for the reconstructive measures which play such an important part in the treatment of the patients.

GROUP OF INSTRUCTORS—STURGIS HALL
WOMEN'S OCCUPATIONAL BUILDING, BLOOMINGDALE HOSPITAL

The cottages for physicians which were completed during the previous year were brought into use during the year just passed. The Staff House, containing suites and single rooms for physicians, is, at the close of the year, almost completed. This group of buildings, the gift of Mr. Whitney, Vice-President of the Society, provides living conditions for the physicians and their families which should aid greatly in overcoming some of the objections which are made by many to full-time resident hospital positions. The Staff House consists of a central house containing a dining-room, large enough to accommodate thirty persons, a large sitting room, a billiard room, and service rooms. There are four sleeping rooms on the second floor; and the third floor, which is unfinished, contains space sufficient for four or five additional sleeping rooms. Connected with the central house by an open corridor are two smaller houses, each containing three suites. The suites consist of a sitting room, a sleeping room, an enclosed porch which is partially recessed into the main structure, a large closet with a window, and a bathroom. The suites are well separated for privacy and are so arranged that the two large rooms could be used singly in connection with a common bathroom in a private entry. The basements contain a small laundry for private use, and storage rooms. The buildings in this group as well as the other new buildings referred to, were designed by Grosvenor Atterbury, architect. They are remarkably attractive in appearance and well adapted to the purposes which they are to serve.

The renewal and extension of the bath and toilet facilities of the Hospital, which have been carried on continuously since 1921, have made steady progress during the year. Twenty-three rooms were added to those previously reported, leaving now about thirty-five to be done. The total expenditure thus far has been \$105,000, of which \$72,000 was provided from the current income of the Hospital.

Many other minor improvements were made during the year, and the equipment and plant, while in need of constant attention and renewals occasioned by wear and tear and increasing demands, are in very good condition.

NEEDS OF THE HOSPITAL

The plant and equipment have now reached a period at which important renovations and renewals are required, and some work of this character is undertaken each year. In 1920 three of the steam boilers were replaced, and now, owing to the reduced pressure permitted in the old boilers which remain, and to the demands of the

new buildings, a revision of the heat and power plant and service lines has again become necessary. Preparatory to this a study by consulting engineers has been authorized by the Bloomingdale Committee.

The renovation and extension of the toilet and bath facilities, which were undertaken in 1921, are still incomplete, and the work should be steadily continued until new and adequate equipment has been installed throughout the Hospital.

The completion of the Staff House will release, in the main building, quarters now occupied by physicians which can be used to provide additional space needed for administrative and clinical purposes and for the increasing number of persons employed by the Hospital. These quarters will require considerable changes in order to make them suitable for the new uses to which they are to be put.

As has been explained in previous reports, one of the most acutely felt needs of the Hospital is for residential quarters for the paid personnel which will separate them more completely than at present from the quarters occupied by patients. Through the discernment and generosity of Mr. Whitney, a start has been made towards this end. The next step should be the establishment of a Nurses' Home, at least for the student nurses, and the advance which has been made by the School of Nursing during the year brings into view more clearly than ever before the advantages which would be gained by this development.

Reference may also again be made to the recommendations which have been presented in the reports of previous years in regard to the demand occasioned by the progress in psychiatry and mental hygiene for better provision for separation of the different types of cases under treatment at White Plains, and for provision in connection with the general hospital for the reception, study and treatment of persons suffering from mental disorders, and for extending the work of the Hospital in the field of early treatment and prevention.

FINANCIAL

Of the 597 cases which were treated during the year 284, constituting almost half of the total cases, were wholly or partially supported by the Society. The number treated without charge was 49, and 235 paid rates which were less than the average cost. The expense borne by the Society in the treatment of these cases amounted to \$212,923.53, which was the equivalent to the support of 83 free beds throughout the year. The number of weeks board and treatment furnished was 14,628, and the weekly per capita cost was \$49.16.

The total expenditure for ordinary maintenance and the care and treatment of the patients was \$719,129.77. This includes the cost of maintaining the properties at White Plains and Oakland Beach, ordinary repairs and renewals, insurance, supplies, medical, nursing and accessory services, the educational work carried on at the Hospital, salaries and wages, and all other running expenses. Capital charges, and the cost of extraordinary renewals and improvements and of extensions for which special appropriations were made are not included.

The income of the John C. Green Memorial Fund, amounting to \$8,762.50 was, in accordance with the terms of the Memorial, applied to the support of eight patients.

GENERAL

The number of visitors to patients during the year was 12,587.

The report of the librarian shows that 239 volumes were added to the general library during the year, of which 79 were donated. The distribution from this library was 11,429 volumes, of which 7,958 were issued to patients, 4,409 to the men and 3,549 to the women, and 3,471 were issued to employees. The number of volumes added to the medical library was 35, and seven were added to the nurses' library. Sixty-five copies of popular magazines (39 titles) and 47 medical magazines, of which 12 were in foreign languages, were received. The general library now contains 4,469 volumes, the medical library 1,266 volumes, and the nurses' library 224 volumes. The increase in general reading, which has been advanced as a treatment measure for the patients and as a means of entertainment and culture for the employed personnel, has been accomplished principally by the employment of a trained librarian and the organization of the library. This was done in 1918. The circulation in that year was 6,893 volumes, while in the year just preceding it had been 4,513 volumes. In the year just closed the circulation had risen to 11,429 volumes. Among the gifts to the library during the year was a set of the International Encyclopedia and a number of other interesting books which were presented by Mr. Sheldon. A volume of "Addresses to Nurses" delivered by distinguished psychiatrists at the Retreat at York, England, was received from the Governors of that Hospital.

The increase by Mr. Taylor of his gift of \$50,000. to \$135,000. for the erection of a recreational building for the women was a notable event of the year and made possible the planning and construction of a building which will be a most valuable addition to the therapeutic resources of the Hospital. A number of other

gifts were received for the use of the Hospital and to add to the Nurses' Fund. For all these gifts and for various entertainments which were provided by friends of the patients, we are deeply grateful.

The Hospital was visited by Commissioner Mills of the State Hospital Commission on April 22nd, and by the Medical Inspector of the Commission on March 6th, July 2nd, September 24th and December 15th.

On May 14th Dr. Samuel Backus Lyon, Medical Superintendent Emeritus, passed away in the eighty-third year of his age. He resigned from the position of Medical Superintendent on July 1st, 1911, after a service of twenty-one years, before which he had been Assistant Medical Superintendent for eight years. To Dr. Lyon fell the task of supervising the erection of the new buildings and the removal of the Hospital from New York to White Plains in 1894. The excellent character of the buildings and the beauty of the grounds, as well as the developments that were made in the work up to the time of his retirement, reveal the great ability and conscientious effort which he applied to the task.

Changes which occurred in the resident Medical Staff during the year were as follows:

Dr. George S. Amsden, Senior Physician and Director of the Men's Department, resigned on February 1st, to accept the position of Professor of Psychiatry at the Albany Medical School, and Director of the Psychopathic Department of the Albany Hospital. He had been in the service of Bloomingtondale Hospital since September 15th, 1905, and was associated with Dr. August Hoch in the establishment of the laboratory, of which he was in charge for several years. His understanding and skill in the study and treatment of his patients and his devotion to their interests were extraordinary, and his summons to a teaching position was a fortunate circumstance in the progress of psychiatry in medical education.

Dr. Edward F. Parsons was appointed Assistant Physician January 1st, and resigned December 31st to take up medical missionary work in China.

Dr. Robert B. McGraw was appointed Assistant Physician January 15th.

Dr. Samuel S. Cottrell, Assistant Physician, resigned March 27th, to travel and study in Europe.

Dr. Thomas M. French was appointed Assistant Physician April 7th.

Dr. Elizabeth Kilpatrick left August 22nd on a year's leave of absence to pursue special studies.

Dr. Edward B. Allen was appointed Assistant Physician September 1st.

Dr. Irlma Kennedy was appointed Assistant Physician September 11th.

Dr. Harry M. Tiebout, Assistant Physician, resigned December 1st to accept a position in the Child Guidance Clinic of the National Committee for Mental Hygiene.

Dr. Herbert L. Fossey was appointed Assistant Physician December 1st.

Religious services were conducted as usual on Sunday afternoons, and we are indebted to the following clergymen for officiating:

Rev. Frank H. Simmonds, Grace Church, White Plains, New York.

Rev. Roland C. Ormsbee, St. Bartholomew's Church, White Plains, New York.

Rev. C. W. Robinson, Christ Church, Bronxville, New York.

Rev. Richard Cobden, Larchmont, New York.

Rev. E. P. Miller, Scarsdale, New York.

Rev. S. R. Brinckerhoff, St. Mark's Church, Mt. Kisco, New York.

Rev. H. Adye Pritchard, St. Mark's Church, Mt. Kisco, New York.

The Rev. Father Richard J. Keefe and his assistants, of White Plains, have, as in past years, been most attentive to the religious interests of the Catholic patients.

It is gratifying to have again an opportunity to bear testimony to the manner in which the physicians, nurses, executives, departmental staffs, and employees generally have performed their tasks and furnished the service which has maintained the work and spirit of the Hospital at a high level during the year.

For the generous support of the work by your Honorable Board, and for the wise guidance and constant encouragement received from the Bloomingdale Committee, I wish again to express my deep appreciation.

Respectfully submitted,

WILLIAM L. RUSSELL,

Medical Director.

A decided step forward has been made this year by the Nursing School. More students have been admitted than at any time during our history.

Ten probationers were entered in the September class. If this number can be maintained for the next few classes, the school will have arrived upon a secure footing. The continuance of applications is almost automatic, as students bring students, and once in satisfactory running order no form of advertising should be necessary. The Hospital is fully equipped in clinical material for the

training of at least fifty pupil nurses a year. What a contribution this output would be towards spreading the principles of Psychiatry! The increase in the number of applicants for pupil courses from individual nurses and from nursing schools is most gratifying. This takes care of the shortage in our own ranks.

The affiliation with the Presbyterian Hospital arranged during the year we feel is a mutual benefit. Unfortunately, we have been unable to accept some schools that have sought entrance or affiliation, from lack of housing accommodations. It is necessary, at the present time, to use nineteen rooms belonging to patients for the nurses and for employees, and we must stress the need for a nurses' residence away from the immediate Hospital contact.

The Central School of Nursing, as inaugurated at this Hospital and carried on here until five schools participated, has worked out satisfactorily. The increased interest in this field is apparent from the number of requests that come from colleges and schools for permission to visit the Hospital and learn of its work. Groups have visited this year from Teachers' College; Henry Street Nursing Association; Fifth Avenue Hospital; Post Graduate Hospital; Norwegian Hospital; Highland Manor School for Girls, Tarrytown; and Wadleigh High School, New York City.

There has been organized a Nurses' Recreation Club which meets each Wednesday night for general amusements, such as readings, bridge and dancing; and summer evenings are utilized for golf and outdoor activities.

Theatre parties have been made possible by our generous friends, for which we wish to thank them. Such amusement has an important place in the life of the student body.

In closing this report I must again state that further development of the school cannot be contemplated until adequate housing is provided.

Respectfully submitted,

KATHERINE F. HEARN,
Directress of Nurses.

THE SOCIETY OF THE NEW YORK HOSPITAL. BLOOMINGDALE HOSPITAL, WHITE PLAINS, N. Y.

ANNUAL REPORT OF THE SUPERINTENDENT OF THE CAMPBELL COTTAGES FOR CONVALESCENT CHILDREN FOR THE YEAR 1924

To the Board of Governors:

GENTLEMEN:—I have the honor of submitting the seventeenth Annual Report of the service of the Campbell Cottages.

More than one thousand children were cared for, of whom 974 were substantially benefited, while only 18 were unimproved.

The progress made by the asthmatic children is very comforting to these afflicted girls and boys, many of whom have not known a day or night's rest in several years—sometimes since infancy. In many instances the chorea children, also, made excellent recoveries.

Many of the children requiring surgical dressings had stubborn, unhealthy wounds, following serious operations, and these also responded happily to the general environment and the particular care afforded them. In many cases it is not simply a temporary benefit, but a real foothold on health which has been regained and which carries the child from threatened chronic invalidism to strong young manhood.

Recreation and occupation are necessary features of all convalescent life, and our children daily demonstrate both the need and the value of trained guidance in this field. Besides school work, the spare time plan includes little entertainments prepared by the children, films showing pictures taken from well-known children's stories, and "Health Plays" that are part of a programme instituted and published by the Child Health Organization. These plays were prepared with a view to offering definite health instruction in so attractive a form that the children are both entertained and instructed. Health problems must be developed in child language if growing children are to be taught and impressed.

A group of pupil-nurses from the New York Hospital visited the Cottages during their term of training in the Social Service Department. Social workers from other organizations visited from time to time, during the year.

A Neutrodyne radio set was installed in the staff living-room, thus providing much pleasure for the nurses who, by reason of their distance from the city, are unable to enjoy the entertainment available to persons living in large centres.

IMPROVEMENTS

A new fire escape has replaced the original structure in the rear of the Administration Building, and the fire escape at the north side of the children's cottage has been remodelled.

CAMPBELL COTTAGES FOR CONVALESCENT CHILDREN
THE MARY SMITH CORNER IN THE SCHOOL-ROOM

The floors and wainscoting of the pantry and kitchen have been tiled, and Monel metal sinks have been installed in the kitchen. Considerable exterior improvements have been made. Barberry bushes have been planted in front of the Cottages, while new benches and large swings make attractive out-of-door resting places.

Christmas was, as usual, the occasion of much joy on the part of the children, all of whom were generously remembered by friends of the Cottages.

Once more it is my privilege to thank the many friends of Campbell Cottages whose kindness to our children is truly appreciated. To many of our boys and girls, their experience here is the first really happy event of their lives.

To the Social Service we are greatly indebted for their earnest and friendly cooperation at all times, and for their constant interest of our mutual problems.

I am glad to have another opportunity to thank the Board of Governors and the Bloomingdale Committee for their continued support and encouragement which have played so great a part in the progress of our undertakings in the interests of the sick and needy children of the Hospital.

Respectfully submitted,

ALICE C. ELLISON,

Superintendent.

CAMPBELL COTTAGES FOR CONVALESCENT CHILDREN STATISTICS FOR 1924

CHILDREN'S SERVICE

Children remaining, December 29, 1923.....	48	
Boys admitted during 1924.....	424	
Girls admitted during 1924.....	178	
Total.....	<u>650</u>

GOVERNORS

OF

THE SOCIETY OF THE NEW YORK HOSPITAL.

The following is a list of the names of Governors from its organization to the first of January, 1925, with the date of their respective elections and the length of time they continued in office:

GOVERNORS.	Elect- ed.	Re- signed.	Served the Institution.	
A.				
Charles Ward Apthorp.....	1770	1784	14 years	
William Axtell.....	1770	1784	14 years	
John Alsop.....	1784	1788	4 years	
Gilbert Aspinwall.....	1799	1809	} 15 years	Died in office. 1819.
Gilbert Aspinwall.....	1811	1812		
Gilbert Aspinwall.....	1815			
John Atkinson.....	1800	1809	9 years	
John Aspinwall.....	1814	1817	3 years	
John Adams.....	1818	1854	36 years	
Stephen Allen.....	1823	1830	} 24 years	Died in office, 1852.
Stephen Allen.....	1835			
Augustine Averill.....	1848	1857		
John Jacob Astor.....	1860	1864	4 years	
George W. Abbe.....	1877		2 years	Died in office, 1879.
William W. Astor.....	1879	1882	3 years	
James W. Alexander.....	1904	1905	1 year	
B.				
Gerardus William Beekman.....	1770	1777	7 years	
George Bowne.....	1770	1784	} 26 years	
George Bowne.....	1785	1797		
Samuel Bowne.....	1772	1784		
William Bayard.....	1777	1784	7 years	
Robert Bowne.....	1784		34 years	Died in office, 1818.
Aaron Burr.....	1784	1792	8 years	
James Beekman.....	1785	1787	2 years	
Theophylact Bache.....	1785	1797	12 years	
Thomas Buchanan.....	1785	1800	15 years	
Francis Basset.....	1785	1787	2 years	
William Backhouse.....	1787	1792	5 years	
Nicholas Bayard.....	1794	1798	4 years	
John Barrow.....	1795	1807	12 years	
Samuel Bowne.....	1796	1797	1 year	
William Bayard.....	1800	1802	2 years	
Walter Bowne.....	1799	1805	6 years	
Dr. Samuel Bard.....	1801	1802	1 year	
Rev Abraham Beach.....	1801	1806	5 years	
Thomas Buckley.....	1802	1842	40 years	
John Bogert.....	1804	1817	13 years	
John L. Bowne.....	1809	1815	6 years	
Abraham Barker.....	1813	1816	3 years	
Robert H. Bowne.....	1815	1827	12 years	
William Bayard, Jr.....	1818	1823	5 years	

LIST OF GOVERNORS—*Continued.*

GOVERNORS.	Elect- ed.	Re- signed.	Served the Institution.		
John L. Buckley.....	1842	1855	13 years

TO THE LEGISLATURE OF THE
STATE OF NEW YORK

The Governors of the Society of the New York
Hospital respectfully present their 154th Annual
Report of the state of the institutions under
their charge for the year 1925.

THE PRESENT NEW YORK HOSPITAL
WEST FIFTEENTH STREET FRONT
Completed 1877

ANNUAL REPORT
OF THE
GOVERNORS OF THE SOCIETY OF THE NEW YORK
HOSPITAL FOR THE YEAR 1925.

In conformity with the provisions of its Charter, granted by Royal Authority June 13, 1771, in the reign of King George III, the Governors of The Society of the New York Hospital present their annual report and a statement showing the receipts and expenditures for the year 1925 of the several institutions under their control and management, as follows:

The General Hospital, at Fifteenth and Sixteenth Streets, New York, the Department for the Treatment of Mental Diseases, known as Bloomingdale Hospital, at White Plains, Westchester County, and the Hospital for Convalescent Children, at White Plains.

The constantly increasing activities of all of these institutions have been marked. Many additions and improvements have been undertaken. The pressure for space in the various departments continues, and cannot be relieved until new hospital buildings are obtained. Progress to that most desirable end continues to be made, and definite results are looked for.

Operating expenses reached \$644,169.31 in 1925, an increase of \$59,436.30 over 1924. The operating receipts in 1925 were \$476,887.85 as against \$477,459.18 in 1924, a decrease of \$571.33, making the operating deficit \$167,281.46 for the year. The Superintendent's report sets forth in detail the results involved in these figures and in tabulated comparisons with previous years.

The accompanying report of the Medical Board dwells particularly on the growing importance of the transfusion of blood to both medical and surgical patients. On the recommendation of the Medical Board the Governors have established a new position, that of specialist in transfusion, to which Dr. R. E. Stetson has been appointed. Towards meeting this expense in the case of patients unable to pay, a Transfusion Fund has been established by the gifts of various friends of the Hospital. This Fund now exceeds \$8,000 in value, but more is needed. Attention is also called to the increased pressure upon the Department of Pathology and the X-Ray Department and to the growth in the Department of

Society for ten years, and who took a deep interest in its work. During all of that time he had been an active member of the Bloomingdale Committee. By his will, which has been admitted to probate, he remembered the Society munificently by a legacy of \$500,000 for use at Bloomingdale Hospital.

Attention is called to the accompanying reports describing the work of the various departments.

EDWARD W. SHELDON,
President.

G. HOWARD WISE,
Secretary.

March 2, 1926.

In Memoriam

HENRY RICHMOND TAYLOR

DIED DECEMBER 5, 1925

When the generous, unselfish, and useful life of HENRY RICHMOND TAYLOR came suddenly to its close on Saturday, the fifth of December, not only were his friends and associates made aware that a bright light had gone out and a beloved personality extinguished, but the broad world of finance learned of the death of an honorable and able co-worker, and the economical and philanthropic interests of the city realized a heavy loss.

It is given to but few men to do as much good for the welfare of their fellow beings as was accomplished by Mr. Taylor in his comparatively short life, for his age counted but fifty-six years. He had for many years been associated with institutions where his personal touch and financial aid and support had been invaluable, yet so great was his natural modesty, so great his wish to avoid publicity, that many of his most intimate friends were but imperfectly informed of his benefactions.

The Loomis Sanitarium was one of his active interests, and the Manhattan Maternity Hospital, nobly supported by his father, found after the passing of its benefactor a never failing help and protector in his son. Our honored institution has received at his hands beautiful and most substantial proofs of unostentatious liberality.

Turning to the paths of business life we find Mr. Taylor making his mark and conferring the benefit of his good judgment and advice on the boards of management of banks, trust companies, and railroads. The far reaching interests of his family gave him exceptional opportunity to carry forward much good work already planted, and he never failed to give his aid and constant attention to all that was ready for his hand.

Those of us who can speak of him from intimate friendship, and with loyal and devoted appreciation, will cherish his memory and deeply deplore his death, while the community in which he lived will be ever aware of the great loss they have sustained as the months and years pass by.

(Extract from the Minutes of the Board of Governors, January 5, 1926)

THE SOCIETY OF THE NEW YORK HOSPITAL.

STATEMENT OF INCOME FOR THE YEAR 1925.

RENTS, INTEREST, ETC.:

REPORT OF THE SUPERINTENDENT OF THE NEW YORK HOSPITAL FOR THE YEAR 1925

To the Board of Governors:

GENTLEMEN:—I respectfully submit the Superintendent's report for the year 1925.

The statistical data attached furnish detailed information of the varied activities of the Hospital during the year.

The cost of operating the Hospital was greater than in 1924. The total expenditures, not including those of the Department of Urology, were \$644,169.31, as contrasted with \$584,733.01 in 1924. This was an increase of \$59,436.30, or over 10 per cent.

The operating income showed no gain owing to a considerable decrease in patients under treatment in the Hospital during the summer and fall months. Unfortunately a temporary decrease in hospital population does not mean a corresponding decrease in expenses, as the regular overhead cannot be reduced, but it does result in smaller receipts.

The year's operating receipts were \$476,887.85, leaving an operating deficit of \$167,281.46.

Medical and surgical supplies cost \$34,571.78, against \$30,225.92 in 1924, an increase of \$4,345.86.

The expenditures of the steward's department were large,—\$139,972.01 against \$115,566.67 in 1924, an increase of \$24,405.34, or nearly 21 per cent. This was due partly to advances in commodity prices and in wages, but largely to the introduction of more liberal menus throughout the hospital. The average cost per day for each person fed, including patients and employees, was 90 cents, of which cost uncooked food represented 60 cents and purchasing, storing, preparing and serving 30 cents. In 1924 the corresponding costs were 78, 51 and 27 cents. The cost of uncooked food represents about two-thirds of the total cost and service about one-third. About 22 per cent of the total can be charged to salaries and wages.

Fuel, oil and waste cost \$4,466.68 more in 1925 than in 1924. This was due largely to higher prices brought about by the coal strike.

The cost of the ward service was \$325,181.46. In 1924 it was \$301,391.05; in 1923, \$297,105.92; and in 1922, \$283,746.53. The average cost per day for caring for ward patients was \$5.18. In 1924 it was \$4.59 and in 1923, \$4.48.

The emergency service, including the Workmen's Compensation and Admitting departments, expended \$36,954.65. There was received for the care of patients coming under the provisions of the workmen's compensation law \$36,142.15. There were treated in the emergency room 4,636 patients, of whom 3,458 were industrial accident cases. The total number of redressing cases was 12,344, or about 33 daily.

The Private Pavilion service cost \$201,064.32 as against \$179,623.90 in 1924 and \$178,327.22 in 1923. The cost per day for each patient cared for in this department was \$11.35. In 1924 it was \$9.66 and in 1923 \$9.20. The total number of private patients cared for was 1,158 compared with 1,280 in 1924 and 1,305 in 1923.

The pay roll of the Hospital, including the departments of Pathology, Urology and Immunology, amounted to \$334,316.05, as compared with \$315,487.65 in 1924, an increase of \$18,828.40 or about 6 per cent.

RECEIPTS AND EXPENSES

The appended table shows the receipts and cost of the wards and emergency department and the private rooms from 1905 to date. Operating room, X-ray and miscellaneous receipts are not included.

WARDS AND EMERGENCY DEPARTMENT			PRIVATE ROOMS	
Year	Cost	Receipts	Cost	Receipts
1905	\$154,919.61	\$20,219.06	\$38,510.96	\$39,338.74

DEPARTMENT OF RADIOLOGY

Considerable attention was given to improving the X-ray department. Another room was assigned to the department, two dressing rooms with toilets constructed and an office provided for the director. In addition to these alterations the following equipment was installed:

- Transformer and radiographic table
- Two Bucky tables, tube stand and bowl
- New light box equipped with Cooper Hewitt lights
- Vertical plate changer
- Counterbalanced tube stand
- Dental unit complete with Coolidge tube
- 26 steel transfer units
- 5 sets of screens with cassettes

The work of the department has increased materially, over twenty thousand films having been used in 1925. The expenditures amounted to \$28,591.46 and the receipts were \$28,896.54.

DEPARTMENT OF UROLOGY

An experimental pay clinic established by this department the early part of the year has proved successful. The attendance both of doctors and patients has increased. The physicians who attend the patients in the clinic take care of them on admission into the hospital. Patients attending the day clinic pay a fee of \$1.00 and those attending the evening clinic pay \$1.50. No patient unable to pay has been refused treatment. The number of treatments in the day clinic was 7,127 and in the night clinic 6,404. The income of the clinics was \$9,687.25.

During the year 2,955 cystoscopies were performed and the total income of the cystoscopic clinic was \$5,645.50.

The indoor service was very active. The number of major operations performed was 255, with a mortality of only 13, which is regarded as low.

DENTAL DEPARTMENT

The number of patients treated in this department during the year was 2,612. There were 2,009 extractions; 420 surgical dressings; 306 radiographic readings (full sets of ten films); 217 silver fillings; 118 prophylaxes; 14 operations for impacted teeth; 9 fractures; 16 pericoronal infection; 5 supernumeraries; 3 trench mouth (Vincent's).

DIVISION OF LABORATORIES

The report of the Director of this division shows that there continues to be an increase in the amount of work done by that branch of the service. During the year nearly 60,000 (59,435) examinations were made, which is an average of not less than eight for each patient admitted, when due allowance is made for those examinations made for non-resident patients. Reports on specimens of tissue removed at operation were rendered to the clinical divisions on 68% within 24 hours, on 87.3% within 48 hours, and on 94% within 72 hours of their reception. These figures make no allowance for the intervention of Sundays and holidays which, because of the absence of the staff, delay the issuing of reports. The improvement which has taken place in this respect during the past two years has resulted from the introduction of a rather elaborate system of plotting graphically the results obtained each month.

The percentage of autopsies obtained shows a slight decrease from 47.5% in the preceding year to 43.1% in the year just closed. In his report for 1924 the Director said that, considering the legal restrictions surrounding the performance of autopsies in this State and our insistence upon the use of frank and humane methods in attempting to secure permission for such examinations from the relatives, it is questionable whether the figures for 1924 can be surpassed unless a more liberal law is enacted or the public is made to realize that such examinations may reveal family predispositions which, when known, can be counteracted or guarded against in the remaining members of the family. It is realized that such considerations will have weight only with individuals above a certain grade of intelligence but the value of such preventive possibilities to the relatives of the deceased should be emphasized in every instance. To make this argument something more than a mere plea, this division will undertake to furnish a résumé of the anatomic findings to the family physician in all cases where consent for a fairly complete autopsy is secured if the name and address of the physician is made known to the division.

A survey of the entire field of laboratory tests with a view of finding some procedures which have emerged during the past year from the experimental stage and might be of practical value to the clinical branches of the service, failed to reveal any which answer these requirements with the possible exception of serological tests for the detection of tuberculous infections.

In addition to those departments whose chief function is to meet the laboratory needs of the clinical divisions, the Hospital also

operates laboratory sections of metabolism and applied immunology which are concerned chiefly with work of an investigatory nature. The activity of these departments may be inferred from the list of publications which is appended.

THE RECORD ROOM

The experiment of employing two high school students during July for the purpose of preparing charts for the binder proved very successful. Seventy-one volumes were bound during the year.

Twenty-five volumes and thirteen hundred and sixty charts were loaned from the record room for use in Courts of Law and in other departments of the hospital. Research work carried on in the record room necessitated the use of two thousand nine hundred and forty charts. The problem of refiling these four thousand three hundred charts, often in volumes, was solved by securing as assistant record clerk a young man doing pre-medical work at Columbia College.

REPAIRS, REPLACEMENTS AND IMPROVEMENTS

Two rooms in the Out-Patient Department, occupied by the Brady Urological Clinic, were divided into six cubicles at a cost of \$1,185.

The cold water pipes on the west side of the public building having become filled with rust, it became necessary to replace them at a cost of \$535.

A pressure pump for house water supply cost \$325.

In order to conform with recommendations of the Fire Department, about \$4,500 was spent in altering the system of standpipes so as to disconnect all house water connections from the fire standpipe system, enclosing basement of elevator shafts, laying floors in unused dumbwaiter shafts in ward building, fireproofing doors and installing automatic sprinkler apparatus in clothes chute and other incidental improvements.

A portable metabolism outfit cost \$310.

Twenty-four beds, with adjustable springs of the most modern type, were purchased at a cost of \$664, to replace an equal number of ward beds which had become unserviceable after nearly fifty years use. It will be necessary in the near future to replace all of the original ward beds. Fifty-four beds were purchased for the private rooms at a cost of \$2,112.50, replacing an equal number of brass beds which had been in use over twenty-five years.

The roof on the Nurses' Home, 13 West 16th Street, was in such bad condition that a new one had to be laid.

An anaesthesia apparatus for administration of oxygen, ethylene and carbon dioxide cost \$347.

The installation of manual and automatic gas shut-off valves on three gas mains, as required by City ordinance, cost \$600. These valves shut off the gas automatically when subjected to direct contact with fire, and central boxes on the exterior of the buildings are so arranged as to permit the gas supply to be shut off by the officers of the fire department whenever necessity arises.

Owing to the age of the buildings the cost of repairs grows larger each year. Machinery, pumps, water, steam and drain pipes have to be replaced. Some of the piping replaced this year had been in since the building was constructed in 1877.

RELIGIOUS AFFILIATIONS OF PATIENTS

Of the patients admitted to the hospital wards approximately 53 per cent were Catholics, 29 per cent Protestants and 18 per cent Hebrews.

EXECUTIVE STAFF CHANGES

Doctor Roger S. Palmer resigned as admitting physician and was succeeded by Doctor Edna S. Pennington.

ACKNOWLEDGMENTS

A radio set was presented to the Hospital for use in the women's medical ward by Mrs. Fulton Cutting. Mrs. W. I. Walters had a large radio installed in the nurses' home and Mr. A. H. Grebe one in the nurses' home annex for the entertainment of the nurses while off duty. The Fraternity for Friendly Service also presented a radio set for use in the children's ward.

Mr. Edward W. Sheldon contributed \$100.00, Mrs. William John Fitz Gerald \$100.00, Mrs. Waldron Post Brown \$20.00, and Mr. James Lawrence \$11.75 toward the Christmas festivities.

The Committee formed in 1923 to collect and administer a fund to help deserving patients suffering with diabetes pay for insulin contributed \$1,000.

The Haven Relief Fund Society made a contribution of \$150.00, which was expended under the supervision of our Social Service department. A detailed report of the disbursement was rendered to the Society.

The Business Women's Council of the Billy Sunday Campaign continues to conduct song services in the hospital Sunday afternoons. The Council also presented the patients and employees with candy and calendars on Christmas.

Numerous donations of flowers, toys, books and magazines were received and duly acknowledged.

For financial and other statistics see Statistical Report between pages.

Respectfully submitted,

THOMAS HOWELL,

Superintendent.

REPORT OF THE MEDICAL BOARD OF THE
NEW YORK HOSPITAL FOR THE YEAR
ENDING DECEMBER 31, 1925.

To the Board of Governors:

GENTLEMEN:—The Medical Board of the Hospital reports another year of active service.

On the First Division the teaching of the students of the Cornell Medical School in the second, third and fourth years continued throughout the College term. This teaching included clinical clerkships, ward teaching in physical diagnosis, amphitheatre clinics and electives, and also in the Out-Patient Department courses in minor surgery.

The Second Division has given clinics in the Library to practicing physicians. The audience at these clinics was made up for the most part of those who refer patients to the Hospital.

In January and July this Hospital took part in the practical examinations of the National Board of Medical Examiners.

The growing importance of the transfusion of blood to both medical and surgical patients has made it desirable to have this operation under the control of an expert in transfusion. At the request of the Medical Board, the Board of Governors has established a new position—that of Specialist in Transfusion—and the Hospital has been fortunate in securing Dr. R. E. Stetson for this office. A list of donors is kept, on which the blood groups to which each donor belongs is recorded. Thus much time is saved in emergencies in finding suitable blood for all classes of patients. It is natural that these professional donors must be paid for their services. A beginning has been made in the collection of a fund donated by various friends of the Hospital to make it possible to hire a donor for patients who are unable to pay. This fund is most helpful, but at present it is not large enough to meet all the calls made upon it.

The demands made upon the Department of Pathology have continued to increase to such an extent that about eight examinations of one sort or another have been made for every patient in the Hospital. Efforts to increase the number of autopsies performed have made possible the examination of about 43% of the bodies of patients who have died. The importance of this can scarcely be

overestimated because of the great help in diagnosis and the knowledge of therapeutics that may be gained from these examinations.

The X-ray Department still suffers from a lack of adequate facilities for the proper care of patients who are not in residence in the Hospital. Conditions, however, have been much improved by remodelling the space devoted to this Department, and adding to it a room that formerly was part of the Children's Ward. Two dressing rooms with toilet facilities and lockers were installed. The new room has been devoted to deep X-ray therapy and space has been found for an office and consultation room for the Roentgenologist. Some of the older apparatus has been replaced by machines and tables of a newer type. A new system of filing films has been installed, which makes them more accessible. The magnitude of the work of this Department may be appreciated from the fact that 14,737 cases were examined during 1925. The administration of X-ray treatments for therapeutic purposes continued to gain in importance and in the number of cases treated.

Heretofore when photographic records of various lesions and diseased conditions have been needed, it was necessary to call upon a photographer from outside the Hospital. Plans are being formed by which this work will be done in the Hospital by the X-ray Department. It is hoped that this will not only reduce the cost of photographs, but by making it possible to have the pictures taken promptly will allow much greater use of this valuable form of record.

The Department of Urology continued to increase its activities. During the year two hundred and fifty-five major operations were performed and over thirteen thousand cases were treated in the Out-Patient Department.

Throughout the Hospital an improvement in anesthesia has been marked by the increased use of ethylene gas, and of local and regional anesthesia.

In the Out-Patient Department a new class devoted to mental diseases has been established by the staff of Bloomingdale Hospital. This class by making careful mental examination, and giving advice, offers help to patients from a large group for whom little provision is made in the Dispensaries of this City. It is obvious that the activities of this Department will increase as its existence becomes more widely known.

Dr. Frederic W. Bancroft resigned from his position of Associate Attending Surgeon in the Second Division after ten years of devoted service, and Dr. McGowan and Dr. Garlock were appointed to the staff of the Second Surgical Division.

A list of the publications during 1925 of the members of the professional staff of the Hospital is appended:

- DR. W. W. BEATTIE: "Paradoxical Embolism Associated with Two Types of Patent Foramen Ovale." Bulletin No. XI, International Association of Medical Museums, pp. 64-75, 1925.

President.

EDWARD CUSSLER,
Secretary.

REPORT OF THE TRAINING SCHOOL FOR NURSES FOR THE YEAR 1925

To the Board of Governors of the New York Hospital:

GENTLEMEN:—I beg to submit the forty-eighth annual report of the School of Nursing.

The closing year registers the following staff on duty in the Hospital:

Directress.....	1
Assistant Directress.....	1
Instructor.....	1
Night Supervisor.....	1
Supervisor, Out-Patient Department.....	1
Supervisor, Private Patients' Pavilion.....	1
Charge Nurses, Surg. and Med. Divisions of Hospital Wards.....	7
Charge Nurse, Children's Wards.....	1
Charge Nurse, Admission Wards.....	1
Charge Nurses, Floors of Private Patients' Pavilion.....	3
Operating Room Staff.....	5
Brady Urological Department:	
Supervisor.....	1
Staff, Graduates on General Duty.....	6
Instructing Dietitian.....	1
Total Number.....	31

The number of students in the School is as follows:

GRADUATING CLASS OF 1925	
Remaining for completion of time.....	10
SENIOR CLASS, 1926	
Number reported last year.....	23
Resigned.....	2
Disqualified.....	3
Remaining.....	18
INTERMEDIATE CLASS, 1927	
Number reported last year.....	29
Resigned.....	3
Disqualified.....	4
Remaining.....	22
JUNIOR CLASS, 1928	
Entered 27; resigned 3; remaining.....	24
Affiliated Pupils:	
Bloomingdale Hospital School of Nursing.....	9
French Hospital School of Nursing.....	3
White Plains Hospital School of Nursing.....	3
Lebanon Hospital School of Nursing.....	1
	16
Total Number of Students.....	90
Graduate Nurses on General Duty.....	11
Total.....	101

Although we have been able to keep abreast with the activities of our busy hospital service during this year, the unrest that has made itself felt throughout the whole universe has also invaded the ranks of nursing. Possibly the youth of many of our nurses has had a tendency to make our staff less stable, for the numerous changes of the head nurses of the wards and the operating-room staff have caused the management of our department to be very complicated.

The young women of this day and age are too progressive to settle down to the direction of one ward for from six to eight years as of old. They are on the alert for professional and financial advancement, and rightly so; nor can we sit by with folded hands and watch the procession without great detriment to our Institution. Some plan of adjustment must be made whereby we may continue to maintain the high standard of service we have always rendered to our patients. It is possible that a better or maybe a different method of supervision should be introduced for the development of a more complete correlation of services.

Notwithstanding the foregoing I must say a word in favor of the youth in our ranks. They have brought to us buoyancy, vigor and joy unrestrained; and with the ballast of the older and steadier personnel there exists a splendid spirit of happiness and loyalty. Much of this is also due to the good health of the nurses and the secret of this result may be attributed to the thoughtful consideration of our dining-room service. There has been very little illness this year and each case is only of few days duration, with the exception of three nurses who suffered through long illness — one with a tedious Cardiac condition covering fifty-four days, with subsequent resignation from the school; one with Facial Erysipelas for twenty-one days; one with Arthritis for forty-two days, with an apparent complete cure after Tonsillectomy. One other had Scarlet Fever and although her illness only lasted a few days her quarantine covered thirty-five.

The following is an interesting comparison: Of the eleven students who affiliated this year with Willard Parker Hospital for Communicable Disease Service, one contracted Diphtheria; whereas at the home school five contracted contagious diseases through unknown causes, one Diphtheria, one Scarlet Fever, one Chicken-pox and two Measles. These illnesses usually occur during the early months of training but the day is near when everyone will be protected against these diseases through immunization. All students are required to be vaccinated against Small-pox and Typhoid Fever before entrance to the school; and on admission, if their Schick and Dick tests show positive reaction, they are immunized against Diphtheria and Scarlet Fever.

The room in the Private Patients' Building assigned to sick nurses has only been occupied by students for 154 days and 276 days by graduates.

We report with regret the loss of two of our graduates: Delia Louise Baker, Class 1886, died April 9th.; Mabel King Knudsen, Class 1913, died August 31st.

The Graduation Exercises of the Class of 1925 were held in the Administration Room on the evening of March 4, Mr. Edward W. Sheldon, President of the Board of Governors presiding. After the Invocation, Dr. Nellis B. Foster, Attending Physician of our Medical Staff, delivered a most stirring address to the class, in which he traced the history of the treatment of patients from the age of superstition and witchery down to the present day aseptic method of caring for the sick, showing that this development had opened up a broad field of action to those who enter the profession of nursing. Mr. Sheldon addressed the class and presented the gold badges and diplomas. At the close of the exercises the nurses entertained their friends at supper which was followed by a dance in the nurses' residence.

Our nurses have been most fortunate in receiving as gifts two radio sets, one being installed in the reception room of the Nurses' Home and the other in the Junior residence. This kind thoughtfulness of their friends has afforded the nurses many hours of enjoyment.

Although probably not more handicapped than other departments of the institution, each year increases the need for greater and better accommodation for our students and more adequate facilities for their instruction.

In closing, we acknowledge and sincerely appreciate the hearty coöperation of all departments.

Respectfully submitted,

M. H. JORDAN,
Directress of Nurses.

COMMITTEE TO THE SOCIAL SERVICE DEPARTMENT
FOR THE YEAR 1925

EXECUTIVE COMMITTEE

Mrs. Walter Jennings	<i>Chairman</i>

Respectfully submitted,

MRS. R. HORACE GALLATIN,

Treasurer.

REPORT OF THE SOCIAL SERVICE COMMITTEE, NEW YORK HOSPITAL, 1925.

To the President and Governors of the New York Hospital:

GENTLEMEN:—The Social Service Committee take pleasure in presenting their thirteenth Annual Report. Although their work has changed a little in method, in kind it is the same. The economic situation of the patients, where the wage earner is working steadily, shows improvement over last year in spite of high rents and coal shortage. When all goes well no pecuniary assistance is needed, but when the wage earner is ill the family often requires a loan to pay rent, insurance or gas bills.

It is a great assistance to give milk to the families where that is a luxury, and, in the cases of incipient tuberculosis, it is a necessity. The Milk Fund established and supported by Mrs. Whitney has given 16,521 quarts of milk to many who would otherwise have had much less. The preventive work has now been established long enough to prove its value, and Dr. Mersereau, of the Tuberculosis Clinic, is pleased with the results and feels it is an important work. Mrs. Treadwell is Chairman of the Committee and she and her Committee deserve great praise for the splendid work they have done. The nurse, Miss Allen, holds clinics semi-weekly, also visiting the children in their homes and talking with the mothers. The Church of the Holy Communion has very kindly given the use of a large cheerful room, and one of the members of the Committee is always in attendance to amuse the children who are waiting their turn. Most of the children have had tuberculosis contacts, but, by judicious feeding and fresh air, they are frequently prevented from developing this dreadful disease.

Our fresh air work, although somewhat smaller than last year, shows a total of 502 children sent to the country. As the examination of these children has always been a great strain on the Hospital doctors, the Committee now engages a doctor to come in and give each child a thorough examination. The Children's Aid Society gave 70 boys an opportunity to enjoy their wonderful camp. Mrs. Clarence Hay entertained nine undernourished children for eight weeks at her cottage at Newbury, and sent them back sound and healthy. Mrs. Browning took 47 little girls to her Rye Beach cottage. The A. I. C. P., *Christian Herald*, *Life*, and *Tribune* Funds took 376 children. Sixty of the children already mentioned were entertained at Holiday House, Huntington, Long

Island, a favorite place with them. Including children for our Campbell Cottages, 835 were examined before going away this summer. The organizations mentioned have given the best care and food to all these children, and their improved health must be the reward of the managers and workers of these various organizations. Miss Ellison and her staff are unfailing in their efforts to help, and Burke Foundation confers an inestimable privilege on those permitted to accept its hospitality. Through the efforts of the Social Service Department, 1,215 convalescent cases were cared for at Campbell Cottages and Burke Foundation this year.

A worker for the Mental Clinic was added to our staff in April last year, and has shown the necessity for her appointment by the number of cases treated and her ability to deal with them satisfactorily.

The Library Committee have done good work in reorganizing and cataloguing the books, and all praise is due Mrs. Dineen and Miss Gawtry for the time and skill they have given the work. The service is now entirely voluntary; Miss Hunter, our paid Librarian for many years, has been obliged to retire owing to ill health.

Miss Elizabeth Ruhr, in memory of Mrs. Frank Sturgis, has almost doubled her generous gift of previous years. We have gratefully received from her 62 layettes, composed of 15 articles each.

Our Day and Night Nursery was closed last autumn, as the Sunnyside Day Nursery, due to increased attendance, required their house in which our Nursery has been for the past three years. The Nursery Committee have on hand a sum of money which enables them to pay for any children requiring such care at suitable institutions.

The Home Economics group has adopted the name "Good Citizens Club," and Mrs. Allien has provided excellent instruction in City Government, etc. Now that the women have a vote, they seem to feel a real responsibility in using it.

Nine student nurses from our Training School have been with our Social Service Department this year, and their experience in this will, we hope, help them materially. One of the examination papers contained the following definition of medical social service:

"Medical social service is a branch of hospital service working in close coöperation with and as a requisite part of the medical world at large, administering prevention, emergency, convalescent and permanent aid to the sick and needy through educational, clinical and financial methods."

Mrs. Hitzrot and Mrs. Farr continue to supply from their sewing class rompers, etc. for the children's ward which the Hospital finds most helpful.

The usual baskets were packed at Thanksgiving and Christmas. About four hundred children were entertained at three Christmas Tree parties. We are very grateful to the Managers of the Margaret Louisa Home for inviting us to use their beautiful room for our tree and the parties.

It is with an expression of sincere admiration for the efficient work of this Committee that I must close this report. "The half has not been told," but this brief outline will help to explain the many ways in which the Social Service Committee can be of use. As for the individuals composing this Committee, I have nothing but praise. The nurses on the staff, the volunteers, and the members of the general Committee, conscientiously do their best, and the officers and nurses of the Hospital are always ready to lend a helping hand.

The Committee beg to thank the President and Governors for their cordial coöperation in every effort of the Committee to be of use to the community.

Respectfully submitted,

JEAN BROWN JENNINGS,

Chairman Social Service Committee,

New York Hospital.

STATISTICAL REPORT OF NEW YORK HOSPITAL SOCIAL SERVICE DEPARTMENT

January 1st, 1925—January 1st, 1926

* Refers to previous admission to any hospital for mental disorders.

It will be noted that the number of patients treated was almost the same as during the previous year, 599 in 1925 and 597 in 1924. The number admitted was exactly the same, 290, and the number discharged just equalled the number admitted, or two more than

during the previous year. An increasing demand for service was, however, shown by an increase in the number of applications from 614 in 1924 to 719 in 1925.

ADMISSIONS

Of the 290 patients admitted, 139 were men and 151 were women. Five persons were admitted twice during the year, and 34 changed their legal status from voluntary to committed or the reverse, so that the number of persons actually received was 251.

The diagnosis table is, as in previous years, in accordance with the classification adopted by the American Psychiatric Association and the National Committee for Mental Hygiene.

The character of cases presented nothing strikingly different from those of other recent years. Again the number with gross organic brain disease was quite small, amounting to only 3.5 per cent of the total admissions. Only one case of general paralysis was admitted, and it is noteworthy that the number of applications for the admission of cases of this form of disease has greatly diminished. The number of cases of alcoholism was considerably increased above that of the previous year, especially of those suffering from alcoholic psychoses. The total number is, however, not large enough to permit of general conclusions.

Thirty-seven of the patients admitted had received treatment at the hospital on one or more previous occasions, and a number of them had received treatment at other hospitals. Seven of those under commitment were received by official transfer from other institutions. About half of the total cases gave a history of one or more previous attacks. One hundred and ninety-eight, 68 per cent of the admissions, had presented recognizable signs of mental disorder for less than a year. The establishment of out-patient clinics, where persons suffering from mental disorders may receive treatment, and the advent of psychiatrists into private practice may eventually bring about a more favorable attitude toward hospital treatment. Close relationship between the various agencies working in the field would, therefore, be very advantageous. Unfortunately, the hospitals have been so long regarded and used as places of last resort that much prejudice and misconception must be overcome before they will be enabled to render the service required.

The average age of the patients admitted was 37.9 years for the men and 38.5 years for the women. This is approximately what it has been for several years. Twelve were under twenty, three of whom were about sixteen. Applications for the admission of children are not encouraged, as their association with adult patients is not always beneficial, and separate provision has not yet been made for them. With the growing appreciation of the advantage of applying to psychiatrists for help in dealing with the problems of children and adolescents, a field of service in early treatment and preventive work is opening up that would require quite special provision. Ninety-seven, or about one-third of the cases admitted, were under thirty and 165, constituting 57 per cent of the total admissions were under forty.

The occupations of the patients admitted were, as in previous years, principally professional and commercial. It is noteworthy that 20 were still students in school or college. Sixteen were teachers in schools or colleges. Five were physicians, and nine

BLOOMINGDALE HOSPITAL, WHITE PLAINS, N. Y.

were lawyers. Of the self-supporting women, 21 were occupying business positions. Seventy-eight, or over half of the women, were married and supported by their husbands.

As in previous recent years, the proportion of patients who signed their own applications was quite large, constituting about 70 per cent of the admissions. It is significant that five patients who came to the hospital under legal commitment decided, after admission, to sign their own applications as voluntary patients. In view of the consideration that the question of voluntary admissions to mental hospitals is now receiving in this and other countries, it seems pertinent to sum up again the experience of the Hospital for a period of more than ten years. During this period over 2200 patients have been admitted on their own applications. No serious embarrassment to patients or Hospital has been experienced, and the advantages to the patients and their friends have been very great. The policy that has been followed has been to resort to legal restriction only when it was clearly required to protect the patient and to furnish legal authority for detention that could not be properly dispensed with. The well-organized system of State supervision of licensed institutions that prevails in New York State furnishes ample protection against improper detention. In 29 instances during the year it became necessary to place under legal restriction patients who, when received, had signed their own applications.

DISCHARGES

The total number of patients discharged during the year was 290, of which 141 were men and 149 were women. Of these, 53 were fully recovered, 36 were much improved, and 68 were improved. These 157 patients constituted 54 per cent of the total number discharged. Forty-three were discharged without having improved. A number of these, and of those transferred to other institutions, were cases that had been at the hospital for several years and were, in accordance with the policy of the hospital, removed to make room for new admissions. Twenty-three were transferred to other institutions. Thirteen died, constituting two per cent of the total number of patients treated.

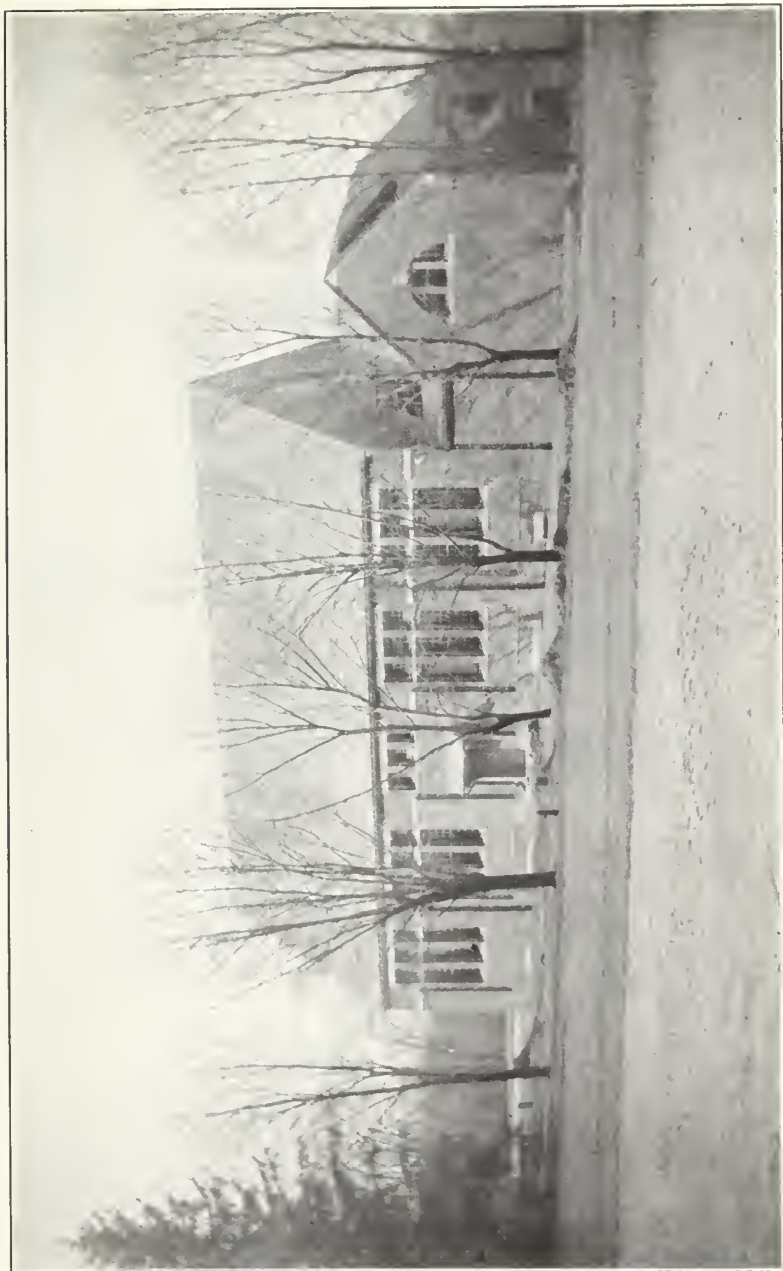

The average period of treatment in the Hospital of those who were discharged as recovered was seven and a half months, and of those much improved about nine months. Eleven of the recovered cases had been at the hospital for more than a year, three of them for over two years. At the close of the year 39 patients who had left the hospital during the year were still on the books. A large proportion of these patients were kept under observation

and advice by means of visits to the Hospital physicians either at White Plains or at the New York Hospital. The visits to the New York office numbered 91, and to the Hospital at White Plains 189. As this service is extremely valuable in completing the personal and social adjustment of the patients, it seems advisable to direct attention to the advantages that would result from organizing it more adequately. It adds considerably to the work and responsibilities of the physicians, and is furnished without charge.

CLINICAL SERVICE

Although the changes in the medical staff have been many, it has, fortunately, been possible to fill vacancies promptly and a strong clinical service has been maintained. The visiting physicians from the New York Hospital Staff have, as in previous years, been of great service in aiding in the maintenance of clinical standards in internal medicine and urology. It has been necessary to call upon the consulting specialists constantly, and, as heretofore, the service that they have promptly and skillfully furnished, has been of great advantage to the individual patients and to the standards of the Hospital. We wish again to express appreciation of the coöperation of the administrative, clinical, and laboratory staffs of the New York Hospital in dealing with various problems, and of the kindly and skillful attention received by patients, employees and staff members who have been transferred to the New York Hospital for study and treatment.

Employees' Clinic. The out-patient clinic for employees has continued to prove its usefulness. Now that the clinic has been well organized and the employed force of the Hospital pretty fully examined, it is noteworthy that the number of visits to the Clinic fell from 1172 in 1924 to 855 during the past year. It is hoped that the systematic care of the health of those employed at the Hospital that has been undertaken, may promote their welfare and reduce the prevalence of illness. The number of cases that visited the Clinic during the year was 457. Two hundred routine physical examinations were made. Fifty-seven of the employees suffered from illness that confined them to bed, and three of the members of the medical staff were obliged to seek treatment at general hospitals. Considerable preventive therapy was employed. Nine were vaccinated against smallpox, nineteen were given typhoid-paratyphoid vaccine, seven diphtheria toxin-antitoxin, two tetanus antitoxin, and six were given the Slick test. A large number of X-ray examinations and laboratory tests were made for sick employees. A number of minor surgical operations were done. The visiting and con-

THE ROGERS GYMNASIUM—BLOOMINGDALE HOSPITAL

sulting internists and specialists examined many of the cases, and a number were referred to general and special hospitals for treatment.

New York Hospital Psychiatric Clinic. As the medical service for this Clinic is furnished by Bloomingtondale Hospital, the following, from the report of Dr. Henry, the Physician in Charge, will be of interest. The Clinic was opened in April 1924, so that the operations of a full year may now be reported for the first time. The number of visits to the Clinic was 377, of which 144 were new. About half of the patients were referred from other out-patient clinics and the hospital wards. During the latter part of the year a few cases were referred to the Clinic by the courts. A considerable number were referred by private physicians. The service of the Clinic was greatly improved during the year by the appointment of a trained psychiatric social worker. Three of the hospital physicians are now on the Clinic staff. The Clinic is open on Tuesday and Thursday afternoons. The average number of patients examined daily is four. The character of the work is such that much more time is required for examination and treatment than in other departments of medicine. The social service work is similarly different. Owing to the necessity of private interviews, it is necessary that each physician and the social worker be provided with a separate office. A psychiatric clinic, therefore, to do a corresponding amount of work, requires larger accommodations—and a larger staff than any other clinic. The space at present available is so limited that no effort has been made to increase attendance. It is evident, however, that even without this, the present quarters will soon be quite inadequate. A statistical statement may be found in the Appendix.

The surgical work required by the patients during the year included 18 operations of major character. Eight tonsillectomies were done, 3 gastrotomies, 3 appendectomies, one prostatectomy, and 3 others. Some of the cases were sent to the New York Hospital, some to the White Plains Hospital, and in some instances the operations were performed in the Hospital operating rooms. Seventy-three minor operations were also required. As in previous years, the Hospital has relied principally upon Dr. J. Fielding Black of White Plains for surgical attention. He made in all 57 visits to the Hospital during the year. The consulting specialists were also called upon frequently. Most of the oto-laryngological work was attended to by Dr. Richard W. Moriarity of White Plains. Dr. Frank H. Knight of White Plains also attended, however, some of the cases of throat and ear diseases. Dr. Frank N. Irwin of White Plains, who has been long connected with the hospital, did

practically all of the ophthalmological work required. All of the members of the visiting and consulting staffs have been most attentive, and when circumstances required have given their services with little or no charge. The total number of visits to the Hospital was 189. Patients also visited the private offices of the consulting specialists 82 times.

There have been no important changes in the dental department during the year. Dr. Sniffen has continued in charge and the remarkably efficient manner in which the department has been conducted, and the tact and skill displayed in dealing with difficult patients, are creditable to him and of great advantage to the Hospital. There are now two assistants in the department, a dental hygienist and a clerical and chair assistant. The number of new patients examined during the year was 278, and 382 others were examined in accordance with the periodical system of examinations made of all patients. The total number of patients' visits to the dental office was 1776. The total number of operations and other dental procedures was 3644, which was about 1000 more than during the previous year. A statistical statement is appended to this report. Two articles were contributed from the department during the year. One by Dr. Sniffen, entitled "The Importance of Radiographing all Teeth for Diagnostic Purposes," was published in the Allied Dental Society's Bulletin for August 1925. The other, entitled "Dental Hygiene at Bloomingdale Hospital," was read by Miss Donehue, the dental hygienist, before the State Dental Hygienists' Association in May 1925.

LABORATORIES

The work of the clinical laboratory has again been increased. The number of determinations made during the year was more than 1500 above that of the preceding year. The output of this laboratory has increased 300 per cent during the past five years. The following table gives detail of the work attended to:

Some new equipment was added to the laboratories during the year. A Victor air-cooled ultra-violet lamp was added to the therapeutic equipment, and is operated under the supervision of the laboratory.

In addition to the routine work, some time and effort have been devoted to research work in the laboratories. Following an X-ray study of gastro-intestinal conditions associated with mental disorders, which was referred to in last year's report, during the year just passed a special study was made of the gastro-intestinal functions in dementia praecox. Fifty-one cases were studied and comparison was made with the findings in other types of cases. The observations made were quite significant, and were reported by Dr. Henry at a meeting of the Association for Research in Nervous and Mental Diseases in December 1925. A study made in the clinical laboratory was to determine the calcium and phosphorus content of the blood in personality disorders, and the effect of ultra-violet radiation upon the relative amounts of these substances in the blood. An article describing this work has been accepted for publication by one of the neurological journals. In June 1925, an article by Dr. Henry, based on a bio-chemical study of several hundred cases, was published in the Archives of Neurology and Psychiatry.

These valuable studies were engaged in along with the full schedule of routine work which must be attended to in the treatment of patients. A special fund for research could be used with great advantage as a means of supporting work of this character.

THE NURSING SERVICE AND SCHOOL

Notwithstanding continued difficulties, the nursing standards have been maintained during the year and some progress has been made. A substantial increase in salaries was made, and by advertising and correspondence graduates of other schools and candidates for training were attracted to the Hospital in larger numbers.

In order to secure more special attention and responsibility for the training of men, Mr. W. C. Roden, one of the supervisors, was during the year appointed as an assistant to the Directress of Nurses, and placed in charge of the male students. Four were enrolled in the three-year course, and an affiliation with Bellevue Hospital was made for part of the course leading to the R.N. qualification. The total number of students in training, both men and women, at the end of the year is 29. Further particulars concerning the School of Nursing are given in the report of the Directress, appended.

The welcome news of a gift of \$100,000 toward the cost of separate residences for the nurses and other personal service groups, was received with much joy and gratitude to the generous friend. As the building most needed should be large enough to accommodate 50 students, and as the main cost of subway connection, service lines, roads and walks for the whole development contemplated will have to be provided with the first unit, it will be necessary to add to the fund before construction can be undertaken. It is hoped, however, that with such a good start, means of proceeding will be provided during the coming year. Nothing that could be done would contribute more certainly to the advancement of the nursing service and the School of Nursing than a suitable Home, where the students and nurses would find rest and refreshment quite away from the patients with whom they live in intimate relations during their working hours. This is the outstanding need of the Hospital.

PHYSICAL AND OCCUPATIONAL THERAPY DEPARTMENTS

In the departments of physical therapy the outstanding event was again the completion of a new building for physical exercises and games. The Taylor Recreational Building for the women, a gift of remarkable beauty and value from the late Henry R. Taylor, is now ready to be used. The Rogers Gymnasium for the men has, during the past year, been used with great advantage by both patients and employees. The advance in the number of bowling events from 3720 in 1924 to 14,437 in 1925 is an indication of the increase in recreational activities. The improved facilities have made it possible to carry on the work of physical rehabilitation with greater system and precision. A similar or even greater advance is likely to be made by the women's department.

The total number of patients enrolled in the departments of physical education during the year was 444, of which 206 were men and 238 were women. Details of the activities engaged in may be found in the statistical table appended. The departments

have also, as in previous years, had charge of the entertainments and the organized social life of the patients. As the main object of treatment is social adjustment, the benefit derived from well-directed social and recreational contacts and participation in events is of great value. Instruction in the employment of physical exercises, games and sports, and social entertainment in the treatment of the sick, was during the year given to 38 nurses. The resources of the departments, including the services of the instructors, were also placed at the disposal of the employees of the Hospital and were extensively used.

Occupational therapy is a therapeutic resource of incalculable value, and the effort and expenditures that have been devoted to developing departments for its application have been justified by the results accomplished. The annual statistics of the numbers of patients employed and of the articles produced convey little conception of the vast good accomplished in improved physical condition, reviving courage and interest, and in readjustment to wholesome personal and social activities. The statistical table in the appendix to the report displays the operations of the departments as far as this is possible by means of figures. The total number of patients who came under occupational treatment during the year was 492, of whom 232 were men and 260 were women. This number constituted 82 per cent of the total patients treated at the Hospital. The number of articles made or mended was 25,333, of which the men produced 10,301, and the women 14,622. In addition, the printing shop, in which some of the most intelligent patients find agreeable employment, turned out 425,260 pieces of printed matter. Gardening and other outdoor occupations, such as the care of lawns, game fields and courts, were also engaged in. Considerable outdoor construction was also undertaken as a form of occupational treatment. A cement fountain was constructed, tennis courts were resurfaced, cement benches were set up, trees were chopped down and cut up for timber. It is found that, as a rule, the production of articles of actual value and usefulness gives most satisfaction and accomplishes most as a treatment measure. Instruction in occupational therapy was given during the year to 53 students, of whom 42 were nurses and 9 were in the course for the training of occupational therapists.

Massage, hydrotherapy, and other forms of physiotherapy were employed as heretofore. A violet-ray lamp was added to the equipment. Fifty-two women were given 657 treatments with the light, and 57 men 432 treatments. The statistics of the department may be found in the appendix. Instruction in massage and hydrotherapy was given to 44 students.

ROCKLEY COTTAGE

Rockley Cottage, at Oakland Beach on Long Island Sound, was open from June 1st to October 24th. The number of day parties to the Cottage, during the season, was 78, and the total number of patients who participated was 608. Forty-five different patients remained in residence at the Cottage for an average period each of 32 days. The average daily number in residence was eight. Members of the medical and nursing staff, and others among those employed at the Hospital, also enjoyed the advantages of the Cottage and 62 stayed for one or more nights. One or more meals at the Cottage and the use of the bath house were enjoyed by 58 others.

The cost of maintaining the Cottage, exclusive of overhead expenses at the Hospital and the services of the physicians, was \$6,515.36. The income from patients was \$3,606.29.

Rockley Cottage was built by the Society in 1911, and every summer since then has proved a most valuable source of pleasure and benefit. It afforded the means of providing a change from the more confining and rigid régime of the Hospital and a restoration to a home-like environment. The moral effect of this, and the invigorating sea air, bathing, and sunshine, resulted in many instances in a striking improvement in the patients. It was not without regret, therefore, that it was decided that it would be advisable to dispose of the property and seek a new summer home elsewhere. This was necessitated by the extensive development of the adjoining property as a public bathing resort. Fortunately, a more attractive water front property, with larger grounds for recreation purposes and a private beach, has been secured at Orienta Point, Mamaroneck, and it is expected that the superior advantages will be available next season.

EDUCATIONAL WORK

The educational work of the Hospital is scarcely extensive enough to require a separate section in the report. It is so important, however, and could, we believe, be advanced so advantageously, that it seems advisable to invite special attention to it. Except in the nursing department, in which two instructors are employed solely for teaching, the educational work is carried on by the physicians, directors, and assistants of the departments in connection with their regular duties in the study and treatment of the patients and the administration of the Hospital. The extra effort is willingly undertaken, as the advantages to the service and

to the individual are clearly recognized. It is also realized that, if persisted in, it will advance to a point at which it can be more adequately organized and receive definite support.

The four medical staff conferences a week, at which the cases admitted to the Hospital are presented, have the value of educational clinics. The visits of the internists and the X-ray readings also furnish educational opportunities to the members of the staff. No formal courses for physicians have, however, as yet been undertaken, though the opportunities for advancement in psychiatric knowledge and skill furnished to young members of the staff are quite good. New books are constantly added to the library, and an excellent file of general and special medical journals is available.

The School of Nursing gave instruction to 75 students during the year. The Central School, in which the White Plains Hospital, the United Hospital at Port Chester, the New Rochelle Hospital, and the Mt. Vernon Hospital have united with Bloomingtondale Hospital for the employment of a highly qualified instructor, is conducted in the school building of the Hospital. A class of nearly fifty students is in attendance there. No charge is made for the use of the building and its equipment. It is believed, however, that the contact with other schools is helpful and of advantage to the advancement of the work the Hospital is engaged in and of the field of psychiatry.

In the dietary department 14 students were given instruction, 6 of whom were student dietitians and 8 were nurses. Instruction in the use of physical exercises and games in the treatment of the patients was given by the departments of physical education to 38 student nurses. The six months' courses in occupational therapy offered by the Hospital to students who are sufficiently qualified in arts and crafts, have attracted a considerable number of women applicants. Eleven were admitted to the course in the women's department. Instruction was also given by the departments to 42 of the student nurses in training at the Hospital.

There can hardly be any question as to the value of the educational work now engaged in by the Hospital. The need of work of this kind, not only for the advancement of the standards of the Hospital, but for the advancement of psychiatric service generally, is very great. The work at the Hospital was started many years ago in an effort to improve the quality of the nursing service. In all, 497 nurses have been trained and the character of the courses given has, in recent years, been greatly improved so as to include, by means of affiliations, a broad training in general as well as special nursing. The courses in the dietary and occupational

therapy departments were established much more recently. Fifty-two occupational therapists have, however, been given systematic training, and 17 dietitians. Altogether, enough has been done to demonstrate the possibilities and the value of the educational work of the Hospital, and its further development would be in the nature of a much needed public service.

That the organization is possessed with the spirit and aim of education is, in some measure, indicated by the publication, during the year, of two textbooks — one on occupational therapy, of which Mr. Haas, the director of the men's department of occupational therapy, is the author; and the other on psychiatry for medical students, physicians, and nurses, of which Dr. Henry, the director of the laboratories and the out-patient clinic, is the author.

IMPROVEMENTS IN PLANT AND EQUIPMENT

The year has been marked by notable additions to the structural equipment of the Hospital. The Staff House for the physicians, presented by Mr. Whitney, was occupied in June 1925. It has proved to be a most attractive and valuable addition and should contribute substantially to the maintenance of a stable medical organization. The removal of the physicians to the new building has released quarters that may now be used to provide more adequate accommodations for the supervisors and directors of departments.

The completion of the Taylor Recreational Building was also accomplished during the year, although it seemed advisable to defer the opening for a short time. This building follows rather closely the dimensions of the Rogers Gymnasium. It is, however, architecturally quite different. It presents the appearance of an old English hall, with large leaded glass gabled windows and timber work in the brick. Its outside dimensions are 130 feet in length, and a width of 60 feet with an extension of about 14 feet at each end. The main hall is, as in the men's gymnasium, 90 feet long and 50 feet wide. There is a smaller room adjoining, 30 feet long and 15 feet wide, for individual and corrective work. The other rooms on the main floor are a storeroom, the director's office, and a small kitchen. The steel trusses of the roof are enclosed in wood and present the appearance of timber beams. The side walls are panelled. There is a gallery at each end, the fronts of which and the space above to the peak of the roof are plastered and panelled. There is a lobby at the main entrance, with a flag floor the joints in which are embellished with fragments of colored tiles embedded in the cement. The basement is above ground on

the west side, and lighted by means of areas on the east side. It contains a wide corridor, a large shower and locker room, a toilet section, a room for games such as pool and billiards, a long vacant room which may later be fitted as a bowling alley or used as a golf room, and several storerooms. The building is connected by a corridor leading from the basement to the main hospital building. It is equipped for games and sports, and for gymnasium exercises of various kinds. An extremely valuable addition to the treatment resources of the Hospital has been furnished in this beautiful gift, and its use will at once raise to a higher level the work of the physical education department. It is a source of deep regret that the kind heart of the donor was stilled by death before he had an opportunity to see the building in operation.

A notable event of the year was the installation of a 500 horsepower water tube boiler to replace the three old ones removed. A new carpenter shop was erected and furnished with some new power equipment. Many minor improvements were made. One of special significance to the health and contentment of all at the Hospital was the devising by our own mechanics of a better food distributing system by means of insulated containers. The problem, which had previously been submitted to the principal equipment experts available, seems to have been solved. Further progress was made in the renewal and extension of the bath and toilet sections. Twenty rooms were finished during the year, leaving about 22 to complete the project. The total expenditure thus far has been \$136,000, of which \$82,000 was provided from current income. An additional connection with the White Plains water system, the renewal of several of the concrete walks in the women's grounds, and the placing of lights through the woods to the Mamaroneck Avenue gate, are other noteworthy items. A considerable number of trees near the hospital buildings were cut down or transferred in order to afford freer access of light and air to the windows and to relieve crowding that was interfering with the beauty and growth of the trees that were retained. Other improvements, requiring comparatively small expenditures in each instance were also made.

NEEDS

The gift of \$100,000 for a Nurses' Home that was received during the year brings nearer to realization the satisfaction of a want that has been felt with growing acuteness. Generous though it is, larger amounts will be necessary before an adequate start can be made. The personal service organization of the Hospital consists not only of student and graduate nurses, but also of occupational,

physical, and other special directors and assistants, and is so large and so varied that a group of buildings will probably prove more satisfactory than one large building. The most urgent present need is for a students' residence, which would be the largest of the group. The connections and facilities for this building should be adequate for the whole group, and the expenditure would, therefore, be relatively larger than would be required for the erection of the other buildings. It is hoped that during the coming year the fund will be increased so as to permit of a start being made in this much needed development.

Extensive renewals occasioned by the age and depreciation of the plant continue to be necessary. During the past year a study of the steam distribution for heating was made by Tenney and Ohmes, consulting engineers. The recommendations made would, if adopted, probably add to the efficiency of the plant and should be given careful consideration. A similar study of the lighting system would also be of advantage. Most of the wiring and fixtures were installed thirty years ago, and it would probably be advisable to revise the whole system. The additional buildings have also increased the load on the dynamos and a new one will soon be needed.

The rapid increase that is taking place in the population of White Plains, especially in the vicinity of the Hospital, is developing conditions that may necessitate regulations and protective measures that have not heretofore been required. The picket fence around the property is no longer adequate, and it would be advisable to replace it with a more secure and durable fence or wall. The advent of the automobile has also created problems that require attention. The number of visitors to the Hospital is so large, amounting to over 1200 a month to patients alone, that the traffic through the grounds and the parking space required have increased enormously. A paved driveway to the main entrance has apparently become necessary. A study of the situation should probably be made by a landscape architect for the purpose of determining the best plan to follow in providing parking space for the increasing number of cars at the Hospital on visiting days. It would seem to be advisable also to place the electric wires underground and to extend the outside lighting system.

At the monthly meetings throughout the year, the attention of the Committee has been directed to many needed renewals and improvements that were required by reason of deterioration and the progress of the work. Appropriations have been made by your Board when recommended by the Committee, and a constant effort has been made to maintain the character of the plant and

the standards of service. In order to maintain standards, however, it is necessary not merely to prevent deterioration but also to keep pace with the requirements of a rapidly progressing branch of medicine and social service. Such great progress has been made that further development of the resources of the Hospital and extension of the work by means of a department in the city, along the lines that have been discussed in previous annual reports and in special reports, could be made with advantage.

FINANCIAL

The cost of maintenance advanced more than seven per cent over the previous year. The increase in salaries and wages was nearly six per cent, and in the cost of supplies, principally food, about ten per cent. The total expenditure for ordinary maintenance and the care and treatment of patients was \$777,513.79. This includes the maintenance of the properties at White Plains, Oakland Beach, and Orienta Point, ordinary repairs and renewals, insurance except against fire, supplies, medical, nursing and other study and treatment services, the educational work engaged in, salaries and wages, and all other running expenses. Capital charges and the cost of extraordinary renewals and improvements, for which special appropriations were received, are not included.

Of the 599 cases treated during the year, 284, or nearly one-half, were wholly or partially supported by the Society. The number treated without charge was 34, and 259 paid rates that were less than the average cost. The expense borne by the Society in the treatment of these cases amounted to \$196,962.39, which was the equivalent to the support of 69 free beds throughout the year. The number of weeks board and treatment furnished was 14,102, and the weekly per capita cost was \$55.15.

The income of the John C. Green Memorial Fund, amounting to \$8960.79 was, in accordance with the terms of the Memorial, applied to the support of eight patients.

GENERAL

Visitors. The number of visitors to patients during the year was 14,026, which was nearly 1500 more than during the previous year.

Official visits were made to the Hospital by the medical inspectors of the State Hospital Commission on March 18, June 18, October 14, and December 17.

Among the many other visitors during the year were Dr. Bedford Pierce, Emeritus Medical Superintendent of the Retreat at

York, England, and Mr. Alfred H. Taylor, a member of the Board of Governors of the same institution. Dr. Pierce very kindly gave an account of the early days of the Retreat, and spoke in a most interesting and stimulating way to a group of physicians and nurses.

Libraries. The report of the librarian shows that 383 volumes were added to the libraries during the year. Of these, 305 were to the general library, 49 to the medical library, and 29 to the nurses' library. Sixty-four copies of popular magazines (29 titles), and 42 medical journals, of which nine were in foreign languages, were received. The distribution from the general library was 9424 volumes, of which 5402 were issued to patients, 2945 to the men, and 2457 to the women. The number issued to employees was 4022. The general library now contains 4774 volumes, the medical library 1315, and the nurses' library 253, making 6342 in all. The librarian gave a course of four lectures and a number of informal talks to the nurses on the use of books and reading in the treatment of the sick.

Gifts. An additional gift of \$6643.91 for the Staff House was received from Mr. Whitney. Mr. Jennings kindly donated \$1000, of which \$250 was designated to be for the library and the remainder to be used as the Bloomingdale Committee should direct. A number of donations were made to the Nurses' Fund and for other purposes by kind friends, and various entertainments were furnished, all of which are gratefully acknowledged. The death of Mr. Henry R. Taylor deprived the Hospital of a kind friend and a generous benefactor. We are deeply affected to learn that by the terms of his will a fund of \$500,000 was left to be applied to the work here.

Religious Services. These were, as in previous years since 1819, conducted on Sunday afternoons. The services were conducted by Rev. Frank H. Simmonds of Grace Church, White Plains, and by the Rev. Roland C. Ormsbee of St. Bartholomew Church, White Plains.

The Rev. Father Richard J. Keefe and his assistants, of White Plains, have, as in past years, been most faithful in attending to the religious comfort of the Catholic patients.

Medical Staff. The changes in the resident medical staff during the year were as follows:

Dr Charles W. Stephenson was appointed Assistant Physician on June 3rd.

Dr. Robert B. McGraw resigned June 3rd to take up private practice.

Dr. Irlma Kennedy resigned June 23rd to return to private practice.

Dr. S. Spafford Ackerly was appointed Assistant Physician on July 1st.

Dr. Elizabeth Kilpatrick returned July 1st after a year's leave of absence for study.

Dr. Herbert E. Chamberlain resigned September 10th to study in Europe.

Dr. William M. Stobbs resigned September 15th to take up private general practice.

Dr. Herbert L. Fossey resigned September 17th to take up private practice.

Dr. Raymond I. Gosselin was appointed Assistant Physician September 20th.

Dr. George E. Daniels was appointed Assistant Physician October 1st.

Dr. Asher T. Childers was appointed Assistant Physician October 15th.

The many changes in the Medical Staff have added to the difficulties of the service, and I feel more than ever a deep sense of appreciation of the faithful service that has been rendered by physicians, nurses, executives, department staffs, and the employees generally.

To your Honorable Board and the Bloomingtondale Committee, I wish again to express appreciation for the generous support and wise guidance without which the success that has attended our efforts would not have been possible.

Respectfully submitted,

WILLIAM L. RUSSELL,

Medical Director.

The report for this year does not show the increased enrollment in the School that was anticipated. At the same time the large number of inquiries concerning both the three year and the post-graduate courses indicates growing interest in mental hygiene and nursing. Many requests for affiliations have been received which we have been unable to grant, due to lack of residence facilities.

The class for men students in the three year course has developed satisfactorily, and affiliation has been arranged with the Mills School of Bellevue Hospital.

The Central School opened September 15th with an enrollment of 45 students.

Three student nurses completed their course during the year and received the hospital pin and diploma. Five completed the post-graduate course and received certificates.

Dr. C. Macfie Campbell of Harvard University and Dr. Bedford Pierce of York, England, addressed large audiences in the Social Hall of the Hospital.

Nurse visitors to the Hospital have been numerous and have included groups from Henry Street Settlement, Columbia University, St. Luke's Hospital, New York City; the Fifth Avenue Hospital, New York; Johns Hopkins, Baltimore, and many local institutions and clinics.

Funds for a theatre party and a Christmas dance were provided by generous friends of the Hospital. These entertainments were much appreciated and we are glad to have this opportunity of expressing our thanks.

Miss Hearn, the Directress of Nurses, has been absent from duty during the year. Miss Hearn was seriously ill with typhoid fever and suffered for months with a post-typhoid neuritis.

It is unnecessary to say how greatly Miss Hearn has been missed and how much we are looking forward to her return in the early spring.

Respectfully submitted,

ELIZABETH FRISBEE,

Acting Directress of Nurses.

THE SOCIETY OF THE NEW YORK HOSPITAL. BLOOMINGDALE HOSPITAL, WHITE PLAINS, N. Y.

ANNUAL REPORT OF THE SUPERINTENDENT OF THE CAMPBELL COTTAGES FOR CONVALESCENT CHILDREN FOR THE YEAR 1925

To the Board of Governors:

GENTLEMEN:—I respectfully submit the eighteenth annual report of the Campbell Cottages for Convalescent Children.

The year 1925 marked the twenty-fifth anniversary of the convalescent service of Campbell Cottages, although recuperative work for adults had been carried on in a simple form prior to 1900.

From 1900 to 1915 country convalescence, on a simple scale, was provided for both men and women, but in 1907 an experimental step was taken in the admission of children, for whom portable cottages were built. The experiment proved so successful that with the erection of commodious buildings in 1908 there began what has proved to be a valuable contribution to the general health program of the hospital.

Time and experience have demonstrated that the high purpose of this branch of the hospital is constantly revealed in the sick and afflicted boys and girls who have been reclaimed.

The number of admissions was somewhat lower than usual during 1925, owing to incidences of contagion which occurred during eight months of the year, the most serious being an outbreak of diphtheria in the spring, caused by several "carriers." This represented great expense as well as a handicap to our service in curtailing the number of admissions.

There is no apparent solution to our contagion problem, but as a last precaution a new ruling has been made, requiring a nose and throat culture from all children admitted to the younger children's cottage.

Contagion usually occurs among our younger children, of whom there are about thirty under six years of age. So long as the Cottages continue to admit very young children we shall be forced to face the problem of contagion, but as some forty per cent of the children admitted are very young, and so much of the institution's best work is done among these children, it has seemed advisable to give them every opportunity the Cottages afford. Very few convalescent homes admit children under six years of age, as there are so many problems and responsibilities connected with their care.

A pleasing feature of convalescence in the Cottages is the marked *mental* as well as *physical* improvement in our boys and girls—an improvement which is frequently commented upon by their physicians and social workers in the city.

The children's Christmas is always beautiful, and has increased

CAMPBELL COTTAGES FOR CONVALESCENT CHILDREN
THE MARY SMITH CORNER IN THE SCHOOL-ROOM

in happiness owing to the kindness and generosity of both public and private friends. The children never forget their own contribution, and display unlimited enthusiasm in preparing their entertainment, practicing carols and trimming their Christmas tree.

A large extension to the courtyard has been made possible through a gift of Mr. Edwin Gould. The older children now have a dry winter playground, while the younger children can play in safety.

Extensive repairs and improvements have been made during the year. In the older girls' cottage the sitting-room walls were painted, the floor scraped and varnished, and new window shades were hung, while the gift of new pictures and a victrola has added greatly to the equipment. These improvements, added to the removal of the old partition, have transformed the two crowded rooms into a cheerful, attractive sitting-room.

The lower bathroom, with its unsanitary wooden floor and cramped accommodations, has been tiled and also refitted with new plumbing, including a shower.

In the upper wards the walls have been painted, while new window shades and new linoleum on the floors have made a great improvement in this cottage which was the original cottage for convalescent women.

In the room set aside for the girls' clothing, the walls have been painted and the floor varnished, while individual sections have been set in to hold each girl's personal clothing.

In the children's cottage, the schoolroom, playroom and sun parlor were painted, and the floors refinished and varnished. The bathrooms were tiled and painted, and new plumbing installed where necessary. The dining room has been greatly improved by new linoleum and window shades, as well as a number of new chairs.

Improvements have been numerous, but necessary, and the Cottages are now in good condition and repair.

The earnest coöperation of the Social Service Department continues as a constant and friendly support in the solving of many of our problems.

Again I have the pleasure of thanking the nurses for their years of faithful service, often under difficult circumstances, and for their admirable spirit which makes possible so many of the institution's undertakings.

In closing my report I once more have the opportunity of thanking the Board of Governors for their continued support and interest in this important branch of the hospital's service.

Respectfully submitted,
ALICE C. ELLISON,
Superintendent.

CAMPBELL COTTAGES FOR CONVALESCENT CHILDREN STATISTICS FOR 1925.

CHILDREN'S SERVICE

Children Remaining December 31, 1924.....	39	
Boys Admitted During 1925.....	336

GOVERNORS

OF

THE SOCIETY OF THE NEW YORK HOSPITAL.

The following is a list of the names of Governors from its organization to the first of January, 1926, with the date of their respective elections and the length of time they continued in office:

GOVERNORS.	Elect- ed.	Re- signed.	Served the Institution.	
A.				
Charles Ward Apthorp.....	1770	1784	14 years	
William Axtell.....	1770	1784	14 years	
John Alsop.....	1784	1788	4 years	
Gilbert Aspinwall.....	1799	1809	} 15 years	Died in office. 1819.
Gilbert Aspinwall.....	1811	1812		
Gilbert Aspinwall.....	1815			
John Atkinson.....	1800	1809	9 years	
John Aspinwall.....	1814	1817	3 years	
John Adams.....	1818	1854	36 years	
Stephen Allen.....	1823	1830	} 24 years	Died in office, 1852.
Stephen Allen.....	1835			
Augustine Averill.....	1848	1857	9 years	
John Jacob Astor.....	1860	1864	4 years	
George W. Abbe.....	1877		2 years	Died in office, 1879.
William W. Astor.....	1879	1882	3 years	
James W. Alexander.....	1904	1905	1 year	
B.				
Gerardus William Beekman.....	1770	1777	7 years	
George Bowne.....	1770	1784	} 26 years	
George Bowne.....	1785	1797		
Samuel Bowne.....	1772	1784	12 years	
William Bayard.....	1777	1784	7 years	
Robert Bowne.....	1784		34 years	Died in office, 1818.
Aaron Burr.....	1784	1792	8 years	
James Beekman.....	1785	1787	2 years	
Theophylact Bache.....	1785	1797	12 years	
Thomas Buchanan.....	1785	1800	15 years	
Francis Basset.....	1785	1787	2 years	
William Backhouse.....	1787	1792	5 years	
Nicholas Bayard.....	1794	1798	4 years	
John Barrow.....	1795	1807	12 years	
Samuel Bowne.....	1796	1797	1 year	
William Bayard.....	1800	1802	2 years	
Walter Bowne.....	1799	1805	6 years	
Dr. Samuel Bard.....	1801	1802	1 year	
Rev. Abraham Beach.....	1801	1806	5 years	
Thomas Buckley.....	1802	1842	40 years	
John Bogert.....	1804	1817	13 years	
John L. Bowne.....	1809	1815	6 years	
Abraham Barker.....	1813	1816	3 years	
Robert H. Bowne.....	1815	1827	12 years	
William Bayard, Jr.....	1818	1823	5 years	

LIST OF GOVERNORS—*Continued.*

TO THE LEGISLATURE OF THE
STATE OF NEW YORK

The Governors of the Society of the New York
Hospital respectfully present their 155th Annual
Report of the state of the institutions under
their charge for the year 1926.

THE PRESENT NEW YORK HOSPITAL
WEST FIFTEENTH STREET FRONT
Completed 1877

ANNUAL REPORT

OF THE

GOVERNORS OF THE SOCIETY OF THE NEW YORK HOSPITAL FOR THE YEAR 1926

In conformity with the provisions of its Charter, granted by Royal Authority June 13, 1771, in the reign of King George III, the Governors of The Society of the New York Hospital present their annual report and a statement showing the receipts and expenditures for the year 1926 of the several institutions under their control and management, as follows:

The General Hospital, at Fifteenth and Sixteenth Streets, New York, the Department for the Treatment of Mental Diseases, known as Bloomingdale Hospital, at White Plains, Westchester County, and the Hospital for Convalescent Children, also at White Plains.

The constantly increasing activities of all these institutions have been marked. Many additions and improvements have been undertaken. The pressure for space in the various departments continues, and cannot be relieved until new hospital buildings are obtained. Progress to that most desirable end continues to be made, and definite results are looked for.

Operating expenses reached \$661,957.75 in 1926, an increase of \$17,788.44 over 1925. The operating receipts in 1926 were \$459,888.20, as against \$435,232.60 in 1925, an increase of \$24,655.60 making the operating deficit for the year \$202,069.55. The Superintendent's report sets forth in detail the results involved in these figures and in tabulated comparisons with previous years.

The accompanying report of the Medical Board shows clearly how earnestly and effectively the Medical Staff is contributing to the successful operation of the institution.

The varied research pursued by the professional staffs of the Hospital is summarized in the lists of their publications during the year.

The Social Service Department continues its active and invaluable participation in the Hospital service. The most efficient five-year service of Mrs. Walter Jennings as Chairman of the Committee ended, to the regret of the Governors, the Staff of the Hospital and her associates in the Social Service Department, in January,

1926. Mrs. Augustine J. Smith kindly consented to succeed to this Chairmanship, and some of the results of her first year's activity are shown in the Department's report.

This has been a year of marked significance to Bloomingdale Hospital. Dr. William L. Russell, who had been its able Medical Director for fifteen years, asked to be relieved of further service in that position. To succeed him the Hospital was fortunate in securing Dr. Mortimer W. Raynor, who for a number of years had been at the head of the State Hospital at King's Park, on Long Island, and who assumed his duties as Medical Director at Bloomingdale last September. The attached report of Dr. Raynor shows how successfully he has undertaken his important task.

In order that the Hospital might continue to benefit by Dr. Russell's invaluable aid, a new position, that of General Psychiatric Director of the New York Hospital, was created by the Governors and filled by the election of Dr. Russell. In that capacity he is now devoting himself to the broad development of the psychiatric work of the Society, including the enlargement of the work at Bloomingdale Hospital, the establishment of a separate psychiatric hospital in the City of New York, and the guidance and expansion of the psychiatric clinic now in operation at the New York Hospital.

The improvements at Bloomingdale Hospital itself during the year have been notable. A new residence for the General Psychiatric Director is nearing completion, the plans for the Nurses' Home are under active consideration, and it is expected that the construction of the first unit in this group of buildings will soon begin.

Since the last annual report the following special gifts have been received:

Miss Mary Gardiner Thompson repeated her previous generous gifts of the past several years by contributing another \$15,000 to meet special urgent needs of the General Hospital.

Mrs. Henry C. Frick gave \$5,000 for the general purposes of the Hospital.

Mrs. Robert Waller gave \$5,000 to endow a bed in memory of her father, Mr. John Aikman Stewart.

The Insulin Committee, which for the past several years had given \$1,000 for the use of that remedy by patients who were unable to pay for it, increased its 1926 contribution to \$2,200.

The Transfusion Fund, established in 1925, was benefitted to the extent of \$3,420 by a number of contributors.

The Department of Urology received gifts of \$3,523, towards its expenses from sixty-three contributors.

New legacies to the Society have been reported during the year as follows:

Under the will of Kate Bainbridge Murray, who died April 13, 1925, \$5,000, to endow a bed in memory of her brother, Thomas E. Deeley. The Hospital received payment of this legacy in 1926.

Under the will of Ella A. Rogers, who died January 9, 1926, \$50,000.

Under the will of Adelaide M. Davis, who died February 10, 1926, \$5,000. The Hospital received payment of this legacy in 1926.

Under the will of Mary C. Walker, who died March 31, 1926, it is estimated that the Hospital will receive annually hereafter about \$3,000 during the lifetime of a trust beneficiary, and thereafter about \$140,000 outright. The sum of \$1,500 on account of income was received from this estate during 1926.

Under the will of Max Davidson, who died June 21, 1924, \$1,000. The Hospital received payment of this legacy in 1926.

Under the will of Alfonso de Navarro, who died August 15, 1926, \$5,000 to endow a bed.

Under the will of Theresa R. Irving, who died October 3, 1926, \$7,000,—\$2,000 to make permanent an endowed bed for two lives for which she gave \$3,000 in 1912, and \$5,000 for another endowed bed.

Of the legacies mentioned in previous annual reports the following amounts have been received:

Under the will of Henry Richmond Taylor, \$250,000, on account of his legacy of \$500,000 for use at Bloomingdale Hospital.

Under the will of Kate S. Richardson, \$500,198.40, making a total received to date of \$550,198.40.

Under the will of Edmund Penfold, in memory of Thomas Hall Faile, a former Governor of the Society, the legacy of \$7,500.

Under the will of John H. Flagler, \$27,148.76, making a total received to date of \$187,487.03.

Under the will of Mary Douglass Graham, \$5,000.

Under the will of Emily F. Southmayd, \$5,000, making a total received to date of \$95,000.

Under the will of Mary Alice Jeffery, \$4,215.07, to create a fund to be known as the "Gretta Jeffery Kerwin Memorial."

Under the will of Charles E. Rhineland, \$1,195.81, making a total received to date of \$26,195.81.

Under the will of Sally Lathrop Nichols, \$78.50, making a total received to date of \$16,815.62.

Among other gifts, we have received \$2,500 again from Mr. Edwin Gould, \$1,000 each from Mr. Walter Jennings, Mr. Cornelius N. Bliss, the Cornelius N. Bliss Memorial Fund, Inc., and Mr. J. William Clark, \$500 each from Mr. Henry W. de Forest and Mr. John Walters, and a like sum from Mr. and Mrs. John Claffin.

Attention is called to the accompanying reports describing the work of the various departments.

EDWARD W. SHELDON,
President.

G. HOWARD WISE,
Secretary.

March 1, 1927.

THE SOCIETY OF THE NEW YORK HOSPITAL.

STATEMENT OF INCOME FOR THE YEAR 1926.

REPORT OF THE SUPERINTENDENT OF THE NEW YORK HOSPITAL FOR THE YEAR 1926

To the Board of Governors:

GENTLEMEN: I respectfully submit the Superintendent's report for the year 1926.

The statistical data attached furnish detailed information of the varied activities of the Hospital during the year.

There were treated in the hospital 6,180 patients. Of these 4,581 were treated in the wards and 1,599 in private rooms. The Out-Patient Department furnished 99,934 treatments; 4,959 were treated in the emergency rooms and the ambulance responded to 7,640 calls.

The average cost of caring for patients was \$6.46 a day.

The operating expenses were large, amounting to \$661,957.75, against \$644,169.31 in 1925, an increase of \$17,788.44, or less than 3 per cent.

The operating income was \$459,888.20 against \$435,232.60 in 1925, an increase of \$24,655.60, or nearly 6 per cent.

The operating deficit was \$202,069.55, contrasted with \$208,936.71 in 1925.

The cost of the ward service was \$331,950.34, compared with \$325,181.46 last year. In 1924 it was \$301,391.05; in 1923, \$297,105.92; and in 1922 \$283,746.53. The average cost per day of caring for ward patients was \$5.33 as compared with \$5.18 last year. In 1924 it was \$4.59 and in 1923 \$4.48.

The emergency service, including the Admitting and Workmens' Compensation departments, expended \$38,831.20, against \$36,954.65 in 1925. There was received for the care of patients coming under the provisions of the workmens' compensation law \$27,746.00, against \$27,489.00 in 1925. There were treated in the emergency room 4,959 patients, and of these 3,100 were industrial accident cases. The number of redressing cases was 11,382, contrasted with 12,344 in 1925.

The private pavilion service cost \$203,371.59, contrasted with \$201,064.32 in 1925. The cost per day for each patient cared for in this department was \$10.35, in comparison with \$11.35 in 1925 and \$9.66 in 1924. The number of private patients cared for was 1,216 against 1,158 in 1925 and 1,280 in 1924.

The payroll, including the departments of Pathology, Urology and Immunology amounted to \$353,227.15, compared with \$334,-316.05 in 1925, an increase of \$18,911.10, or nearly 6 per cent.

The payroll of the Nursing Department was greater in 1926. This was due to increase in wages, to the employment of several nurses at day rates, and to an increase in number of ward maids. In 1926 salaries and wages in this department were \$88,330.56, contrasted with \$52,287.52 in 1920, an increase of \$36,043.04, or nearly 70 per cent.

The routine housekeeping of the hospital cost \$55,752.87 against \$59,192.83 in 1925, a decrease of \$3,439.96. It is doubtful if this showing can be repeated, as it became necessary on January 1, 1927, to materially increase wages paid to maids.

The cost of maintaining the ambulance service was larger than in 1925 because more extensive repairs were necessary.

OPERATING EXPENSES AND RECEIPTS

(Six-Year Record)

Year	Operating Expenses	Operating Receipts	Excess of Expenses Over Receipts	Hospital Days	Persons Fed Daily	Per Capita Cost of Food Supplies
1921	\$571,052.00	\$369,240.67	\$201,811.33	98,373	640	.4584
1922	545,393.33	400,244.02	145,151.31	96,020	650	.4213
1923	578,871.51	413,741.86	165,129.65	93,282	632	.4902
1924	584,733.01	422,811.68	161,921.33	92,258	631	.5074
1925	644,169.31	435,232.60	208,936.71	88,762	635	.6030
1926	661,957.75	459,888.20	202,069.55	90,489	644	.6290

The hospital is being operated at maximum capacity and all departments are asking for more space in order to meet the demands made upon them. Unfortunately, situated as we are, further physical expansion is practically impossible.

Modern progress in medicine adds largely to the cost of operating hospitals. The Immunology Department of this hospital required in 1926 an expenditure of \$32,327.00. Of this sum \$24,145.59 was for salaries and \$8,181.41 for supplies. The total cost of the Pathological laboratory was \$28,379.33. Of this sum \$23,366.19 was for salaries, and \$3,013.14 for supplies. Another fairly modern aid in the diagnosis and treatment of disease, the Department of Radiology, required \$31,834.14 to meet the demands made upon it.

The Department of Urology spent \$76,551.78 in bringing scientific relief to hospital patients suffering from urinary afflictions. There was spent for iletin, the new remedy for diabetes, \$4,209.20.

THE PRESENT NEW YORK HOSPITAL
WEST SIXTEENTH STREET FRONT

REPAIRS, REPLACEMENTS AND IMPROVEMENTS

About \$400 was spent in enlarging and for additional equipment for the nurses' class room.

A modern drop-lock enunciator and cable for the private pavilion passenger elevator cost \$280.

An Alpine lamp was purchased for the Out-Patient Department. New cold water supply pipes on the east side of the ward building cost \$474.

An interrupterless transformer and a Buckey table with counter-balanced tube stand and a new portable X-ray machine were purchased for the X-ray Department.

Installation of new brine pipes and coils in the refrigerators in the ward building cost \$1,665.

Eighteen new beds of modern type were purchased for the wards and private building.

About \$750 was expended in resurfacing and repairing the tennis court.

At an outlay of \$4,590 a modern steam-heating plant with hot-water generator was installed in houses 13 and 15 West 16th Street. The heating of these buildings in the past was done with four antiquated furnaces and gas radiators. Steam radiators were placed in all rooms.

Maintenance of passenger and freight elevators amounted to \$2,838.07 in 1926, \$3,076.58 in 1925, and \$3,623.84 in 1924.

A new oil sterilizer for instruments was purchased for the public operating room.

COMMISSARY DEPARTMENT

There are 46 persons employed in this department. There was expended for salaries \$31,918.89, and the cost of food was \$148,031.41. The number of meals served to patients and employees was 705,180. The average daily cost of unprepared food for each person fed was 63 cents or 21 cents a meal. Fruit and vegetables showed an increase in cost of \$4,427.26, or over 22 per cent, partly due to the high prices paid for potatoes.

During the year there was purchased 21,212 pounds of butter, 37,767 pounds of sugar, 10,475 pounds of coffee, 130,280 quarts of milk, 11,931 quarts of cream, 69,902 pounds of bread and 24,436 dozen eggs.

While the expenses of this department have increased materially during the past two years, we feel that the results obtained justify the larger expenditures.

CHANGES IN THE EXECUTIVE STAFF

After several years of efficient service as housekeeper, Miss Mary Gaherin resigned April 1, 1926.

Mr. William D. Baxter, who had served the hospital faithfully for ten years, first as cashier and later as assistant superintendent, resigned October 15, to take the superintendency of the Peekskill Hospital.

Miss Katherine Burke was appointed cashier.

Dr. Edna S. Pennington resigned as admitting physician and Dr. Leslie A. Homrich was appointed to succeed her.

Mr. A. D. Ludlow was appointed First Assistant Superintendent and Mr. Thomas Howell, Jr., Second Assistant Superintendent.

DEPARTMENT OF PATHOLOGY

The year 1926 saw the percentage of consent autopsies rise higher than ever before in this institution. This is exceedingly gratifying and is a tribute to the efforts of the House Staff. The percentage of autopsies obtained is more and more being used as a criterion of the efficiency of a hospital and of the value of its service. In an article published during the year Dr. Christian of Boston ranks the leading hospitals of the country on this basis and it is a pleasure to note that our institution stands high in his list in spite of the fact that he includes in his figures data obtained from the whole hospital. It has always been our contention that these statistics should not include the Private Patients' Building, since in the latter there are involved a number of physicians whose connection with the institution is comparatively tenuous and whose patients are not under our control. Were the deaths and autopsies from the Private Building excluded, our standing would be even higher on Dr. Christian's list than it is at present.

It seems probable that in the year just past our autopsy percentage has reached a peak that will hardly be excelled under present conditions. Some groups of patients treated in the hospital are uniformly opposed to post-mortem examinations, and it is not probable that we shall be successful in dealing with them so long as we adhere to the considerate methods that form our present practice.

This division, like all other branches of the service, suffers from limitations of space which precludes further expansion in this field, but owing to the liberal policy of the Board of Governors it ranks very high in point of equipment.

DEPARTMENT OF UROLOGY

The Department of Urology has extended its activities considerably during the past year.

The experiment of making the Out-Patient Clinic a semi-private or so-called "Pay Clinic" has proved to be entirely successful. The patients visiting this clinic are encouraged to pay \$1.00 for a treatment during the daytime visiting hours and \$1.50 is charged at the night clinics. No person is refused treatment if unable to pay.

The female clinic is an important part of the department's activities. Much good work is being done which formerly was neglected. Many interesting operative cases have been sent into the Hospital and much suffering has been relieved by palliative treatment in the cystoscopic room.

The Children's urological clinic is conducted every Saturday morning and this neglected phase of pediatrics is proving to be a most necessary adjunct in the care of children. The perfection of the small catheterizing cystoscope by Dr. Paul M. Butterfield of the Urological Staff, marks a step forward in the investigation and care of children suffering from urinary complaints. The importance of this work is recognized by the New York Public Schools, the Children's Aid Society and many baby hospitals, all of whom refer patients for treatment.

A most important new activity of the Urological Department is the recently established clinic for the care of patients suffering from non-operable tuberculosis, such as advanced bilateral renal tuberculosis and for the care of those patients who have had operations for tuberculosis of the genital or urinary organs. This Clinic is conducted jointly by a medical man experienced in the care of patients suffering from pulmonary tuberculosis and a urologist. The results obtained in cases which were formerly considered hopeless are so marked that this clinic has outgrown its facilities.

The importance of the cystoscopic service is indicated by the fact that 2,592 cystoscopies were performed by the members of the staff in the past twelve months.

The indoor service consisting of 18 beds is crowded to such an extent that it is impossible to care for more than 40 per cent of the patients who apply for treatment. During the past year 296 major operations were performed, almost all of them being done under local or regional anesthesia.

FIRE IN NURSES' HOME

A fire in the attic of 13 West 16th Street, one of the houses occupied by our nurses, damaged the building and contents to the

extent of \$600. Fortunately this fire occurred at noon when there were only a few nurses in the building.

HOSPITAL BUREAU

The Hospital Bureau of Standards and Supplies, of which this Hospital is one of the original members, continues to function most satisfactorily. The Bureau saves the Hospital a considerable sum annually on its purchases. Outside of goods purchased on its agreements, which amounts to over four million dollars yearly, the bureau in 1926 handled special orders involving about \$632,000. At present about 100 hospitals are members of the Bureau.

STREET NOISES

The Hospital and its patients are under obligations to the Commissioner of the Police Department and his officers who have coöperated actively in an attempt to eliminate unnecessary street noises. Sixteenth Street has been closed to commercial traffic, and manufacturers using noisy machinery have been requested to reduce this nuisance to the minimum.

ILETIN

The Committee which has for several years furnished iletin free to needy patients ill with diabetes again contributed \$700. The use of iletin is increasing. Fortunately the price is decreasing so that the expense burden is not so great to the patients. During 1926, 1,132,100 units were purchased.

X-RAY DEPARTMENT

The work of this department continues to increase. During the year 21,936 films were used. Considerable new equipment was purchased. The total expenses were \$31,834.14 and the income \$33,209.05.

DENTAL DEPARTMENT

The number of patients treated in this department during the year was 2,202. There were 3,751 extractions; 119 surgical dressings (full sets); 85 silver fillings; 11 operations for impacted teeth; 13 fractures; 9 pericoronal infections; 4 supernumeraries; 7 Vincent's disease.

MEDICAL AND SURGICAL SUPPLIES

Of medical and surgical supplies there was purchased:

1,584 clinical thermometers
1,805 pounds of ether
42,000 gallons of nitrous oxide
39,300 gallons of oxygen
52,600 gallons of ethylene
149,400 feet of catgut
1,132,100 units of iletin
33,375 feet of zinc oxide plaster
2,232 surgical needles
198,214 yards of absorbent gauze
4,064 pairs of rubber gloves

RELIGIOUS AFFILIATIONS OF PATIENTS

Of the patients admitted to the hospital wards, approximately 60 per cent were Catholics, 23 per cent Protestants, 17 per cent Hebrews.

ACKNOWLEDGMENTS

Mr. Edward W. Sheldon contributed \$100.00, Mrs. William John FitzGerald \$100.00, Mrs. Waldron Post Brown \$20.00, and the Hospital Committee of the Church Women's League for Patriotic service \$25.00 toward the Christmas festivities.

The Haven Relief Fund Society made a contribution of \$100.00, which was expended under the supervision of our Social Service Department. A detailed report of the disbursements was rendered to the Society.

The group of ladies from the Friendly League for Christian Service continues to conduct song services every Sunday afternoon. These ladies also presented the patients and employees with candy and calendars at Christmas.

Numerous donations of flowers, toys, books and magazines were received and acknowledged.

Respectfully submitted,

THOMAS HOWELL,

Superintendent.

REPORT OF THE MEDICAL BOARD OF THE
NEW YORK HOSPITAL FOR THE YEAR
ENDING DECEMBER 31, 1926

To the Board of Governors:

GENTLEMEN:—The past year has been unusually full of varying and important activities and it can be recorded as one of distinct progress. Throughout the Hospital there is a spirit and will for improvement and all the members of the staff, in addition to their appointed work, are giving special attention to some particular topic of interest or of importance.

The work is necessarily carried on under difficulties owing to the physical limitations of the plant so that necessary investigations, apparatus and furnishing space for extra and volunteer workers are often impossible.

While these remarks apply to all departments, it is particularly regretted that the work of the Out-Patient Department has to be restricted as in these days there is a growing realization of the importance and necessity of Out-Patient work, and particularly in connection with the admission of patients to the Hospital. Many necessary and important investigations can be carried on by utilizing the Out-Patient and Laboratory resources before the patient is admitted to the Hospital for observation or treatment, thus saving time and expense to the patient and the institution.

There has been a spirit of most helpful coöperation in all departments which has made for more economical and more accurate carrying on of the work.

Conforming to the spirit of modern medicine recent years have seen the development of special clinics, all of which have justified their existence and many of them have increased with a rapidity which puts an unusual strain on all these departments; for it is only in such special clinics that the diagnosis and treatment of certain conditions can be effectually carried out.

In this connection it should not be overlooked that the backbone of the medical profession must always be the well trained, well informed and progressive general practitioner, for in many cases the patient's fate depends on the guidance he receives, and the future course of the disease depends on the advice of the original

doctor. That there is room still for the specialty of general practitioner is illustrated by an amusing experience of Dr. Roper. A lady came to him after she had gone to a long line of specialists on the plea that she "would now like to see a doctor."

The following is a list of the Out-Patient Clinics:

ARTHRITIS	THYROID
ASTHMA	MEDICAL
CARDIAC	SURGICAL
DENTAL	DIABETIC
GENITO-URINARY	GYNECOLOGY
MENTAL	ORTHOPEDIC
RECTAL	STOMACH
SYPHILIS	TUBERCULOSIS

The Arthritis Clinic is the newest. It is under the care of Dr. Mitchell Shuster, and already treats an average of eighty patients a week, showing the great necessity for the diagnosis and treatment of these conditions.

We all feel that the great unsolved problem is that of malignant disease. It is clearly recognized that the great majority of persons coming under treatment apply too late.

A movement is on foot, initiated by Dr. Farr, to establish a clinic which might be called a Diagnostic Clinic or a Precancerous Clinic. The feasibility of putting such a clinic into effect is under discussion, for if it is to be efficacious it should be well equipped and manned, and in undertaking this work considerable responsibility and expense must be incurred.

The Board regrets to have to announce the resignation of Dr. Theodore B. Barringer, Jr., Associate Attending Physician since 1910; Dr. Elise S. L'Esperance, Pathologist; and Dr. Ralph G. Stillman, who gives up the position of Assistant Attending Physician to concentrate his work in the Department of the Division of Laboratories.

New Appointees are Dr. James Denton, Pathologist; Dr. Benjamin Michailovsky, Assistant Attending Physician, was made Associate Attending Physician; and Dr. Horace S. Baldwin, Assistant Attending Physician.

The regular activities such as noted in the previous report, especially as regards the teaching of the students of Cornell Medical College, the instruction offered by the members of the Second Division to the practitioners, particularly of the neighborhood, and the January and July examinations of the National Board of Examiners have continued with some increase in activity.

MEDICAL DIVISIONS

The study of the treatment of lobar pneumonia by specific pneumococcus antibody solutions has been continued. This work has been in charge of Dr. Horace S. Baldwin.

SURGICAL DIVISIONS

The Surgical Divisions have been very active and the work is growing in importance and responsibility. All members of the staff have devoted particular attention to special problems and the resulting work and spirit are most satisfactory. The Surgical Staff feels particularly encouraged in believing that headway is being made in solving the problem of occasionally mysterious wound infections and post-operative pneumonia, these having recently entirely disappeared from the service. Similarly, the success of treating shock, particularly traumatic, with glucose and insulin gives great promise of successfully overcoming this serious and often fatal condition.

A small but much needed addition to the operating room personnel has resulted in much satisfaction to all concerned, less strain on the personnel and smoother work and better results.

The Follow-up work continues to be of great value, especially in the self education of the staff. The secretaries of the divisions are kept quite busy answering inquiries from all over the country and interviewing workers who wish to study our methods. Much of the satisfactory results have been due to the devoted coöperation of the Social Service Department under the direction of Miss Josephi. It has been possible at times to get almost 100 per cent of patients who were sent for, or in absence of personal interview, satisfactory information.

The problem of anesthesia, always a difficult one in institutions, is troublesome and will require much effort and thought before it is solved. The legal status of the non-medical anesthetists (nurse anesthetists) is still a debatable question; but such anesthetists could be available all the time whereas the special anesthetists are present only a small proportion.

THE DIVISION OF LABORATORIES

There are no essential changes in the conditions discussed in some detail in the previous annual report. Considerable headway has been made in coördinating the work and keeping down the number of unnecessary examinations to a comparatively low degree.

Dr. Denton recently appointed pathologist, comes to this position with a wide and varied experience, and should be a valuable addition to the staff. He will spend a portion of his time in the teaching of Cornell Medical Students; but the greater part of his time is centered in the hospital work.

Post-Mortem Examinations. The percentage, 48.4 per cent, secured in ward cases is a new high record for this service, and it is believed to be the maximum attainable if the considerate methods employed to secure consent are adhered to.

The number of post-mortems obtained throughout the Hospital includes the Private Patients' Pavilion and the Urological Department. The total figure is less than the ward cases; but the medical board has no means of enforcing or applying the system which has worked so well for the ward cases. This remark holds particularly true for the Private Patients' Pavilion, much of the work being done by men who have no other connection with the Hospital.

The Department of Clinical Pathology. Amongst its many extra divisional activities, this department has taken an important part in the very growing importance of blood transfusion. The grouping now is done by the Department of Applied Immunology with an expert in this field, Mrs. Ella F. Grove, who is on call at all times. To perfect the system of control, Dr. Stillman was made Chairman of the Transfusion Committee.

The Department of Bacteriology. In this department an enormous amount of work has been done in studying the various pneumococci.

The Department of Applied Immunology. This is the one department in the division which enjoys uninterrupted time periods for research work, and that the time is well spent is evidenced by the large number of papers emanating from this department annually. It also meets the laboratory needs of the special Hay Fever Clinic—195 clinics with a total of 33,429 visits.

Report of the Metabolism Section. The chief problems with which this laboratory is concerned are:

- (a) Methods of diagnosis of diseases of the liver.
- (b) Study of the changes in the blood calcium in thrombo-angitis.

Five hundred and sixty-nine determinations of basal metabolism were made, about 15 per cent more than last year.

X-RAY DEPARTMENT

The value of the full time reorganization is made even more apparent this year and the work and the importance of the work

are increasing constantly. Amongst other activities it is hoped that more work can be done with X-rays on the cadaver. Such examinations will often reveal conditions which the limits of post-mortem examination forbid.

TRANSFUSION

With the appointment of a transfusionist there has been marked improvement in conditions. Dr. Stetson is supplying and supervising donors and overseeing the performance of transfusions. The number of transfusions has increased considerably. About 25 per cent of the net cost is being paid by the income of the Transfusion Fund, which now amounts to nearly \$10,000.

RADIOTHERAPY

Finally, recognition is due to Dr. Remer for his very faithful and valuable work in radiotherapy of various conditions, more particularly inoperable or recurrent growths. This is a very thankless task, calling for all the tact and kindness so well exhibited by this gentleman.

A list of the publications during 1926 of the members of the professional staff of the Hospital is appended:

- DR. A. F. COCA: "Relation of Atopic Hypersensitiveness (Hay Fever, Asthma) to Anaphylaxis." A review of recent literature. *Archives of Pathology and Laboratory Medicine*, 1926, I, 96.

CHARLES L. GIBSON, M.D.

EDWARD CUSSLER,
Secretary.

President.

REPORT OF THE TRAINING SCHOOL FOR NURSES FOR THE YEAR 1926

To the Board of Governors of the New York Hospital:

GENTLEMEN: I beg to submit the forty-ninth annual report of the School of Nursing.

The closing year registers the following staff on duty in the Hospital:

Directress.....	1
Assistant Directress.....	1
Instructor.....	1
Night Supervisor.....	1
Supervisor, Out-Patient Department.....	1
Supervisor, Private Patients' Pavilion.....	1
Charge Nurses, Surg. and Med. Divisions of Hospital Wards.....	7

Total Number of Students.....	89
Graduate Nurses on General Duty.....	15
Total.....	104

Since 1920 the enrollment of students in the School has averaged about the same and we had hoped this year to have reported a larger figure, fortunately the number of affiliating students received from other schools, who came to us for practice and instruction in our various services, exactly counterbalanced our students who were affiliating in outside hospitals for their elective services.

Probably the most outstanding feature of our course is this opportunity of obtaining the broadened view of the field that these elective services offer. During the year twenty-five students went out to Bloomingdale Hospital for three months' instruction in the care of mental and nervous diseases, nine to Henry Street Settlement for Visiting Nursing, eight to Willard Parker Hospital for Communicable Diseases and seven to our Social Service Department. At this point I should like to express our sincere appreciation and heartfelt thanks to the Social Service Committee for helping to make it possible to develop this branch of work for our School.

Another outstanding feature of the year has been the splendid health record of our students; generally speaking, the illnesses have been of light nature and short duration, an average of three and one-half sick days per student. This, however, does not include the six nurses who were more seriously ill, averaging thirty-three sick days each, two developed pneumonia, two were operated for mastoiditis, one contracted scarlet fever and one mumps. All made good recoveries.

It is with regret that we report the loss of six of our graduates: Zelpha Whitaker, Class 1881; Ada B. Stewart, Class 1881; Martha Mills, Class 1889; Nellie Gillette, Class 1890; Elizabeth O. Price, Class 1893; Mary Hancock Pearsall, Class 1895.

Educationally we have this year stressed the great importance of ward teaching and have had splendid coöperation from the head nurses, their daily conferences with the students assigned to their wards have promoted in the student a keener interest in her patients, in these conferences the condition of the patients is discussed together with the method of treatment and results anticipated. We feel this has been a real step forward toward the better bedside care of our patients.

The graduating exercises of the class of 1926 were held in the administration room on the evening of March 3d. Mr. Edward W. Sheldon, President of the Board of Governors, presiding. After the invocation the Honorable Augustus Hand was introduced. In delivering to the class a very inspiring address he brought out the fact that in these times of widening opportunities for women, it is interesting to remember that Nursing is the profession they first

entered upon, it being almost as old as Christianity itself, and more closely identified with it than any other secular vocation. He touched upon the important eras of nursing from that date until today, when our profession has reached a position of supreme importance, and he stressed the fact that they would get out of it exactly what they put in. The President addressed the class, presenting the diplomas and gold badges. At the close of the exercises the class entertained their friends at supper, which was followed by a dance in the Nurses' residence.

I would like to take this opportunity of expressing our grateful appreciation of the wonderful and generous supply of rompers and baby blankets provided by the Social Service Committee for the Children's Wards. Truly these fairy godmothers have worked magic in this department, for the whole scene is one of transformation.

In closing we sincerely thank the doctors who have assisted in the instruction of the students, and acknowledge with appreciation the hearty coöperation of all departments.

Respectfully submitted,

M. H. JORDAN,

Directress of Nurses.

REPORT OF THE SOCIAL SERVICE COMMITTEE NEW YORK HOSPITAL, 1926

To the President and Governors of the Society of the New York Hospital:

GENTLEMEN: The Fourteenth Annual Report of the Social Service Committee, which is respectfully presented herewith, contains a brief review of the various activities of the Committee during the year 1926.

It was with sincere regret that in January the resignation of Mrs. Walter Jennings as Chairman of the Committee was accepted. During the past five years, under her able management and wise counsel, the work has been carried on most successfully, and new methods of assistance adopted with excellent results, and the grateful thanks of the Committee are herewith extended.

A donation of \$3,348 was received from the Nursery Committee (Mrs. Viotor, Chairman), to be known as the "Nursery Fund" (the name was later changed to the "Children's Fund"), to be used in any way the Committee desired, for the care of children. As a mark of appreciation for the work carried on by Miss Ellison and her staff at the Campbell Cottages, a donation of \$1,000 out of this fund was made to the Campbell Cottages.

Mrs. Hay, although unable to open her cottage in New Hampshire owing to the difficulty in providing a competent Matron most generously provided for the usual number of children, and others in addition, at "Life's Farm."

The Medical Board of the Hospital, appreciating that many questions of mutual interest frequently arise, appointed Dr. Viotor as their representative, to attend our Committee Meetings when called upon.

The Committee is most grateful to the following doctors, who have given lectures:

Dr. Hitzrot spoke to the Social Service Staff and to members of the Good Citizens' Club on "Accidents and First Aid." Dr. Taylor, head of the Clinic of Syphilology; Dr. Roper, Chief of the Children's Clinic, and Dr. Walbridge, his Assistant, and Dr. Mersereau, Head of the Tuberculosis Clinic, have given addresses. Dr. Shuster of the Arthritic Clinic, and Dr. Cornell, Assistant Attending Surgeon, have also spoken before the Committee of some interesting features of their work.

The importance of the "Library" can be emphasized by the fact that 2,307 books were distributed during the year. This work was almost entirely done by the seven volunteers. A worker, paid by the Committee, helped two afternoons a week, and special mention should be made of the efficient work done by Mrs. Haven, Mrs. Dineen, and Miss Gawtry of the Committee, ably assisted by Mrs. Rague and Mrs. Farwell.

We have received during the year 60 layettes, consisting of 900 articles from Miss Elizabeth Ruhr, in memory of Mrs. Frank K. Sturgis, and Mrs. Kent has given much of her time in selecting and purchasing clothing and in obtaining donations.

In addition to the Library Volunteers, we have others who deserve special mention. Miss Ann Morgan has been with us five years and has given the Children's Cardiac Clinic most faithful service, summer and winter. Mrs. John Dick Gardiner has done most valuable work in the Clinic of Syphilology; Miss Helen Grimmels has been of great help to the Social Service Department during the year in assisting with the calls upon the patients attending the Clinic of Immunology. Miss May Hoppin, chairman of the Committee of Volunteers, sets them a wonderful example. She is now in her fifth year of most valuable assistance to the Hospital, beginning in the Surgical Clinic and now working daily in the Laboratory of the Hospital.

Nine Student Nurses have each been in the Social Service Department for three months. These Students feel that this course, though short, has been of great service to them.

The annual Fair given by Mrs. Whitney at Manhasset enabled us to give 25,049 quarts of milk during the year, an increase of 8,000 quarts over 1925.

There were thirteen meetings of the Good Citizens' Club held during the year, three of which were at the home of the president of the Club. Mrs. John Pratt came to the Hospital and delivered an address on "Tenement House Conditions and Care of the City Parks." Mrs. Allien, who has been interested in this work for many years, in the late spring entertained the club members in her home.

With the assistance of Mrs. Watson B. Dickerman and Mr. R. Horace Gallatin the Playground on the Van Buren property on Fifteenth Street was put in order for the summer. The new swings, sand boxes, etc., were enjoyed by many children; in addition, ice cream was furnished once each week. The children were under the care of directors furnished by "Parks and Playgrounds Association," to whom our thanks are extended.

Mrs. Treadwell and Mrs. Bliss report that through the kindness of the Rev. Dr. Mottet we have been able to continue to use the room in the Church of the Holy Communion, for our "Tuberculosis Preventive Work." Dr. Mersereau reports that the results are most encouraging. Under the able management of Miss Allen, the nurse in charge, this work has developed remarkably, and has become one of the most important branches of the Social Service.

Mrs. Hitzrot and Mrs. Farr, with the members of their Committee, have continued their excellent work of keeping the Children's Wards of the Hospital supplied with rompers and other clothing, for which the Hospital is most grateful.

A newly organized department in the Children's Clinic looks after babies under two years of age one afternoon each week. A special doctor and Miss Mason, a Social Service Nurse, are in constant attendance.

The Social Service Committee has, as in former years, provided a nurse for the Follow-up Clinic and the great need of this most important work is apparent. Dr. John A. Vietor has given the following report of the Second Surgical Division:

"Of 2,207 cases requested to return to the Follow-up Clinic, 415 were referred to the Social Service; 53 of these reported in person and 251 were reported on by the Social Service Nurse, giving a total of 73.1 per cent heard from through efforts of the Social Service. These figures show an increase of 5 per cent over the work of the preceding year.

"We feel that the follow-up service is of inestimable value, not only for the patients themselves, but also for the doctors, and we feel that without the aid of the Social Service Nurse, we would be unable to carry on a satisfactory follow-up."

There was quite a marked improvement in economic conditions during 1926. There have been no epidemics, no suffering from cold and coal shortage, work has been more plentiful, and it has only been necessary to ask relief from Welfare Organizations for but few of our families. We did not think it wise this year to give out Thanksgiving baskets—although we gave out the usual Christmas baskets—and our three Christmas tree parties for the Clinic children were a great success due to the hospitality of the Directors of the Margaret Louisa Home who again loaned their large club room at 14 East 16th Street for the children's use. Although the families are much more prosperous than they were some years ago, educational work is still much needed; also the following of both ward and clinic patients, sometimes through convalescence, sometimes through long clinic attendance. We must see that the doctor's advice is carried out. We must encourage the patients to keep on with

their treatment; and frequently we must help with surgical appliances. There is often great hope and courage given a patient through an elastic stocking, a supporter, a brace, or a pair of orthopedic shoes.

In February the Committee took a table for the Social Service Staff for the dinner given by "Better Times."

The loyal support of Miss Josephi, and all others connected with the Social Service Committee has made it possible to conduct successfully its many activities, and the Committee's thanks are extended to them for their assistance.

The President and Board of Governors of the Hospital have given most valuable aid, and their interest in this Department is most appreciated.

Respectfully submitted,

JULIA POST SMITH,

Chairman, Social Service Committee,

New York Hospital.

December 31, 1926.

* Refers to previous admissions to any hospital for mental disorders.

The number of patients treated has varied little during the past few years, 555 in 1926 and 565 in 1925. The number of cases admitted was 278 in 1926 and 290 in 1925. The number discharged, 300, was slightly in excess of those admitted. The number of applications for the year was 658.

ADMISSIONS

Of the 278 patients admitted, 117 were men and 161 were women. Three persons were admitted twice during the year, and 32 changed their legal status from voluntary to committed or the reverse, so that the number of persons actually received was 243.

The diagnosis table is, as in previous years, in accordance with the classification adopted by the American Psychiatric Association and the National Committee for Mental Hygiene.

The types of cases received were not unlike those of recent years. The number of cases with organic brain disease amounted to only 6.5 per cent of the total admissions. Of this number 7 were cases of general paralysis, 6 of whom were treated for malaria, most of whom responded favorably. Only 4 patients without psychoses were admitted on account of alcoholism and drug addiction.

Twenty-nine of the patients admitted had received treatment at the Hospital on one or more previous occasions, and 53 had received treatment in other institutions; 6 of this number were received upon transfer from other institutions. One hundred and four, or 42 per cent, gave a history of one or more previous attacks. One hundred and seventy-seven, 72 per cent of the admissions, presented a history of mental symptoms for less than one year.

The average age of the patients admitted was 39.2 years for the men, and 38.4 years for the women. This is approximately what it has been for some years. Twelve were under twenty, 3 of whom were sixteen or under. Applications for the admission of children are not encouraged as no separate provision has been made for them and their association with adults is not always salutary. There is a distinct field for the treatment of special problems of childhood and early adolescence, with the view of preventing the development of serious nervous and mental disorders. This would require special provision. Seventy-eight, 28 per cent, were under thirty; and 157, constituting 56 per cent of the total admissions, were under forty.

The occupations of the patients admitted were, as in previous years, principally professional and commercial. Twenty-two were still students in school or college. Nineteen were teachers in schools or colleges. Six were physicians and a like number were lawyers. Of the self-supporting women, 13 were business women and 8 were nurses. Seventy-nine, or over half of the women, were married and supported by their husbands, who were either business or professional men.

Seventy per cent of the patients admitted made their own applications. This is in accordance with our experience of previous years. Four patients who came to the Hospital under legal commitment later signed their own applications as voluntary patients. The provision of the statute permitting mentally and nervously sick persons to voluntarily enter a hospital for treatment is a most humane provision and has undoubtedly saved from severe and lasting psychoses many persons who less than twenty years ago could not have received hospital treatment no matter how much they had desired it, until they had satisfied a court that they were sick and in need of such treatment. The policy that has been followed has been to resort to legal restriction only when it was clearly required to protect the patient and to furnish legal authority for detention that could not properly be dispensed with. In 27 instances it became necessary to place under legal restriction patients who had been received in the Hospital as voluntary patients.

DISCHARGES

The total number of patients discharged, excluding 32 changes in status, was 268, of which 117 were men and 151 were women. Of this number 61 were fully recovered, 52 were much improved and 66 were improved. These 179 patients constituted about 68 per cent of the total number discharged. Forty-six were discharged without having improved. A number of the latter as well as those

BLOOMINGDALE HOSPITAL—WHITE PLAINS, N. Y.

transferred to other institutions were cases which had been in the Hospital for a considerable period of time and were, in accordance with the policy of the Hospital, removed to make room for new admissions. Twenty-eight were transferred to other institutions. Nine, $1\frac{1}{2}$ per cent of the total number of patients treated, died.

The average period of treatment in the Hospital of those who were discharged as recovered was one year and ten days, and of those improved eight months and twelve days. Twelve of the recovered cases had been in the Hospital for more than a year, 4 for more than two years, and one for six years. At the close of the year 45 patients who had left the Hospital during the year were still carried on the books as on visit. A considerable number of these patients were kept under observation by means of visits to the Hospital physicians either at White Plains or at the New York Hospital. The visits of former patients to the New York office were 91 and to Bloomingdale Hospital 191. This service is of great value to the patients in aiding them to complete their adjustments outside of the Hospital and to seek early advice in the event of a return of any unfavorable symptoms. This service to our patients on visit as well as to former patients is furnished without charge. It consumes considerable of the time of and adds much to the work of the physicians. Further organization of this work is advisable and to the advantage of both the patient and the hospital.

CLINICAL SERVICE

There have been few changes in the medical staff during the year and vacancies have been promptly filled. In addition to the regular staff conferences at which patients with their case records have been presented for study and consideration, a staff conference has been held each week at which topics of scientific interest, special studies, and current literature have been presented and discussed by the physicians. These conferences have been most helpful and have contributed to the maintenance of the usual high standard in the clinical service. A study of Psychoses Occurring in Relation to Childbirth was published by Dr. Kilpatrick and Dr. Tiebout in the *American Journal of Psychiatry*, July, 1926. The visiting physicians from the New York Hospital have continued their regular visits to the hospital, and have been of great assistance in maintaining the clinical standards in internal medicine and urology. The consulting specialists have been called upon constantly and have responded promptly, and furnished skilful service which has been of great advantage to the individual patients and to the standards of the hospital. It is a pleasure to again express appreciation of the coöperation of the administrative, clinical and labora-

tory staffs of the New York Hospital in dealing with various problems, and of the kindly and skilful attention received by patients, employees and staff members who have been transferred to the New York Hospital for examination and treatment.

Employees' Clinic. The out-patient clinic for the examination and treatment of employees has continued to demonstrate its usefulness. It has made possible better standards of care for the employees and conserved the physicians' time. During the year 514 persons paid 1361 visits to the Clinic. The work done at the Clinic included 150 physical examinations; 200 X-ray examinations; a considerable number of serological and other laboratory examinations; and a number of preventive treatments against typhoid fever, diphtheria and smallpox. Seventy-six employees suffered from illnesses that confined them to bed, and 2 of the medical staff were obliged to seek treatment in general hospitals. The visiting and consulting specialists examined many of the cases and several were referred to general hospitals for treatment.

New York Hospital Psychiatric Clinic. The medical service of this Clinic has been furnished by Bloomingdale Hospital. During nine months Dr. Henry was absent and the Clinic was in charge of Dr. Allen. Beginning September 1st, the general supervision of the Clinic passed from the Medical Director of Bloomingdale Hospital to the General Psychiatric Director of the Department of Psychiatry of the Society, although the Hospital as heretofore continued to assign physicians from its medical staff. During the year 416 patients visited the Clinic 554 times. It is gratifying to note that this is an increase of 177 visits over last year, which was the first full year the Clinic was in operation. About one-third of the cases were referred from other out-patient clinics and hospital wards. A large number were referred by the Probation Bureau of the Court of General Sessions. The personnel of the Clinic has consisted of four physicians and a social worker. Recently another physician, not connected with the Hospital, has been appointed to the Clinic staff. The space allotted is limited and already insufficient. The value of the Clinic may be inferred from the increased demands made upon it during this second year of its operation. A statistical table may be found in the appendix.

The surgical work required by patients during the year included three major operations. In addition 7 tonsillectomies were done and 60 minor surgical operations performed. Some of the cases were sent to the New York Hospital, some to the White Plains Hospital, and in some instances the operations were performed in the hospital operating rooms. As in previous years the Hospital has relied principally upon Dr. J. Fielding Black of White Plains

for surgical attention. He made in all 85 visits to the Hospital during the year. The consulting specialists were also called upon frequently. The oto-laryngological work has been attended to by Dr. Richard W. Moriarty and Dr. Frank W. Knight of White Plains. Dr. Frank N. Irwin of White Plains, who has been long connected with the Hospital, did practically all of the ophthalmological work required. All of the members of the visiting and consulting staffs have been most attentive, and when circumstances required have given their services with little or no charge. The total number of visits to the Hospital was 191. Patients also visited the private offices of the consulting specialists 147 times.

There have been no important changes in the dental department during the year. Dr. Sniffen has continued in charge, and by his sympathetic and understanding management of difficult patients, has made his department of great value to the clinical resources of the Hospital. Dr. Sniffen is assisted by a dental hygienist and a clerical and chair assistant. The number of new patients examined during the year was 197, and 410 others were examined in accordance with the periodical system of examinations made of all patients. The total number of patients' visits to the dental office was 2834. The total number of operations and other dental procedures was 5999, which was 2355 more than during the previous year. A new dental chair for the use of the hygienist was added to the equipment. A statistical statement is appended to this report.

LABORATORIES

The laboratories have attended to the usual amount and variety of work which has been characteristic of recent years. The following is a detailed report of work done in the Clinical Laboratory:

<i>Examinations:</i>	<i>Bloomington Hospital</i>	<i>Campbell Cottages</i>	<i>Total</i>
Basal Metabolism Determinations.....	204	..	204
Blood for R. B. C.....	336	1	337
Blood for W. B. C.....	466	2	468
Blood for Differential.....	396	1	397
Blood for Hæmoglobin.....	375	6	381
Blood for Calcium.....	20	..	20

Total.....	6,209	405	6,614

The reduction in the amount of X-ray work done is probably due chiefly to the fact that during the past year no research work was done requiring the use of X-ray. There were many fluoroscopic examinations in addition to the following detailed report of roentgenograms made:

<i>Examinations:</i>	<i>Patients</i>	<i>Employees</i>	<i>Total</i>
*Head.....	57	22	79
†Thorax.....	79	36	115
Shoulder.....	5	5	10
Upper Arm.....	1	2	3
Elbow.....	2	1	3
Forearm.....	4	1	5
Wrist and Hand.....	23	31	54
Abdomen.....	15	..	15
Pelvis and Hip Joint.....	3	3	6
Knee.....	4	4	8
Leg.....	1	5	6
Ankle.....	10	10	20

* Inclusive of examinations for skull, sinuses, mastoids, nose and jaw.

† Inclusive of examinations for lungs, heart, ribs and foreign bodies.

<i>Examinations:</i>	<i>Patients</i>	<i>Employees</i>	<i>Total</i>
Foot.....	2	7	9
Spine.....	7	3	10

Teeth, Complete Examination.....	182	8	190
Teeth, Partial Examination.....	26	25	51
Total.....	463	187	650

During the year another Victor air-cooled ultra-violet lamp was added to the therapeutic equipment. A new Sanborn graphic metabolism apparatus, a new electric thermostatic-controlled water bath and a new chainomatic chemical balance have greatly facilitated the laboratory work.

A report on the blood calcium and phosphorus in personality disorders, with the effect of ultra-violet radiation on the presence of these substances in the blood, was published in July in the *Archives of Neurology and Psychiatry*. This was the result of some research studies made by Dr. Henry and Mr. Walter W. Ebeling during the year 1925.

During the absence of Dr. Henry, from February until November, the laboratories were in charge of Dr. Ackerly, who with the assistance of the technicians, Miss Doyle and Miss Ferguson, made the services of the laboratories available for the medical staff.

THE NURSING SERVICE AND SCHOOL

During the year there has been a considerable increase in the number of students entering the training school. It is also worthy of note that the educational qualifications of the students are higher. The nursing standards have been further developed especially in the Men's Department. The appointment of Mr. Roden as Assistant to the Directress of Nursing has proved to be of distinct advantage to the Training School and the nursing service in the Men's Department. An increasing number of nurses are applying for and taking the post-graduate course in psychiatric nursing. Twenty-eight students, 20 women and 8 men, entered the school during the year. Twenty-seven affiliated students and 9 post-graduates entered for special courses. The total number of students in training at the end of the year was 44, which is a notable increase over last year. The two-year course has been discontinued with the graduation of two students. All graduates of the Training School are now eligible for the R.N. qualification. Further particulars concerning the School of Nursing will be found in the report of the Directress, appended.

Miss Elizabeth Knox, a supervisor, was awarded a scholarship to take a course at Teachers College, Columbia University. Miss Knox will return to the Hospital for at least a year's service at the completion of her course.

Miss Hearn returned to the Hospital April 1st, after a year's sick leave. Her wise direction of the School of Nursing and her thoughtful supervision of the nursing service have done much to build up the service and maintain its high standards.

The plans for the students' building, providing accommodations for fifty students, are nearing completion, and it is expected that ground will be broken in the spring. This is the first of the projected group of residences for the nurses. The students' buildings and the service connections for the group have been made possible through the generosity of an unnamed friend of the Hospital and the late Henry R. Taylor, a Governor of the Society. The importance of providing dignified and comfortable homes for the students and nurses cannot be overemphasized. It is hoped that additional funds may be forthcoming to complete the group.

PHYSICAL AND OCCUPATIONAL THERAPY DEPARTMENTS

The opening of the Taylor Recreational Building for women early in January added to the women's physical therapy department much needed facilities. Both the Taylor and Rogers gymnasias have been used to great advantage by both patients and employees. Organized physical recreations during the winter and inclement weather and better organized physical rehabilitation have been made possible by these two buildings.

The total number of patients enrolled in the departments of physical education during the year was 459, of which 202 were men and 257 were women. Details of the activities of these departments may be found in the appended table. The departments have also had charge of the entertainments and the organized social life of the patients. As the main object of treatment is social adjustment, the benefit derived from well-directed social and recreational contacts and participation in events is of great value. This is looked upon as one of the very important features of the therapeutic service of the Hospital. Instruction in the employment of physical exercises, games and sports, and social entertainments in the treatment of the sick, was given to 39 nurses during the year. The resources of the departments were made available to the employees of the Hospital and were extensively used.

Occupational therapy is one of the most valuable therapeutic measures available to the Hospital. The Hospital is fortunate in

having two well-planned and equipped buildings in which to carry on this form of treatment. All patients whose condition permits go to these special buildings for regular periods each day. For those patients who are unable to leave the halls, definite hours are arranged when the personnel of these departments visit the halls. There are few patients who do not have the advantage of this form of treatment. The total number of patients treated during the year was 493, of whom 227 were men and 266 were women. This number constitutes 88 per cent of the total patients treated at the Hospital. The number of articles made or repaired was 27,685, of which the men produced 8,981 and the women 18,704. In addition, the printing shop, in which some patients find agreeable employment, turned out 407,689 pieces of printed matter. Gardening and other outdoor occupations, such as care of the lawns, game fields and courts, were also engaged in. Cement benches were set up, trees were chopped down and cut up. It is found that actual accomplishment of some worthwhile piece of work gives the best results in this form of treatment. Instruction in occupational therapy was given to 60 students, of whom 43 were nurses and 9 were in the course for training of occupational therapists. There were 8 others who worked in this department for short periods to become familiar with some special aspect of the work. The following articles were published by Mr. Haas, the Director of the Men's Occupational Therapy Department: "Developing Instruction Plaques for the Blind Teacher," *Modern Hospital*, April, 1926; "A Brief Review of Occupational Therapy at Bloomingtondale Hospital," *Bloomingtondale Hospital Occupational Therapy Press*, May, 1926; "A Vision of Occupational Therapy Production Cost Records," *Occupational Therapy and Rehabilitation*, August, 1926; and by Miss Gunderson, Director of the Women's Occupational Therapy Department, "Dynamic Occupational Therapy," which was read at the annual convention of the American Occupational Therapy Association, held at Atlantic City, N. J.

Massage, hydrotherapy and other forms of physiotherapy were employed as heretofore. One hundred and four women were given 1,747 treatments with the violet-ray lamp. No record was kept of the number of treatments given to men. Instruction in massage and hydrotherapy was given to 45 students. The statistics of the department will be found in the appendix.

COTTAGE AT ORIENTA POINT

Rockley Cottage at Oakland Beach, which was built by the Society in 1911, was disposed of in 1925. A larger cottage with more extensive grounds and a private beach was secured at Orienta

Point, Mamaroneck. Certain changes have been made in the cottage to meet the special needs of the Hospital. A fireproof enclosed stairway, a fire wall, and an addition have been constructed, the latter comprising the kitchen and employees' quarters. A sea wall is being constructed and the beach greatly enlarged. The cottage has been furnished throughout and will be ready for occupancy shortly after the first of the year.

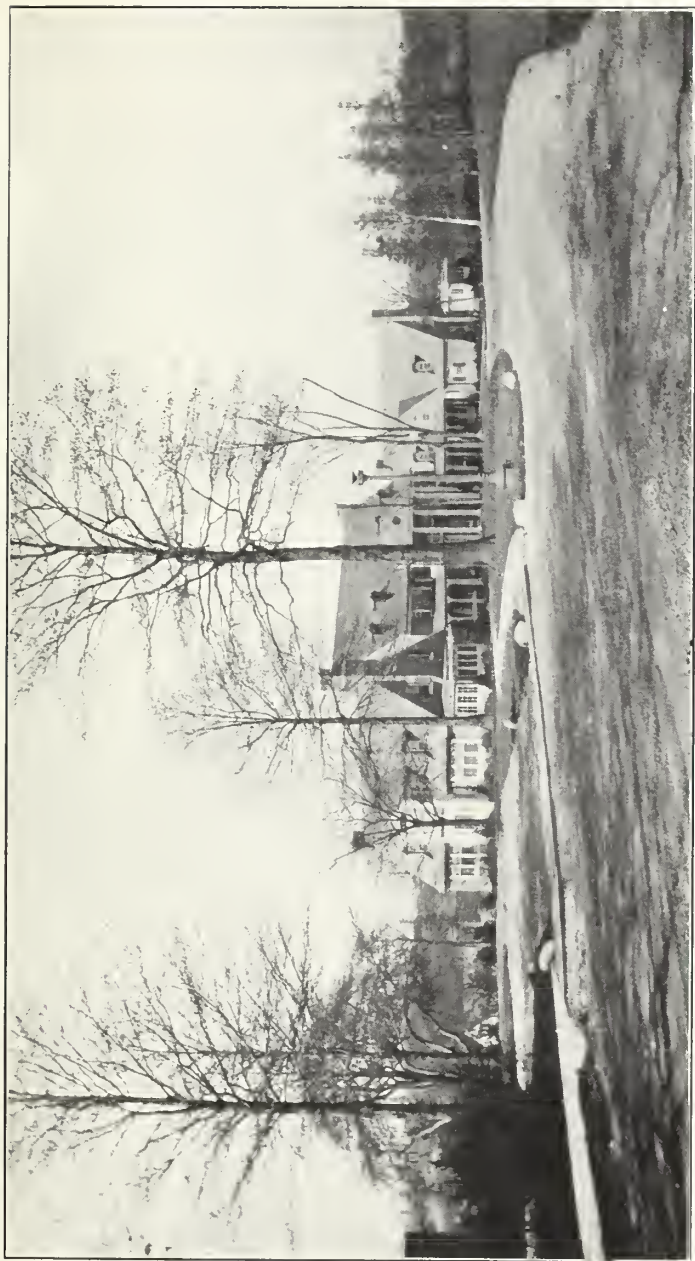

EDUCATIONAL WORK

The educational work carried on at the hospital merits some comment and is important enough to direct special attention to it. This very important part of the work done at the Hospital is directed to the training of physicians, nurses, occupational therapists, dietitians, physical education aides and housekeepers. Aside from two instructors employed in the nursing department solely for teaching, all the educational work is carried on by the physicians and directors and their assistants of departments in connection with their regular duties in the treatment of the patients and the administration of the Hospital. The advantages to the services of the Hospital are very great in building up and maintaining standards. The time is looked forward to when this work can be better organized and receive definite support.

This year a scholarship at Teachers College, Columbia University, was awarded to one of the supervisors for one year. She will take a course in hospital supervision. This scholarship was made possible through the gift of a special fund, the Floyd Jones Fund for Nurses' Educational Purposes.

The four staff conferences held weekly, at which cases are presented; the Monday evening conferences for the discussion of scientific subjects and the review of current literature; and the conferences held with the visiting and consulting staffs all have an educational value for the physicians. An excellent medical library is kept up to date with new books and files of important periodicals. This year a study leave of one year was granted an assistant physician.

The School of Nursing is registered by the Regents of the University of the State of New York. All graduates are eligible for the qualification of R.N., granted by the Regents. This year the school gave instruction to 93 students, 48 of whom were undergraduates, 35 affiliated students, and 10 post-graduates. The Central School, in which the White Plains Hospital, the United Hospital at Port Chester, the New Rochelle Hospital, and the Mt. Vernon Hospital have united with Bloomingdale Hospital in the employment of a highly qualified instructor, is conducted in the school

STAFF HOUSE—BLOOMINGDALE HOSPITAL

building of this hospital. A class of 65 students is in attendance there twice yearly. No charge is made for the use of the building and its equipment. The contacts made with these other schools are of mutual advantage and stimulate interest in psychiatric nursing.

In the dietary department 19 students were given instruction. Eight were student dietitians and 14 were nurses. Instruction in the use of physical exercises and games in the treatment of patients was given by the departments of physical education to 39 nurses. Nine women took the six months' course in occupational therapy offered by the Hospital. The departments of occupational therapy also gave instruction to 43 student nurses in training in the hospital. One student has been trained in institutional housekeeping during the year.

During the summer months a limited number of medical students and students taking courses in physical education in educational institutions are given practical instruction for a period of three months.

The educational work of the hospital has been carried on over a number of years. It has increased each year and demonstrated its value to the Hospital and the community.

IMPROVEMENTS IN PLANT AND EQUIPMENT

The recently acquired cottage at Orienta Point was renovated and redecorated; an addition, comprising a new kitchen, employees' quarters, and bathrooms, were constructed; a fireproof stairway was built; and construction started on the sea wall and beach.

An additional hot-water line was installed at a cost of \$10,000. This system will supply water at a temperature of 110 degrees to all bathrooms. This will make it impossible for a patient to meet with an injury due to hot water, either in the continuous flow treatment baths or in the regular cleansing baths. This improvement is one of the most important made during the year.

Work was continued throughout the year of the renovation of the plumbing and toilet and bathrooms. Twelve rooms were completed. Funds are available for continuing the work next year. The total expenditure thus far has been \$172,000, of which \$82,000 came from current income.

Funds were made available for the repair, redecorating and furnishing of the Medical Director's residence. The pantry in the Banker Villa was renovated and new equipment installed at a cost of \$1500. Additional equipment at a cost of \$600 was provided for the Nurses' Training School. A new dental chair was provided for the use of the hygienist in the Dental Department. A room was set aside for a diet laboratory and completely equipped for the

teaching and training of student nurses in dietetics, at a cost of \$2,500. Students taking the special course in Dietetics offered by the Hospital also use this laboratory. It is a most useful addition to the facilities provided by the Hospital in carrying on its educational work.

A nursery for trees and shrubs was started at a cost of \$500. This will make possible the prompt replacement of trees and shrubs when necessary and will result in a considerable saving to the Hospital. A number of other lesser improvements were made during the year.

The construction of Staff Cottage No. 3 was authorized and work begun. It is expected that it will be ready for occupancy in the spring. The construction of this cottage was made possible by the fund so thoughtfully left to the Hospital by the late Henry R. Taylor, a Governor of the Society.

NEEDS

Now that the construction of the Students' Building of the group of residences for nurses is assured, it would seem to be highly desirable to complete the entire group as well as to provide other buildings for employees and a dining-room for the entire group. This would release much space in the present buildings for the adequate development of some of the treatment services and more space for the much needed physicians' offices and examining rooms. Additional cottages for senior physicians are desirable.

There continues to be a considerable need for extensive renewals occasioned by depreciation of the plant. Further attention should be given to improving the heating system. A study of the lighting and electric system in the Hospital generally to correct deficiency and bring about economies of operation would appear to be advisable. New buildings have been added and soon the Students' Building will require additional electric current. The extending of the outside lighting system and placing of the wires underground is a subject for consideration.

The main driveway is in need of serious consideration. The present roadway does not stand the wear of the automobile traffic to which it is subjected. Because of the large number of visitors who come to the Hospital by motor, it seems desirable to provide greater parking facilities than are now available. A landscape architect could undoubtedly offer helpful suggestions by a study of the present driveway and the problem of parking space. The picket fence which surrounds the property does not meet the needs of the property and is a source of expense to keep up. Its replacement by a more durable type is desirable.

The matter of refurnishing the halls throughout the Hospital is one which merits consideration. Much of the furnishings has been in use a long time and are not in keeping with the present atmosphere of the Hospital. Carefully selected furniture and furnishings would do much to brighten up the halls and make them more attractive. This in turn would react beneficially upon the patients.

The Bloomingdale Committee is conversant with the many needs of the Hospital which have not been specifically mentioned in this report. Appropriations have been promptly made by your Board when recommended by the Committee. Constant effort has been made to maintain the entire plant in such condition that the services of the Hospital would not be impaired. The continued maintenance of the service of the Hospital requires that the demands of progress in the medical sciences generally and in psychiatry in particular be met and kept abreast of.

The need of consideration for funds specially provided to carry on the educational work of the Hospital, to stimulate research, and provide for more intensive and liberal training of members of the medical staff, is worthy of serious consideration. It would appear that these necessary and important activities of the Hospital ought to be carried on independently of the maintenance charges of the Hospital.

Attention is invited to the yearly increasing cost of maintenance. This has been due to the gradually increasing cost of supplies; the necessity of meeting wages paid for similar service in the community; the increasing of salaries to retain trained personnel; the increasing of wages of faithful employees for length of service; and the cost of gradually increasing the facilities of the Hospital and the raising of standards of service. In 1925 this increase amounted to over seven per cent; in 1926 to over three per cent. The estimated per capita cost for 1927 is \$62, based on expenditures for 1926 and certain increase of wages, an increase of six per cent. It would appear to be highly desirable for the Hospital to have the support of additional special funds, such as the John C. Green Memorial Fund, the income of which would be applied to the support of worthy patients whose friends were unable to reimburse the Hospital in whole or in part for their treatment.

FINANCIAL

The cost of maintenance advanced more than three per cent over the previous year. The increase in salaries and wages was nearly five per cent, and the cost of supplies, principally food, more than one per cent. The total expenditure for ordinary maintenance and care and treatment of patients was \$801,948.42. This includes the

maintenance of the properties at White Plains and Orienta Point, ordinary repairs and renewals, insurance except against fire, supplies, nursing and other study and treatment services, the educational work engaged in, salaries and wages, and all other running expenses. Capital charges and the cost of extraordinary renewals and improvements for which special appropriations were received, are not included.

Of the 587 cases treated during the year 255, or nearly one-half, were wholly or partially supported by the Society. The number treated without charge was 32, and 230 paid rates that were less than the average cost. The expenses borne by the Society in the treatment of these cases amounted to \$200,366.07, which was the equivalent of the support of 67 free beds throughout the year. The number of weeks' board and treatment furnished was 13,910, and the per capita cost was \$57.65.

The income of the John C. Green Memorial Fund, amounting to \$8408.27, was, in accordance with the terms of the Memorial, applied to the support of 8 patients.

GENERAL

Visitors. The number of visitors to patients during the year was 13,785.

Official visits were made to the Hospital by the Medical Inspectors of the State Hospital Commission on March 4th, July 31st, September 24th and December 30th.

The courtesies of the Hospital, for the purpose of study and training in psychiatry, were extended during the year by the Bloomingtondale Committee to Dr. Annapel F. N. Christie, physician to Vassar College; Dr. Robert M. Ross, Assistant Superintendent of the Kerr Memorial Hospital, Canton, China; and Dr. Margaret Posthuma of England, who has been studying at various psychiatric centers in America.

Among others who visited the Hospital during the year were Mme. Oscar Kallas, wife of the Minister to England from Esthonia, who was visiting the educational institutions in this country; Dr. A. C. Pacheco e Silva, Director of Hospital de Juquery, San Paulo, Brazil; Dr. Rene Charpentier, Medicin Directeur de la Maison d'Hydrotherapie et du Convalescence du Parc du Neuilly, Paris, who was visiting hospitals in this country under the auspices of the Rockefeller Foundation; Dr. Josef Lundahl, Superintendent of the Visby State Hospital, Visby, Sweden, who as the representative of the Swedish Government was visiting psychiatric institutions in this country; Dr. Alfred Adler of Vienna, who is lecturing on educational psychology in the United States. Dr. Adler gave a talk

before the Medical Staff; Mr. Karl M. Bengtson, architect, sent to this country by Gothenburg, Sweden, to visit mental hospitals in anticipation of building such a hospital in that city; Dr. Elizabeth Casson, Medical Officer of the Halloway Sanatorium, Virginia Water, England; and a number of superintendents from State hospitals throughout the country.

One hundred and twenty-five members and guests of the American Psychiatric Association visited and were entertained at the Hospital in May.

The Westchester County Medical Society held its November meeting at the Hospital. A collation was served.

The Board of Governors of the Retreat, York, England, graciously presented to the Hospital photographic copies of the portraits of William Tuke and Samuel Tuke, and of pages of the Retreat's Visitors' Book, showing the signatures of certain Indian chiefs who visited that institution in 1823.

Libraries. The report of the librarian shows that 363 volumes were added to the libraries during the year. Of these 285 were to the general library, 38 to the medical library, and 40 to the nurses' library. Sixty-five general magazines (35 titles), and 41 medical journals, of which 8 were in foreign languages, were received. The distribution for the general library was 10,435 volumes, of which 5482 were issued to patients, 2642 to the men and 2840 to the women. The number issued to employees was 4953. These figures show an increase over last year and indicate that the library is of greater service both to patients and employees. No figures are kept showing the use made of the medical library. It is safe to say, however, that the Monday evening conferences of the Medical Staff have stimulated a greater interest in the library and many more references are made to the journals and books. The general library now contains 5021 volumes, the medical library 1646, and the nurses' library 293, making a total of 6960 volumes.

Gifts. No outstanding gifts have been made to the Hospital during the year. Many friends of patients have signified their appreciation of the service rendered to patients in whom they were interested, by giving liberally to the Nurses' Entertainment Fund.

Religious Services. Since 1819 religious services have been conducted on Sunday afternoons. The services this year were conducted by Rev. Frank H. Simmonds of Grace Church, White Plains, and by Rev. Roland C. Ormsbee of St. Bartholomew Church, White Plains. The hospital records with sorrow the loss of a most helpful friend in the death of the Rev. Father Richard J. Keefe of White Plains, who with his assistants has been most faithful in attending to the religious comfort of the Catholic patients.

Medical Staff. Dr. Stewart B. Sniffen was appointed Assistant Physician on January 14th.

Dr. Charles W. Stephenson resigned on January 15th.

Dr. George W. Henry resigned February 1st and was reappointed October 30th.

Dr. Gregory Zilboorg was appointed Assistant Physician on July 1st.

Dr. Thomas M. French was granted a leave of absence for one year for special study in Europe. He left the service on September 17th.

Dr. William L. Russell resigned from the position of Medical Director on September 1st to become the General Psychiatric Director of the Department of Psychiatry of the Society.

Dr. Mortimer W. Raynor was appointed Medical Director on September 1st.

Dr. Herbert E. Chamberlain was reappointed Assistant Physician for a temporary period of service, from October 22nd to November 12th.

Dr. S. Spafford Ackerly resigned on November first.

Dr. Augusta Scott was appointed a deputy of the Psychiatric Out-Patient Clinic at the New York Hospital.

Dr. William L. Russell resigned as Medical Director of the Hospital to take up the duties of General Psychiatric Director of the newly created Department of Psychiatry. Dr. Russell had been Medical Director of the Hospital for fifteen years. During his directorship the Hospital developed standards of service to the mentally sick beyond anything which was available up to 1911 in this country.

If in presenting this report of the work of the Hospital I have not done justice to the accomplishments of the year, it is because of a lack of first-hand acquaintance of them.

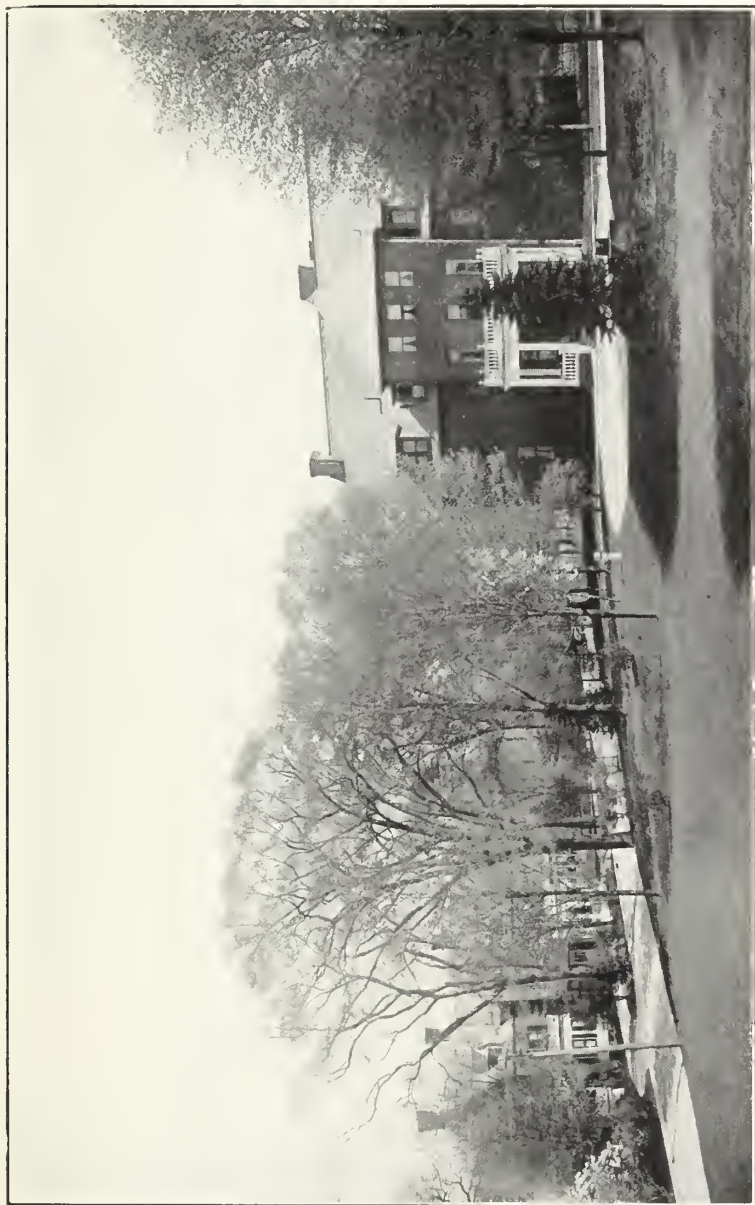

To the physicians, nurses, executives and employees of the Hospital I wish to express my appreciation of their assistance and the devotion to their duties which has been everywhere in evidence.

To Dr. Russell I am deeply indebted for the thoughtful manner in which he placed at my disposal his time, his knowledge of the Hospital and its policies, and his advice in assisting me to become acquainted with my new duties as Medical Director of this Hospital.

I wish also to express my appreciation to your Honorable Board and the Bloomingtondale Committee for the wise counsel, the helpful advice, and the liberal support so graciously given to me since taking up my duties of Medical Director.

Respectfully submitted,

MORTIMER W. RAYNOR,
Medical Director.

It is a great pleasure to report a marked increase in the school enrollment. Twenty-one students have been received during the year. The first group of male students reported at Bellevue Hospital in March.

The general health of the student body has been on the whole good. The only cases of serious illness occurred in two affiliated students, one of whom had scarlet fever, the other an acute mastoiditis, which required operation.

Graduation Exercises were held on June 3rd, in the afternoon. Dr. Charles P. Emerson, Dean of the University of Indiana Medical School, and President of the National Committee for Mental Hygiene, delivered the address of the occasion. An informal tea with dancing followed the exercises.

The past year again shows a notable increase in the Post-Graduate course. There has been a capacity enrollment of students who have been unusually interested.

Among the many visitors to the Hospital was a group of graduate nurses attending the summer course at Teachers College; groups of student nurses from the Fifth Avenue and French Hospitals, New York City; St. Johns, Riverside, Yonkers; the Ossining Hospital; and the New Rochelle Hospital. Clinical demonstrations on the wards of the Hospital were given to these groups by members of the medical staff.

This year the scholarship was given to Miss Elizabeth Knox, Class of 1924, who is taking the Administrative Course at Teachers College.

The nurses have appreciated the theater parties and other entertainments made possible by gifts received from our thoughtful friends, and wish to take this opportunity of expressing their gratitude.

The long cherished hope for the nurses' residence is about to be realized. The site has been selected and the plans are nearing completion for the first unit of the group of buildings which will house the nursing personnel and its allied departments. Completion of the first unit, which is for students, is being anticipated with great enthusiasm.

To all who make possible the growth of the school I wish to extend my appreciation.

Respectfully submitted,

KATHERINE F. HEARN,

Directress of Nurses.

ANNUAL REPORT OF THE SUPERINTENDENT OF THE CAMPBELL COTTAGES FOR CONVALESCENT CHILDREN FOR THE YEAR 1926

To the Board of Governors:

GENTLEMEN:—The nineteenth annual report of the Campbell Cottages for Convalescent Children is respectfully submitted as follows:

The service of this branch of the New York Hospital increases steadily, not only in activity but also in breadth of programme, and results have been very encouraging.

The Cottages have been fully occupied, the daily average having been the capacity number, which is eighty. While the average length of stay has been as usual—thirty-three days—exceptions have been made in instances where a child's condition seemed to promise improvement under longer periods of care, and in practically all of these instances the results have been remarkable.

Among these interesting children were several whose recoveries seem well worth mentioning.

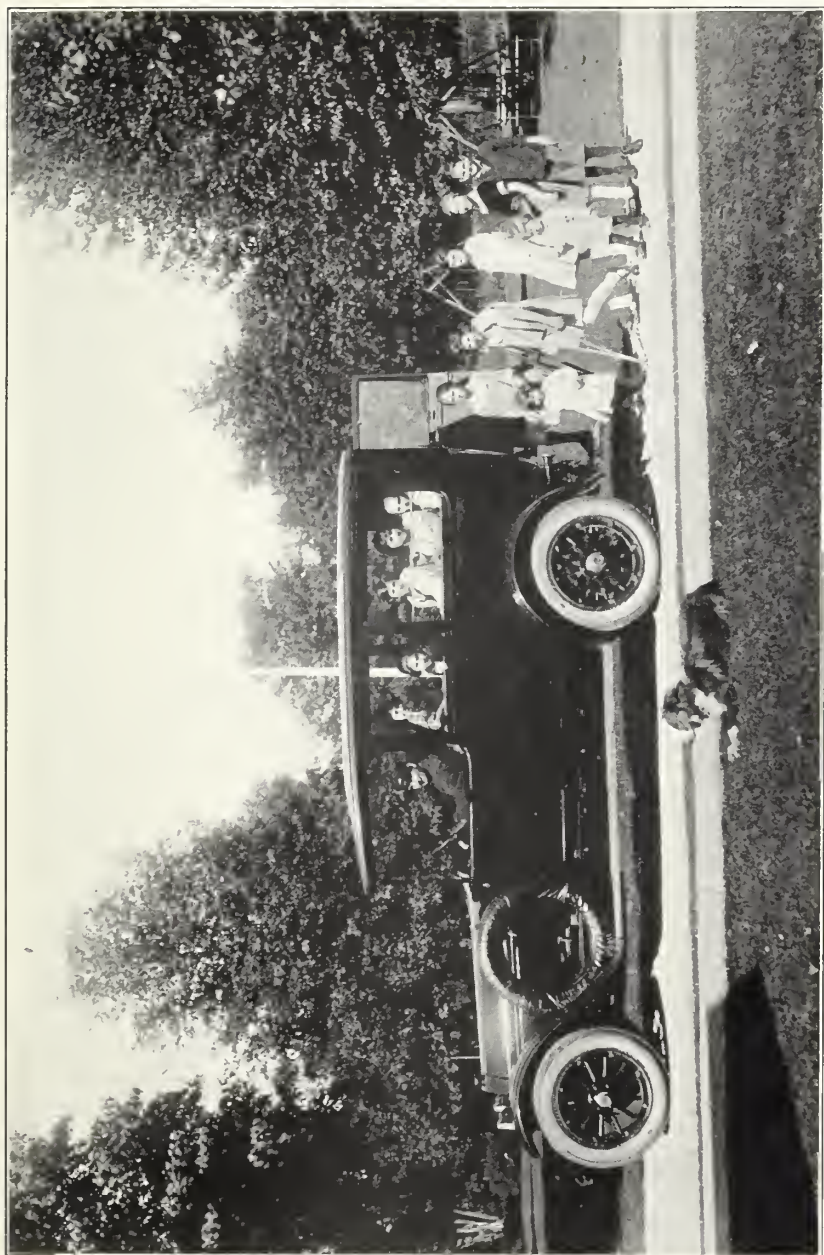

Thirty-eight chorea cases made highly satisfactory recoveries; especially two little girls—one of whom had been ill for six years—who averaged a gain of eleven pounds in weight and returned home in normal condition.

A girl of thirteen years, admitted with a diagnosis of incipient hip disease, received several months' treatment of sunshine, fresh air and extra nourishment, and on her return to her home was reported by her doctors as practically cured.

A boy whose foot was in very poor condition following an operation for osteomyelitis was eventually able to throw away his crutches and play and run like other children.

The number of children cured was 152, second only to the highest record in our Cottages, which was 162 cured in 1923.

The programme of Campbell Cottages has steadily broadened, and its aim is to educate its little patients not only physically but in as many other directions as possible. Besides the regular school periods of two and a half hours daily, the children's free time is directed by a recreation supervisor who plans the out-of-door activities, physical exercises, games and dancing, as well as the indoor story-hour and singing.

CAMPBELL COTTAGES FOR CONVALESCENT CHILDREN
OFF ON A PLEASURE RIDE

It is impossible for one person to supervise the free time of so large a number of children of varying ages, in scattered departments, at one time, and it had always been our hope that at some time it might be possible to engage an occupational teacher for the older girls for part of each day or evening. This has now been made possible for one year through the generosity of the New York Hospital Social Service Committee, who have made a gift of \$1,000 to the Cottages from the Day Nursery Fund.

A part-time occupational teacher has been engaged, her term of service to begin in January, and her work is to include instruction in sewing, mending, knitting and other forms of domestic art.

Our educational programme also includes instruction in personal hygiene, given by the nurses.

Many groups of interested persons, including physicians, nurses and social workers visit the Cottages, while groups of pupil nurses are brought to observe, as part of their training.

The Social Service Department has given untiring aid in our efforts to reduce our contagion problem to the minimum. Contagion is a baffling problem, and often defies every care and vigilance; but during the past year, while the Cottages have seen several outbreaks of mild contagion, the service of the institution has not been handicapped to the extent known in other years.

The prompt and friendly coöperation of the Bloomingdale laboratory staff in examining specimens sent from this institution has been of great value in aiding in early isolation of contagious cases.

Repairs and painting of the usual general nature were attended to, as well as considerable necessary repairs and improvements on the exterior of the buildings. The roofs, gutters and leaders were found to be in need of repair, and in some places it was found necessary to lay copper gutters. The chimney in the Girls' Cottage proved to be no longer safe, and was replaced by a new one.

A new hose house was built in place of the old hydrant on front of the Girls' Cottage, and a new reel cart was purchased for the proper care of the 300 feet of hose recently purchased as a necessary protection in case of fire. A new three-inch fire hose was installed in the cellar, in place of the original hose, the diameter of which did not allow sufficient water pressure. The fire apparatus is now adequate to the needs of the institution.

The automobile has been painted and the engine thoroughly overhauled.

The babies' open-air playroom has been improved by the laying of a bright linoleum and a colored animal frieze.

Christmas seems to be, as well it might, the climax of the year's efforts for the children's welfare. That our girls and boys have many friends is proved, not only at Christmas, but many times during the year, when helpful gifts are brought to their door; but at Christmas time their happiness is remembered by many friends, in private homes and in the business man's office. The personal visit of Santa Claus, whose home is in White Plains at present, makes Christmas Day complete, and one long to be remembered by those whose privilege it is to be present.

The generosity of various men's organizations in White Plains adds very materially to our efforts to make these little children happy on Christmas Day.

It would not be possible for me to fully express my appreciation of the high order of service rendered by the nursing staff who have so admirably supported and carried out the plans of this institution for many years.

To the Board of Governors and the Bloomingdale Committee I again tender my deep appreciation of the advice and support with which they encourage the work and hopes of Campbell Cottages.

Respectfully submitted,

ALICE C. ELLISON,

Superintendent.
